Lancaster Farming

VOL. 25 No. 13 | Lancaster Farming, Saturday, January 26, 1980 | $7.00 Per Year

Delegates to the 1980 Pennsylvania Farmers Union Convention this week pondered questions of milk security and land use planning. Four new counties, Dauphin, Westmoreland, Wyoming-Sullivan, and Crawford-Venango were granted charters.

At annual meeting

PFU adopts resolutions on dairy, land use

BY CURT HARLER

CAMP HILL — Delegates to Pennsylvania Farmers Union's Eighth Annual Convention adopted policy favoring a land preservation plan similar to that proposed in Lancaster by H.H. Haverstick.

They also approved a milk security fund proposal similar to that urged by dairy cooperatives and acted on several other farm-related issues.

About 200 delegates from across the state met in Camp Hill Monday and Tuesday.

While Haverstick's name was deleted from the original land policy proposal, delegates voted to favor "elimination of capital gains tax, inheritance taxes, and real estate transfer taxes when deed restrictions limit the use of property for farming."

The statement was sponsored by the Lancaster County delegation.

Delegates said they supported a producers security fund to be established by contributions from dealers.

They said contributions should not exceed two cents per cwt. They asked the fund be built to the value of milk purchased by the largest dealer in his highest 60 day period.

They did ask co-ops be obliged to participate on milk purchased from non-members.

They also said defaulting dealers should have licenses withdrawn and the licenses should continue to be withheld as long as the dealer is in default.

PFU recommended at least two farmers who derive 75 percent of their income from farming be appointed to serve on the state Game Commission.

They recommended a Pennsylvania Conservation Program with cost shares at a minimum of 90 percent on all practices mandated by the Soil Erosion and Sedimentation Act, EPA, or DER.

A proposal by Lancaster County to approve a graduated land tax was

Legislative roundup

Wenger pushes stock tax exemption

BY DICK WANNER

HARRISBURG — Pennsylvania's capital stock franchise tax is discouraging family farmers who might benefit by incorporating their farms, according to Noah Wenger.

Wenger himself a Lancaster County farmer, is vice chairman of the Pennsylvania House of Representatives agriculture committee and the prime sponsor of a House bill which would exempt closely-held family farm corporations from the tax.

The bill, House Bill 1608, has been lodged in the House Appropriations Committee since Nov. 27, but Wenger said Thursday he hopes it will get out of the committee soon, and onto the floor of the House for debate and voting.

In its initial form, Wenger said, the bill had met with the approval of the state Department of Agriculture, but the Department of Revenue resisted the measure because it would reduce the amount of money coming into the state treasury.

Wenger said, though, that revenue officials were insistent on closing potential loopholes that would have allowed horse racing farms to qualify for the exemption.

Other farms which would not be exempt under the proposed legislation would be fish, fur, and game operations.

How many farms would a repeal of the tax affect?

"Right now, except in very rare instances, we tell our clients to just forget about incorporating," siad Richard Dennison, manager of Pennsylvania Farmers Association Farm Management Business Analysis Service. "The tax is a major sumbling block to incorporation, and it closes off one viable avenue to family farm preservation."

The stock tax is levied annually on the value of the total assets of a corporation, whether those assests are owned outright or mortgaged. Only two other states have a similar tax, Dennison noted.

In Pennsylvania, affected farmers are out from $2500 to $7500 a year, and sometimes more.

Of FMBAS's 4000 farmers clients, Dennison said, only a few would profit from incorporation, probably around five percent. But as the economy continues to grow, and as federal taxes continue to take bigger bites out of smaller dollars, the pressure to incorporate should get stronger in the years ahead, he believes.

According to the Department of Revenue, exempting closely held family farm corporations from stock tax would cost the treasury $600,000 to $700,000 a year.

"But that is a minimal tax loss," Dennison pointed out, "when you compare the value of farm production that we could be protecting if the tax were removed."

Dairy security proposals awash in confusion

HARRISBURG — After struggling through six drafts of milk security fund proposals, legislators admit they are back to ground zero.

None of the drafts to date are acceptable to the lawmakers. And the struggle among members of various factions to have their proposals made law is not easing the job.

"We're farther away now than we were three years ago," a legislative aide to State Senator Patrick Stapleton said Thursday evening.

The frustration on all sides was evident after a week of intensive meetings between lawmakers and co-ops, dealers, farm organizations, and the Agriculture Department.

The talks only served to emphasize differences.

Legislators say the co-op proposal is unacceptable. It calls for dealers to pay the entire two cent per cwt load to establish a fund. Co-ops, even processing co-ops, would pay nothing.

The Secretary of Agriculture's penny per cwt plan does not seem to be the answer, either. Legislators don't have the sentiment to force large dealers to pay into a fund when they could obtain protection under a bond for much less.

If the co-ops stay out of the bonding agreement, and the big dealers obtain alternate credit, the fund, built by small dealers, may rise by only a few hundred thousand dollars a year, legislators said.

Representative Reno Thomas, a hog breeder, pointed out he gets paid for pigs within 48 hours. Dairymen, he said, are the only ones with drawn-out payment problems.

A proposal for prompt payment was dismissed by a spokesman for the six Pennsylvania dairy co-ops. He said the co-ops did not even want to talk about it, they wanted to discuss their plan.

But John York, vice president of Lehigh Valley Co-op, one of the six, indicated in a separate interview at about the same time that he thought Lehigh would support such a proposal.

Representatives of all major farm organizations said they felt prompt payment was not feasible. All basically support the co-op proposal.

What's the beef on referendum?

LITITZ — Cattlemen had best sit up and take notice to the 1980 beef referendum that's just around the corner. It's time to put down the feed bucket and the pitch fork and pick up the paper. Time is running out to get the facts about the program known as the Beeferendum.

Since last November, Lancaster Farming has been covering the cattlemen's program proposed to "take charge" of their industry. If you missed those articles, this week's issue will be featuring a special pros and cons section, showing both sides of the same story.

So, read the issues; and try to answer, in your own mind, what you feel should be done.

More facts and information can be obtained through the local Agricultural Stabilization and Conservation Service or by writing for a copy of the order to: Beef Research and Information Order, Livestock, Poultry, Grain, and Seed Division, AMS, Room 2610-S, USDA, Washington, D.C.

Once you have the facts, take it one step further. Register to vote, whether yea or nay, from next Monday to Wednesday, February 6. Registration must be done by contacting the local ASCS office in your county, either in person or by telephone.

If you don't register, you'll be left out in the cold during the voting period between Tuesday, February 19 and Friday, February 22.

Notice, you'll have eight days in which to register, but only three days to vote.

ASCS points out that the voting will be done by secret ballot; no signature is needed in the 1980 rules. If you owned cattle last year, you are eligible to vote, as long as the cattle were not solely for slaughter.

The Beeferendum is an important issue. It's a government program, which doesn't automatically make it all bad; it's going to cost money, coming out of the producers bank roll; but, it will also promote beef and develop new markets through information and education, if handled correctly.

So, remember the three R's . . . read, register, and return your ballot to make your vote count in this controversial referendum. S.M.

Planning better milk yields ...by the numbers.

This Pennfield Computer readout can make your milk yields far more profitable . without giving away one bit of effective nutritional quality In fact, it will help to eliminate waste as well as balance the nutrients provided by your home grown forage to meet the exact nutritional requirements of your cows.

This readout is a vital part of the Pennfield Computerized Total Ration Service. And here's how it works·

1. We collect samples of your forage
2. Then we evaluate the quality of your forages We determine the total digestible nutrients The fiber content The protein content. The amount of carbohydrates
3. The computer quickly spots any nutrients lacking in the forage. For your milking cows And for your dry cows It immediately points out the overfeeding of nutrients Underfeeding, too Both, of course, may be different at different times of the year. And the printout will tell you what you need. And when.
4. Your Penn Pro Professional advises you on the quantity and type of nutrients that should be added, to balance your total feeding program to your cows' nutritional requirements
5. The result can be increased milk production at the lowest possible feed cost.

Jim Musser, of Penn's Peaceful Meadow Farm, reviews his latest CTR report with Penn Pro Frank Campbell, while (insert) Gary Varner, formulates another report on Pennfield's in-house computer

The Pennfield Computer Total Ration Service could bring on your greatest growth act. In your milk yield. And your profits.

Try the Pennfield Computerized Total Ration Service. There's no cost or obligation for this unique service to dairy farmers Just phone us right now. Today. At Pennfield Feeds. Local calls: Lancaster 299-2561, Red Lion 244-4511 In 717 and 215 areas dial toll-free 800-732-0467 Pennfield Feeds, Rohrerstown Road, Lancaster, PA 17604.

Peoria Cattle

Thursday, January 24

Compared with last week's close, slaughter steers steady to 1.00 lower. Slaughter heifers steady to 50 higher. Cows 50-1 00 lower. Bulls steady Receipts about 70 percent slaughter steers, 25 percent slaughter heifers, balance mainly cows Slaughter steers and heifers opened the week sharply lower, due to increased receipts and a depressed beef trade At mid-week with reduced receipts upturn noted with full recovery on slaughter heifers in very uneven trading. Narrow outlet for cattle carrying high percentage yield grade 4's.

Lancaster Farming says...

Beeferendum needs a close look

Contrary to popular belief, Beeferendum is not McDonald's latest hamburger dish.

It's a checkoff program to raise money for promotion of beef research and marketing efforts.

Anyone, even a child, who has owned just one beef animal in the past year is eligible to vote for or against the program. This would include dairy animals shipped off as cutters and canners.

Farmers can register to vote this coming week at their local Agricultural Stabilization and Conservation Service office ASCS will accept registrations through February 6.

Registration requests can be made by phone. ASCS will then mail the appropriate form

The vote will be held February 19 through 22

A similar program proposal was defeated two years ago. But the rules have been changed since then.

Instead of a two-thirds vote, only a simple majority will be sufficient to institute the program.

Dairymen will help to pay for the beef referendum programs, but only on the value of culled cows when sold for slaughter

Producers can get a refund of the two cents per hundred dollar checkoff fee by requesting one in writing and presenting a receipt.

3 out of 3 isn't bad

Lest anyone fear agriculture is on the wane in Pennsylvania, we're happy to point out the national farm leaders haven't gotten the word yet.

Quite to the contrary, the top men in each of the major farmer organizations — American Farm Bureau Federation, National Grange, and National Farmers Union — all were in Pennsylvania this week

Newest member of the select trio is AFBF's Robert Delano, in office just two weeks.

National Grange Master Edward Andersen, a bit more experienced with two months on the job, made his first return appearance to the Keystone State since taking office in Lancaster during November.

We bring you exclusive interviews this week with both men.

Tony Dechant, President of National Farmers Union, brought 14 year's of experience with him to Pennsylvania this week But his outlook on farming is toward the future and not the past

Dechant, too, is profiled in this week's issue

All three men were supportive of Eastern agriculture. from Andersen, who pointed out that the leadership in saving America's farm land comes from this area, to Dechant, who continues his battle for higher dairy and grain parity

It takes some doing to get a major farm leader to a meeting It's really something when all three show up for meetings the same week in the same area

We appreciate their interest in and endorsement of Pennsylvania agriculture

Last time around the checkoff was a ho-hum affair This time the sides are clearly drawn. On one hand, it's peaches and cream, on the other, it's a major disaster.

The American Angus Association says almost all informed cattlemen support the Beeferendum. But the Texas and Tennessee Farm Bureaus are against it

Chain stores or banks which own cattle have just as much say in the voting as individual farmers

The members of the Beeferendum board will be appointed, not elected But it will be made up of all cattle producers

It will be unable, by law, to fight government programs hassling cattlemen It could solidify farmers' markets for beef.

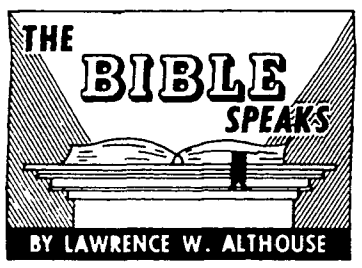
But the worst aspect of the program is the general lack of interest, pro or con, by farmers

A relative handful of people in all likelihood will dictate whether or not the program passes

As in governmental elections, those who don't vote have no right to complain about the way things are run.

Register this week to vote Read our many articles presenting both sides of the question. And vote in February

You owe it to yourself.



SIMON PETER

Lesson for January 27, 1980

Background Scripture:
John 13:36-38; 18:15-18, 25-27; 21:15-22.
Devotional Reading:
Matthew 16:13-20.

We all know a Simon Peter or two; enthusiastic, take-charge, impulsive, foot-in-mouth, and frequently talking a better game than playing it. The New Testament allows us to catalogue both his virtues and his sins. The man who first confesses Jesus to be the Christ, he is also the man who fails him most in his greatest hour of need. Clearly the leader of the early church, Peter must nevertheless be taught by a newcomer named Paul that his Christianity is too narrow, too limited.

I Will Lay Down My Life

Perhaps that is why we can identify so easily with him. We can see in him the same heights and depths that we find in our own lives, the same successes and failures, the same elation and shame. We have no difficulty in hearing ourselves say with him, "You are the Christ, the Son of the living God" (Matthew 16:16) and "I will lay down my life for you" (John 13:37). The words would probably come as easily for us as they did him.

We can perhaps imagine ourselves with Peter receiving that highest of commendations from the Lord: **"Blessed are you Simon Bar-Jonah! For flesh and blood has not revealed this to you, but my Father who is in heaven . . . and on this rock I will build my church . . . I will give you the keys of the kingdom of heaven, and whatever you bind on earth shall be bound in heaven..."** (Matthew 16:17-19). No other disciple was so highly praised as Peter.

Before The Cock Crows

Nor so soundly rebuked: "Get behind me, Satan! You are a hindrance to me; for you are not on the side of God, but of men" (Matthew 16:23). Like many of us, Peter often had that tendency to go too far, to operate without his brain properly engaged. He always meant well, but he was often as much trouble for Jesus as he was of help to him. And we can identify with that, too!

Yet, in Peter's abject failures, there is a saving message for us. For we can take hope in knowing that even a failure like Peter could be both forgiven and redeemed. Denying Christ three times in one night would utterly ruin any minister's career today, but Peter survived that tragic experience at Caiphas' house and went on to become the chief of Christ's apostles.

The brilliance of Peter's character was deeply flawed with weakness, but, no matter how towering that weakness may have seemed to Peter and his fellows, Christ demonstrated that the love and power of God to forgive and redeem are infinitely greater. God is a greater forgiver than I am a sinner. He is more powerful than all my weaknesses. His divinity can overpower my humanity.

And yours!

NOW IS THE TIME

To Use Fertilizer on Forage Crops

Many agronomists feel that too many farmers do not use enough fertilizer on their grass and hay crops In general terms we can expect about $3 in return for every dollar spent for fertilizer on the average farm crop. On many forage crop acres this return can be greater when properly fertilized. Just because the land is covered with grass or a grass-legume mixture, we should not overlook the value of liberal fertilization. The complete soil test is the place to start and meet the recommended needs. Forage crops can be produced on all types of land and are usually some of the most efficient feeds that can be fed to livestock. Proper fertilization will make greater utilization of forage lands.

To Review Cattle Marketing Pratices

The day of the prime-finished animals is all but history; however, we still have too many feeders that continue to feed their cattle until they are too fat and too heavy. At our recent Cattle Feeders Day, Dr. Lester Burdette from Penn State, told our local feeders that unless they stop feeding cattle into the Yield 4 and 5 grades, they will not stay in business very long. This is not a new suggestion to loal cattle producers. The trend has been in this direction for several years. Currently, over-finished heavy cattle are bringing from 5 to 8 cents per pound less than choice-grade handy-weight cattle. Why put on the extra weight at higher costs and then have to take less per pound at the market place???

To Plan Dairy Breeding Program

A recent report from one of our Penn State Dairy Specialists, Larry Specht, relates to the best age to breed dairy heifers. According to the DHIA records of over 56,000 heifers the average age of the first calving was 27.7 months. The range was from 18 months to 35 months of age. There was no increase in production by allowing heifers to reach 35 months before calving. Those calving from 18 to 24 months of age produced less.

If you're out to beat anthracnose

That's what SARANAC AR is all about!

in anthracnose country, it's the best alfalfa you can plant.

Even in sticky, hot, humid weather when anthracnose is sweeping neighboring fields, Saranac AR goes right on producing as though anthracnose had never been heard of.

It's bred for your kind of land and your kind of weather. Bred to meet your highest goals . . . even when ordinary alfalfas are curling over and turning yellow.

Saranac AR meets hard winters and bacterial wilt head on . . . and comes out on top. It's bred for anthracnose resistance, fast recovery and long-lived stands. Pre-inoculated, of course. It's the only one to plant where anthracnose is a threat. After all, that's what Saranac AR is all about!

Weekly 51 — Cattle — Midweek prices on Slaughter Steers and Heifers were mostly 1.00 lower, instances 1.25 off on Steers. Cows were 50-1.00 higher and Bulls firm.

Four day recipts this week 10,400, last week 13,800 a year ago 13,200.

The fed cattle trade followed an irregular course characterized by wide day-to-day price variations. Early trading was quite bearish and prices were forced sharply downward in reflection of a dull carcass trade. A part of the early decline was regained, however, in an aggressive midweek trade on curtailed supplies. Yield grade was again a dominant price determining factor, and even yield grade 3 800-900 lb. carcasses sold 2.00-3.00 per cwt below 600-800 lb. carcasses. In addition, mud was a more prevalent condition as feedlot conditions deteriorated. Much of the steer supply was good to average-Choice, with Steers making up approximately 48 pct of the supply and Heifers 29 pct. Cows comprised 15 pct. and Feeders 5 pct.

STEERS: At midweek, load Choice 3 1132 lbs. 66.00. Load Choice and Prime 3-4 1329 lbs. 63.00. Choice 2-4 1000-1250 lbs. 64.00-65.50, some mostly Choice but carrying heavy coating of mud 63.00-63.50, load predominantly 4 1200 lbs. 61.35. late. Mixed Good and Choice 2-3 1000-1250 lbs. 63.50-64.50. Good 2-3 60.00-63.50. During week, moderate volume predominantly 4 1250-1400 lbs. 61.00-63.50, some 4-5 1350-1450 lbs. 58.50-60.00.

Average of LS-214 detailed quotations for Choice 900-1100 lb. steers this week 64.90; Choice 1100-1300 lbs. 64.65. Average weight steers this week 1174 lbs. as compared 1183 lbs. last week. Average weight Heifers this week 1026 lbs. as compared 1019 lbs. last week.

HEIFERS: At midweek, load Choice 3 980 lbs. 64.50. Few loads and part loads Choice and Prime 3-4 975-1100 lbs. 63.50-64.00. Choice 2-4 900-1125 lbs. 62.50-64.25. Mixed Good and Choice 2-3 875-1050 lbs. 62.00-63.00. Good 2-3 58.00-61.50.

COWS: Utility and Commercial 2-4 46.00-49.00. Cutter 44.00-47.00. Canner and low-cutter 41.00-45.00.

BULLS: 1-2 1300-2275 lbs. 55.00-60.00, individual 1 61.00-63.00.

FEEDER PIGS 1709. Compared with 1592 head last week and 656 head a year ago. Steady to $4 higher. US No. 1-3 20-35 lbs. feeder pigs 9.00-18.00 per head, No. 1-3 35-50 lbs. 17.00-28.50, No. 1-3 50-70 lbs. 26.00-36.50, few Utility 20-40 lbs. 7.00-17.00 per head.

GRADED FEEDER PIGS 2975. ALL SALES CWT. Compared with 2390 head last, and 3569 head a year ago. Feeder pigs No. 1-2 20-40 lbs. $1-5 higher, others $2-5 lower. US No. 1-2 20-40 lbs. 41.00-67.00, few 70.00; 40-50 lbs. 45.00-65.00, 50-60 lbs. 44.00-61.00, 60-105 lbs. 38.00-54.00. US No. 2-3 25-40 lbs. 38.00-51.00, 40-50 lbs. 30.00-50.00, 50-90 lbs. 33.00-49.00.

SHEEP 361. Compared with 362 head last week and 308 head a year ago. Wooled sl. lambs steady to $2 lower. Choice 60-110 lbs. 63.00-72.50, Good 50-100 lbs. 55.00-65.00. Slaughter ewes 15.00-40.00.

Figure it for yourself.

When you shortchange their nutrition, you shortchange yourself.

Looking for ways to cut on down on out-of-pocket feed costs without cutting down on milk production?

Cutting production costs will backfire if you end up shortchanging your herd's nutrition in the process.

But you can cut those costs safely by feeding homegrown grains and grain silage fortified with the right Vigortone Dairy Pre-Mix. These potent pre-mixes contain the proper levels of vitamins, calcium, phosphorus, and other minerals needed to balance your farm's feedstuffs.

Vigortone Dairy Pre-Mixes can be mixed in or metered on any palatable grain or roughage. This lets you change ration content to fit the supplies you have on hand without risking herd performance.

Better herd nutrition means a bigger milk check. Minimum out-of-pocket feed costs mean more in your pocket.

Your figures will prove it.

Dry cow nutrition pays future profits.

Shortchanging your dry cow's nutrition can be risky too. Most problems dairymen experience in getting cows back in the string can be traced to careless treatment during the dry period.

Keep them in top condition until their next lactation. To help you do it, Vigortone has developed unique dairy pre-mixes specially concentrated for dry cow rations.

Now is the time to compare.

See your Vigortone dealer soon. He's ready to compare the performance of Vigortone's cost-saving dairy feeding programs with any other you name.

Regional soybean growers to meet February 14

OCEAN CITY, Md. — Results of production research to increase soybean profits and a look at soybean markets for the coming year will be featured topics of discussion at the 14th Delmarva Soybean meeting held in cooperation with the Mid-Atlantic Soybean Association annual meeting at Convention Hall in Ocean City on February 14.

The meeting, which gets underway at 8:30 a.m. with registration and time to visit exhibits of seed and chemical suppliers, is open to all soybean growers in Maryland, Delaware, New Jersey, and Pennsylvania.

Kenneth L Bader, chief executive officer of the American Soybean Association in St. Louis, will be the keynote speaker during the afternoon session.

In addition to reviewing current ASA research and market development activities, Bader will report to soybean producers on initatives made by the American Soybean Association to soften the blow of the recent embargo on Soviet grain and soybean purchases.

Other speakers on the day long program include James Durphey of North Carolina State University who will discuss soybea row spacing and planting interaction; Dale Hathaway, Undersecretary of Agriculture for International Affairs and Commodity Development who will speak on the future of world soybean trade; and a joint presentation by Lee Hellman of the University of Maryland and Henry Wilson of Virginia Truck and Ornamentals Research Station on agricultural chemicals for weed and insect control.

Following a luncheon and additional time to visit exhibits, soybean growers will hear a representative of the Maryland Crop Improvement Association discuss the Maryland Soybean Checkoff and what it means to soybean producers.

"Watch Your LD 50" will be the topic of discussion for Ron Jester of the University of Delaware and Gary Smith of the University of Maryland.

The production information program will conclude by 3:30 p.m. at which time the Mid-Atlantic Soybean Association will hold a short business meeting chaired by Mid-Atlantic Soybean Association President William Bradley of Salisbury, Maryland.

For more information about the Mid-Atlantic Soybean Association annual meeting contact Bill Henderson, Secretary, 103 Linden Avenue, Georgetown, Delaware 19947, phone - 302/856-2155.

Livestock market and auction news

Belleville Auction

Wednesday, January 23

STEERS: Standard to Good Holsteins 58.35-60.35.

HEIFERS: Good to Choice a few 56.00-58.25.

FEEDER STEERS: Standard to Good a few 60.50-84.50.

BULLS: 56.50-58.75.

COWS: Commercial a few 53.00-55.00. Good to Standard 49.50-53.00. Utility 47.50-50.50. Cutters 46.00-48.00. Canners down to 41.50.

CALVES: High to Choice 91.00-116.00. Good to Choice 70.00-90.00. Standard to Good 60.00-72.00. Heifer Calves - 175.00-240.00. Bull Calves 97.00-126.00.

HOGS: 37.85-39.10. Light hogs 33.00-36.00.

FEEDER PIGS: 15-25 lbs. 8.00-14.50 per hd.; 25-40 lbs. 15.00-29.00 per hd.

SOWS: 23.75-32.00.

BOARS: 22.00-30.00.

SHEEP: Lambs 64.00-75.00, ewes 32.00-44.00.

Special Markets

Special Feeder Pig Sale
Harrisonburg, Va.
Tuesday, January 22

There were 1,101 head sold. All pigs were graded by Representatives of the VDACS's Division of Markets, Livestock Section on USDA standards and sold by the hundredweight.

US 1-2's: 30-49 lbs. 52.00-55.00; 50-69 lbs. 50.00-50.50; 70-99 lbs. 42.00-43.50.

US 3's: 30-49 lbs. 40.50-51.00; 50-69 lbs. 46.50-48.00; 70-99 lbs. 39.50-45.00.

Utility: 30-49 lbs. 37.00-39.50.

US 4's: 30-49 lbs. 27.00-30.00.

Madison Mills, Va.
Tuesday, January 22

There were 756 head sold. All pigs were graded by Representatives of the VDACS's Division of Markets, Livestock Section on USDA standards and sold by the hundredweight.

US 1-2's: 30-49 lbs. 56.00-61.50; 50-69 lbs. 49.50-55.00; 70-99 lbs. 38.00-45.00; 100-130 lbs. 39.00.

US 3's: 30-49 lbs. 49.00-57.50; 50-69 lbs. 40.00-52.50; 70-99 lbs. 30.00-43.00; 100-130 lbs. 39.00.

Utility: 30-49 lbs. 49.50; 50-69 lbs. 42.00.

US 4's: 30-49 lbs. 45.00-49.50; 50-69 lbs. 42.00; 70-99 lbs. 33.00.

New Holland, Pa.
Wednesday, January 23

Reported receipts of 116 cows, 130 heifers, and 11 bulls. Market steady.

Load out of PA fresh 800.00-1230.00; NY fresh 1175.00-1675.00, springers 1325.00-1575.00; load of PA fresh 790.000-1250.00; PA fresh 1090.00-1600.00; PA fresh 940.00-1600.00; 32 head all stages 540.00-1300.

Farmers association holds legal meeting

WILLOW STREET — The womens committee of the Lancaster County Farmers' Association sponsored a legal guidelines seminar for farm families here Wednesday.

Richard Dennison of the Pennsylvania Farmers Association legal service was the speaker.

Eighty-four farm folks attended the meeting.

Many farm families have been asking for more information and help with legal questions and legal problems.

The major financial planning problems facing Lancaster County farmers these days are estate planning, personal finance, property rights, land use and land development, zoning, tax-free exchanges, gifts, leases and so forth.

These, plus many other questions which the members raised, were discussed at the meeting.

Dennison enlightened the audience how PFA's legal service can help and has been working to assist farm families with their legal problems.

The service, which began in 1976, is the first legal service for farm families in the United States.

The legal guidelines service is designed as a pioneer educational program. It proposes to help the farm family learn about its legal rights and legal opportunities.

The program will study general legal principles but it will also offer practical answers to everyday questions.

Field trials proved it...

the Improved Agway Veal Feeding Program is another Winner

The feeding trials involved more than 400 calves at three separate facilities managed by experienced, commercial veal growers All of the calves received Agway Veal Pre-Starter From there, half of the calves were fed improved Agway Veal Starter and Finisher The other half were fed original formula Veal Starter and Finisher

The results? Agway animal nutritionists and researchers have made a good thing better! From start to finish at about 325 pounds, the improved formulas won hands down

Calves fed improved Starter and Finisher showed an average daily gain of 2 28 pounds per animal per day with a feed conversion rate of 1 64 pounds of feed per pound of gain

Agway Veal Pre-Starter, Starter and Finisher are made from quality ingredients From top quality protein, 100% derived from milk products From 100% animal fat Because Agway knows that protein quality and fat source are the keys to top performance

Every grower knows that prime veal depends on the quality and vigor of the calves, proper housing, feeding, management and sanitation Do all of them right and the improved Agway Veal Feeding Program can do a superior job for you

For more information on the Agway Veal Feeding Program, call your local Agway.

Ask the VMD

Leon Riegel Tim Trayer Edgar Sheaffer

Are parasites bugging my cows?

A reader asks: We are planning to worm our cattle. With so many products on the market, what should we look for in a worming medicine? It is best to worm the cattle in the feed, by bollus, or tube them? Without a lab check, a there any way to know if the animals are infested? What parasites normally affect cattle?

Dr. Sheaffer comments: It's good you're concerned about internal parasites in your cattle.

Withour modern husbandry practices of concentrating many cattle on small pastures or feedlots, numbers of parasites can build up to a harmful level quite rapidly.

You did not mention if you have a beef or dairy herd. This will determine somewhat the type of worm medication that you will use.

Many wormers have restrictions on age, pregnancy and lactation. For example, if you use thiabendazole, which is usually readily available from veterinarians and other suppliers, on lactating dairy cows, you must discard the milk for eight milkings after dosing.

There is at least one other product on the market that can be used with the feed on lactating cows without discarding the milk, such as organo phosphate products.

This type of worm medication doesn't seem to be detected in the milk, but the effectiveness of the product as a wormer is not certain. It is used especially in herds where the greatest percentage of cows are infested very heavily, and the dairyman can't afford to discard all of his milk for eight milkings.

The organo phosphates are sprinkled lightly on the feed for five days. In a heavily infested cow herd, 30-40 per cent of the parasites may be treated which is some help.

I generally recommend that the dairyman wait until the cow is dry and then treat her individually with thiabendazole. If your herd consists of pregnant cows and heifers, only certain medications are safe to administer. Always carefully read and follow the label directions. If you have any doubt about a specific medication, consult your veterinarian.

The method of worming that is best is the one that works best in your particular housing situation. Ideally, each animal should be caught up in a chute or headgate, and given the proper dosage for its size and weight.

Oral boluses, oral paste or injectable wormer can be used on an individual basis.

Some of our clients do not have adequate restraint facilities so that using pellets on the feed is best for them. If you plan to mix wormer with the feed, make sure that it is safe, palatable, and properly mixed. Your veterinarian can help you calculate how much wormer should be mixed with the amount of feed your cattle will eat in one meal.

Fecal exams for internal parasites are routinely performed at least three types of facilities in our area.

First, most veterinary hospitals perform both smears and flotations on fresh cow manure samples submitted by farmers.

Secondly, state diagnostic laboratories do the above plus certain special techniques for difficult to detect species of worms.

Thirdly, institutions like Penn State and the U. of Pennsylvania School of Veterinary Medicine, at Kennett Square, can run both routine fecals and special techniques.

The tests are designed to locate and identify parasite eggs, called ova, and/or larval forms of the parasite.

For good parasite control, you should have laboratory work done at least three times each year. If your cattle are concentrated in a relatively small area, more frequent fecals may be necessary. Costs for each exam can range from about $2 to $10, depending on techniques needed.

Next week, we will discuss the various species of internal parasites in cattle.

If you have a question you would like to have answered by the team of doctors at Valley Animal Hospital, send it to Ask the VMD, Box 366, Lititz, PA 17543.

Government announces poultry price plan

WASHINGTON, D.C. — The Department of Agriculture announced Saturday a program to provide more chicken for donations to hospitals, nursing homes and other institutions, and to remove price-depressing supplies of poultry from domestic markets.

Carol Tucker Foreman, Assistant Secretary of Agriculture for Food and Consumer Services, said the action is being taken because contracts for poultry exports to the Soviet Union could not be fulfilled as a result of the President's suspension of trade with that country on January 4.

The action announced today has two parts. First, the Department will invite bids this next week for a supply of whole frozen chicken, at least equivalent to that which had already been packaged for shipment to the Soviet Union

This action is being taken under the authority of Section 32 of Public Law 320, which provides that perishable commodities that cannot be sold by producers at reasonable prices may be purchased by the government for use in food assistance programs

"By making these purchases, we hope to improve the market demand and eliminate excess supplies caused by the trade suspension.

"President Carter has said actions will be taken, not to guarantee profits for exporters, but to prevent catastrophic losses by producers. We think that by making additional purchases of poultry above what we normally would have purchased for our programs, we can help maintain reasonable prices for poultry products," Foreman said.

Second, the Department will increase its regular purchases of poultry (under Section 6 of the National School Lunch Act) to help absorb the extra supply which may have been generated to fill the Soviet contract.

Chicken will be purchased in frozen, cut-up or cooked, breaded form for use in the school lunch program.

Foreman said, "Chicken has been one of the most popular commodities in our school and other feeding programs. We are confident that the poultry will be well used, and that the poultry industry will be protected from devastating losses"

TRACTOR SAFETY HINT

Shield moving parts

Never remove the shields provided by the manufacturer. They could save your neck. Always stop the car or engine before you climb down. Also shut off the p.t.o. before dismounting. All moving parts are dangerous. Don't wear loose clothing. Don't go for this kind of a spin.

Pork Council directors ask percentage checkoff plan

DES MOINES, IA — The National Pork Producers Council's board of directors has voted unanimously to recommend that the group's delegate body change the present 10 cent per market hog checkoff rate to a percentage of market value.

The proposal, approved by the board Thursday, calls for checkoff of three-tenths of one percent of the market value of each animal marketed. The delegates will be meeting March 5 and 6 at the American Pork Congress in St. Louis.

Approval of the plan would mean that the increase would be implemented by January 1, 1981. A request for change in the checkoff was recommended by NPPC delegates at their 1979 session in Indianapolis.

NPPC President Bill Buller, Brookings, SD, will be naming a five-member allocation under the new proposal.

The checkoff funds, through a voluntary producer program, are allocated among Council member states, the National Council and National Live Stock and Meat Board.

The current 10 cent checkoff rate has been in effect since 1976, and in 1979 meant total funding of $4.3 million for industry programs in a number of areas.

Roy Sharp, Tulare, CA, chairman of the Council's Planning and Resolutions Committee which has worked for several months on the proposal, explains the the present checkoff rate fails to reflect inflation and requires periodic adjustment.

Council directors earlier in the week had approved a special incentive funding program for states recommended by Sharp's committee in conjunction with NPPC's special 'Market Blitz' campaign for increasing percentage of checkoff numbers.

"However," Sharp explains, "this program is but a short-term approach to the funding needs of states with growing responsibilities to serve its membership and the pork industry."

"The recommended funding increase proposal to be considered by delegates in St. Louis should be a big boost for our pork councils, within the states and at the national level," adds NPPC President Buller.

"It should help us all attain our goals of improving the quality, production and distribution of our pork and pork products and of increasing demand for our quality pork products," he said.

Now Is The Time

Continued from A10

The results of this study suggests that dairymen should continue to breed their heifers to calve by 24 months of age.

To Utilize Existing Buildings

Along the lines of expansion or remodeling the farming business, the decision often comes up relating to the construction of a new building, or the remodeling of an existing structure. I'd like to point out the importance of using present buildings when possible. Construction costs are very high and in this part of the state, current buildings are very well built and can be changed into some very good quarters for many types of livestock. In addition, new structures can more easily change the tax assessment values, as compared to remodeling existing buildings. Time spent in observing similar production units and in making plans on paper should precede any actual construction work.

Farm Talk

Jerry Webb

1980 looks like a year of financial adversity and general uncertainty for Delmarva farmers.

Current political events have thrown the grain markets into a frenzy and at the same time the inflationary squeeze goes on.

Some farmers found 1979 a less-than-excellent year, and already they're looking at 1980 as a potential disaster.

Almost everything a farmer needs to make a crop is up in price. Fuel costs continue to climb with no end in sight.

The experts are predicting fertilizer as much as 20 percent higher than last year. Seed, pesticides, and almost everything else that's part of the production process is going to cost more.

And the income potential from corn and soybeans is uncertain, if not downright shaky.

We had record production in '79 and huge carryovers for a number of crops. Now the change in the export market makes it sound as though we're going to be back into the bin-busting surplus position of the early sixties.

One economic observer thinks our corn situation may be very close to the record surplus year of 1961. If that's the case, farm prices are going to be down regardless of what the Carter administration does.

So a farmer who found 1979 to be a difficult year may find 1980 to be almost impossible.

This could be a year to cut back, to give up overpriced rented acres, to postpone new equipment purchases regardless of their tax advantage and to spend carefully for fertilizer, chemicals, and other variable imputs

A farmer who's using borrowed money to rent overpriced acres doesn't have much of a chance to start with Add to that the staggering costs of production and there may not be any profit left.

There really isn't much point in farming hundreds of rented acres if they're not going to return a profit. And the odds are pretty good that if the profit margin was narrow for '79, it will be nonexistent this year.

In fact, this could be the year of some sizable financial losses for grain farmers. If it is, the fellows with the most rented acres and the most borrowed money will be the worst hurt.

Farmers tend to measure their size of business in acres. They're too modest to talk gross earnings or profits, and so land oriented that they see acres farmed as the best measure of a man's farming business. And so many of them push themselves into impossible rental deals so they can become bigger farmers.

Maybe it's time for some of them to look at the records of others who till large acreages to see where the profits really are. The apperance of prosperity that goes along with a 1200-acre operation may be an illusion.

In fact, the guy with 3 or 4 hundred well-managed productive acres located close to home may wind up doing better, particularly this year

There are many successful farmers who till small acreages--virtual garden plots when considered alongside some of the larger Delmarva farms But that's not to say these operations aren't successful

If you doubt that, consider the newest list of master farmers reported in the current issue of Pennsylvania Farmer magazine These are the best, all-around farmers out of the hundreds of nominations received And their holdings vary from a 2500-acre sheep and beef cow operation in West Virginia, to an 18-acre vegetable farm in Bucks County, Pennsylvania.

And while those master farmer stories don't give detailed financial information, you can bet the guy with 18 acres, who grew a quarter-of-a-million pansies last year, is doing as well as the West Virginia stockman with 200 beef cows and 300 ewes.

Pansies may not be a future crop for every Delmarva farmer, but they point out the possibility for other things to grow on a small acreage besides corn and soybeans.

And if growing those two crops despite their ready local market means losing money, then it doesn't make much sense to grow them.

The next few weeks should be a time of decision making, a time to look hard at last year's numbers and project them into the troubled eighties to see if there are still some bucks to be made Overpriced rented land might be the quickest way to get out of a no-win situation

PENNSYLVANIA AGRICULTURE

WE'RE GROWING BETTER

Virginville Grange meets

Richard Kieffer, legislative chairman of the Virginville Grange, asked members to write to their United States Representatives to support returning prayer and Bible reading to the schools.

It was announced that National Grange Cookbooks are for sale for $6.00, and the junior members reported that they have napkins and cards for sale. The youth also presented the Grange with a softball trophy.

The Virginville Grange voted to go to the Folk Festival.

Members were reminded that it's dues time for 1980, at $1.00 per member.

The theme for the meeting was "Ringing in the New Year". Dorothy Miller read "If you have a Gift," and New Year's resolutions were read in Pennsylvania Dutch by Lillian Mengel and Arlan Seidel. Kim Stump read the poem "Today," and Carline Blatt read "Twas the Night Before New Year."

The two meetings in February will be brothers and sisters night.

Letters To The Editor

I was happy to read the comment in your editorial about the military budget and high priced generals.

I teach in our local high school and am a week-end farmer on my 123 acre farm. I pay over $2000 in income taxes. Over one-half of this is used for defense and for interest for past wars

I believe that all of us need to work for peace. We can do this by trying to understand how other people feel who are affected by our foreign policy. For example, the Iranian students.

Trying to understand the benefits of trade with Russia and all other countries. For example, I believe that Russians paid for some grain with gold, and as a trade for gas and oil. Since Russia sells over one million barrels of oil to the free world we are following a self-defeating course by withholding the best equipment and technology.

Publicizing the terrible waste of the defense department. For example, the Air Force alone, uses more than one-half as much fuel as all the country's commercial airlines.

Thank you for an excellent paper.

David B. Kruger
Route 4
Lebanon

You can sure that no two people will ever completely agree on a certain subject. Luckily we are in a country where we are free to express our opinions.

About a month ago someone thought that our township should have a vacuum to collect everyones leaves I was opposed to this idea because I thought it would waste vast amounts of tax dollars and energy. It put my leaves on the garden to be plowed under. Even in town neighbors that don't want leaves could give the leaves to neighbors with garden patches.

Shortly after I wrote our local paper expressing my opinions we had about two inches of snow. While the snow was still on the ground a man in his seventies called jokingly to inform me that I wouldn't have to worry about the leaves since it had snowed. It was then that I wished I had saved the Rural Route concerning shoveling snow so the leaves could be raked. I am sure this gentleman would have enjoyed it.

Last fall my brother-in-law was working for a local orchard. He would come home with car load after car load of apples which he could gather off the ground at no charge. We were almost knee deep in apple peels and about that time Tom Armstrong wrote a comic strip about apple season. The farmers wife is telling the farmer about all the apple dishes to be served for supper. He is shown heading for the barn, axe in hand, saying apple season or no apple season some chicken is going to have an accident between now and supper. We all enjoyed that comic strip as it really hit home.

I do enjoy Tom Armstrong's Rural Route even though many strips don't apply to myself or family. In these trying times it is nice to be able to laugh at oneself and with others. I will continue to look forward to the arrival of Lancaster Farming on the weekend.

BIG FARM POWER AND EQUIPMENT

THE UNBEATABLE TEAM

STEIGER® TRACTORS &
KRAUSE DISCS

PUT THE TWO TOGETHER AND FIND FOR YOURSELF THE
DEPENDABILITY AND PRODUCTIVITY OUR CUSTOMERS
ARE TALKING ABOUT IN:

STEIGER TRACTORS:
- ★ Dependable power to spare with high-torque engine.
- ★ Ease of service with open-under design.
- ★ Comfortable & quiet cab.
- ★ Amazing fuel economy.
- ★ Ground speeds for every operation with 20 speeds-forward.

KRAUSE DISCS:
- ★ Excellent penetration in stubble or corn residue.
- ★ Flexibility in extreme rocky conditions saves blade and gang damage.
- ★ Superior levelling in final seed-bed preparation.
- ★ Ease of servicing with nuts on both ends of tie-rods.

Stop by any time and line up a spring demonstration.

Trina tops Dauphin Co.'s fat record

HARRISBURG — Dauphin County's top dairy cow in milkfat production during last month's 305 day lactation record was Harold M Nissley's Trina

Trina, one his herd's top Holsteins, turned in a record of 916 pounds of fat, with a milk production of 20,249 pounds Her production record ranked fifth in the county among cows with records over 500 pounds fat

The county's high milk production cow came from the J Richard Alwine herd Dawn, a seven-year-old Holstein, milked 24,078 pounds during her record Her fat production was in the top five, with 787 pounds

Of the 69 cows completing the record with fat production levels greater than 500 pounds, one cow topped the 900 pound mark, one cow went over 800 pounds, twelve cows made between 700 and 800 pounds of fat, twenty-one made over 600 pounds, and 34 cows were over 500 pound limit

In milkfat production, the top five farms in Dauphin County were 1 Robert J Schaffer, 2 05 pounds, 2 Restful Acres, 1 79 pounds, 3 Earl Campbell, 1 76 pounds, 4 Lytle Farms Inc , 1 75 pounds, and 5 Catalpa Farms, 1 71 pounds

Beil's adds hay auction

YORK SPRINGS — This Friday will mark the grand opening of a new auction at Beil's Sales, located one mile north of York Springs along Rt. 15.

Dave Martin, auctioneer, announced a new hay auction will be held starting this Friday and will continue each week thereafter.

"We decided to have a hay auction for the convenience of the farmers in the Adams-York County area," noted Martin. "With the high cost of fuel and the amount of man power needed to sell and deliver the hay to other markets, we feel this sale will be an energy saver to local farmers."

Martin explained the hay auction would start each Friday at 1.30 p.m. Hay, straw, ear corn, wood, and fodder will be auctioned off each week

This sale will be prior to the traditional horse auction at Beil's, held every Friday at 7 p m

Franklin County Holstein Club emphas

BY RUTH ANN BENEDICT
Staff Correspondent

CHAMBERSBURG — "We are building a foundation with our youngsters

"Stand back and look at the situation. You can see more. This goes for things in all of your life."

These were the words that John L. Morris, retired Extension Dairy Specialist of 26 years from the University of Maryland, had for some 150 people at the Franklin County Holstein Club Banquet last Tuesday.

Morris was the guest speaker at the Holstein Club's annual banquet held here in Chambersburg at the Franklin County Vo-Tech School.

Morris, who is very interested in the "development of young people", focused his speech on the young person.

"Let's help these youngsters grow tall Help them get started with a 4-H club project and learn to keep records.I know it takes time but it is important" said Morris.

Morris went on to say that so many parents do not want to share responsibilities with their youngsters.

"Many parents do not know what their children can do because they do not let them try. They may not do a good job at first but they need experience."

Morris, who has taken 26 dairy judging teams from the University of Maryland to the National Judging Contest, also spoke of his work with youth judging teams.

"You get thrills your youngsters along" stated Morri

Morris said he ha a lot by sitting on box and talking to pe he feels that you hav young when worki young people.

"You can not do t things over and ove You must chang

Franklin County Dairy Princess Carolyn Meyers, R1 Greencastle, addressed a group of dairymen and their families recently at the Franklin County Holstein Club Banquet.

These club members were recognized by the Franklin County Junior Holstein Club recently. Steve Eckstine, left, Paul and Debbie Cashell, all received Distinguished Project Awards. Also Steve Eckstine, and Roger Crider, far left, received Production Record Awards. Guest speaker for the Franklin County Holstein Club Banquet was John L. Morris, second from right.

work with youth on the judgıng teams.

"You get thrills watchıng your youngsters develop along" stated Morrıs.

Morrıs said he has learned a lot by sittıng on the show box and talkıng to people and he feels that you have to stay young when workıng with young people.

"You can not do the same thıngs over and over again. You must change your techniques to make youngsters work hard" he said.

Other guests at the banquet program were Wılliam C Nıchol, Executıve Secretary of the Pennsylvanıa Holstein Association and Franklın County Dairy Princess Carolyn Meyers

Toastmaster for the event was Holstein Club President Stanley Burkholder, R1 Chambersburg.

Norman Sollenberger, R3 Fayetteville, Chairman ot the Awards Committee, presented trophies to outstanding club members Trophies went to: Wayne H. Locke of Lockway Farms, Lemar Rd Mercersburg, Grand Champion Holstein at the 1979 Franklın County Holstein Show; Rodney Meyers, R2 Chambersburg, Jr. All Pennsylvanıa Sr Calf and All Pennsylvanıa Sr. Calf 1979, and Thomas Eckstıne, R2 Mercersburg, Jr All Pennsylvanıa Jr Calf 1979

Sollenberger also recognized these outstandıng Holstein owners: Carl Stuff, hıgh ındıvidual regıstered cow record for fat 1979, Mel-Aire Ivanhoe Ken Maple with 28,130 pounds of milk, 1041 pounds fat; Carl E. Pugh and Son, hıgh ındıvidual regıstered cow record for mılk 1979, Mae-Car AB Seaman Bell wıth 28,883 pounds of mılk, 974 pounds of fat.

The 1979 Franklın County Holstein Show wınners were also recognized as: Grand Champıon and Reserve Champıon - Lockway Farms, Lemar Rd., Mercersburg; Premıer Breeder - Rowe-Spring Farms, Raymond Helman and Son, R2 Chambersburg; Premıer Exhibitor - Lockway Farms, Lemar Rd., Mercersburg.

New Owner Breeder Excellents ın 1979 were announced. They are T. K. Nitterhouse (new dispersed) wıth three new excellents; Harold F. Crıder, Wayne Hall and Robert & Paul Eckstıne, all wıth one new excellent cow.

Dairy conference scheduled

UNIVERSITY PARK — Nutrıtional management of the dairy herd and efficıent ways to raise replacements will be featured at the Dairy Herd Management Conference scheduled for March ɔ-7 on Penn State's maın campus.

Lawrence Specht, Extensıon dairy specialıst, points out that the conference will start at 1 p.m. on March 6 and end at noon the second day. Sessions will be held in the University's J.O. Keller Building.

Conference registration forms are available in all county Cooperative Extension Service Offices. Advance regıstratıon should be made by February 27. Fınal registration will be held at 11 a.m. on March 6.

Specht notes fırst-day program topıcs will center on dairy herd nutrıtion. Topıcs and speakers are:

Total Mıxed Rations by Darwın Braund, of Agway, Inc.

Hıgh Moısture Corn by Larry Chase, of the Cornell Unıversity Department of Anımal Scıence.

Selenıum Needs by Richard Adams, of the Penn State Department of Dairy and Anımal Science.

Nutrıtional Management of the Dairy Herd by Doyle Waybrıght, Adams County dairyman.

Computers and the Dairy Herd in the 1980's by John Speicher, of the Michıgan State University Department of Dairy Scıence.

March 7 topıcs will focus on dairy herd replacements. Topıcs and speakers are:

Nutrıtion of Replacements by Richard Warner, of the Cornell Unıversity Department of Anımal Science.

Health by C.S. Card, of the Penn State Veterınary Scıence Department.

Housing by Robert Appleman, of the University of Mınnesota Department of Anımal Scıence.

Economics of Raising, Buyıng or Leasıng by John Speıcher, of Michigan State University.

A conference registration fee includes all costs of ınstruction, ınstructional materials, and banquet, Specht points out.

The Franklin County Holstein Club gave awards to these outstanding people: left to right, Wayne Locke, Mercersburg; Rodney Meyers, R2 Chambersburg; and Thomas Eckstine, R2 Mercersburg.

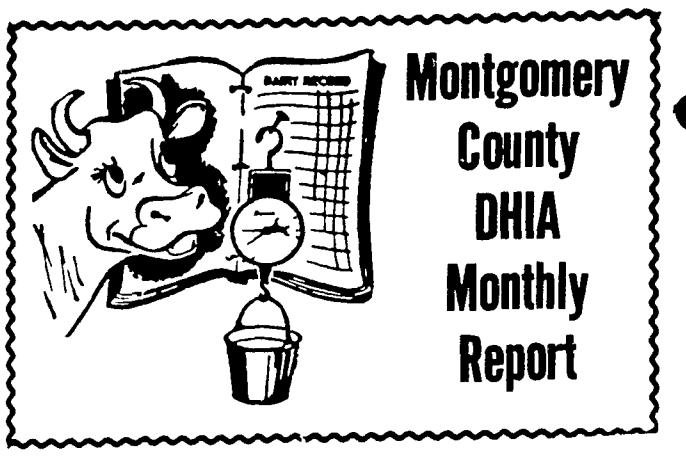
Mowrer Cow tops Montgomery Co.



NORRISTOWN — S Horace Mowrer & Son's farm turned in the high milkfat record for the Montgomery County DHIA record last month

With a 305 day lactation record of 920 pounds fat, their eight year old Holstein 39 A topped the county's honor roll This cow milked 24,279 pounds, the highest production record in the Mowrer herd

Maxine and Mollie, two Holsteins in the David P Longacre herd, turned in high milk production statistics Four year old Maxine gave the top county production record, making 26,410 pounds with 662 pounds fat Mollie was not far behind her stable mate, giving 26,288 pounds milk and 879 pounds fat

Out of the 123 cows completing the record with over 500 pounds fat, one cow surpassed the 900 pounds mark, five cows were over 800 pounds, seventeen cows made over 700 pounds, forty-four cows were greater than 600 pounds, and fifty six made over 500 pounds fat

Charles Rhoads' record for 37 3 cows was the county high for pounds of fat with 1 79 David P Longacre's record for 92 7 cows was next to the top with 1 78 pounds of milk fat

Lancaster-York veg growers hold annual gathering

BY PATTY GREEK
Staff Correspondent

YORK — Horticulture has become a fast growing industry and Lancaster and York Counties are no exception. The annual Lancaster-York Vegetable Growers Meeting was held January 16, 1980 at Avalong Banquet Room from 9 a.m. to 3 p.m.

Discussion throughout the course of the day ranged from new varieties of hybrid plants and mulches to pest and how to exterminate them.

A new type of biodegradable mulch has been discovered. This mulch is called Ecolyte which means it "ecologically breaks down in sunlight."

Ecolyte is made in Ontario, Canada and a four foot wide by 3000 ft. roll costs $120. This may sound expensive, but if you think about it, it's not, growers were told.

Regular plastic, has to be picked up after the growing season. With the Ecolyte, recovery cost is saved since it is a biodegradable mulch.

A panel consisting of two York and one Lancaster County Vegetable Farmers discussed the problems they had in raising their crops in 1979. York County Extension Agent John Smith acted as moderator.

All agreed the main problem of the 1979 growing season was the weather.

Strawberries, even green ones rotted because of the wet weather. Lima beans all across the US were for the most part a failure this year because of weather conditions.

In this area, cantaloupes had a poor year. The blossoms didn't get a change to set fruit because of washing rains. The first sweet corn plants seemed to have a good start.

Then a bad storm with extremely heavy rains and hail passed through the area. That about did most of the sweet corn in.

There are many diseases and insects that can effect your vegetables. If a grower knows what to look for and what to use to cure it, that's half the battle.

Bacterial specks on tomatoes can be treated with TBCS (a copper fungicide) mixed with M45 to give the best results. On snap beans, Benlate gives good results for White Mold.

Cabbage can be infected with many different kinds of pests. The imported cabbage worm leaves ragged eating of the leaves. Cabbage loopers leave large holes in the leaves as it chews them up.

Either one of these two pests can be treated with a variety of different pesticides including Lanate, Dipel, and Moniter.

Aphids are another serious problem in vegetables. Being asexual, aphids reproduce very rapidly. They are also serious in the fact that they transmit viruses from plant to plant. They should be treated with Methomyl Dipel.

In sweet corn, the European corn borer can be well protected in the stalk and gradually eat away at the corn plant.

The corn ear worm is the worm that appears right in the kernel of the corn. Both can be treated with many pesticides including Penncap-M, Sevin, Lanate, and methyl parathon.

A new variety of Strawberries has been developed. This new strain, called the Scot variety, is considered quite good by many strawberry growers. They like it for its extra flavor firmness, and color.

After the general meeting was adjourned, York County Growers met for a few minutes to elect three new directors.

Voted to the posts were: Benjamin Wineka, Heil Markey, and John Fitz. These three men will now join the other directors in helping to run the York County Growers.

Alcohol for fuel meeting slated for Jan. 31

LEBANON — A free, public meeting on alcohol for fuel production will be held on Thursday, January 31st at 10:00 A.M. in Room 12 of the Lebanon County Municipal Building, 400 South 8th Street, Lebanon, Pa.

This meeting, sponsored by the Lebanon County Rural Development Committee, is being held to discuss the principals of alcohol production and needed safety consideration.

Dr. James Garthe, Penn State University Agricultural Engineer, Dan Cook, representing the State Gasohol Commission, and Morton Fry, Lancaster County farmer and nurseryman, will discuss various principals and techniques of alcohol production for fuel use

Karl Hellerick, Soil Conservation Service, Chairman of the Lebanon Rural Development Committee, explained this is a theory type meeting. Instructions on setting up and operating stills will not be given.

However, manufacturers and distributors of stills are invited to distribute literature at this meeting

Hellerick concluded we will try to present basic information to the farmer so that he can make a decision whether or not to produce some of his own fuel from his own farm grown grain or wood products.

Franklin County

(Continued from Page A21)

BAA percent of 102 or higher were: Robert & Paul Eckstine, 105.1; Wayne Hall, 104.4; Harold F. Crider, 104.3; Kenneth Mellot, 104.2; James & Nina Burdette, 103.8; Alvin Meyers, 102.3; Marvin Zimmerman, 102.3; H. Robert Mumma, 102.1; and Alfred & Helen Miller, 102.0.

James Burdette, advisor to the Franklin County Jr. Holstein Club, presented awards to outstanding junior members.

Awards went to: Steve Eckstine, R2 Mercersburg, high 2 Year Old Production Record with 16,943 pounds milk, 663 pounds fat and a 3.9 test; Roger Crider, R5 Chambersburg, high 3 Year Old Production Record with 16,468 pounds of milk, 637 pounds of fat and a 3 9 test; Debbie Cashell, R6 Chambersburg, Distinquished Junior Girl Project Book; Steve Eckstine, R2 Mercersburg, Distinguished Junior Boy Project Book; and Paul Cashell, R6 Chambersburg, Distinguished Senior Boy Project Book.

Directors re-elected to the Holstein Club Board of Directors were Stanley Burkholder, Fred E. Rice and Wayne Hall.

Roy Cordell was a new Director elected to the Board.

George Cashell brought before the group of club members suggestions for selecting the All Pennsylvania Holstein Awards. Cashell along with others in Franklin County are opposing the new system for selecting the All Pennsylvania Awards and feel the old system should be reinstated with some changes

The Holstein Club voted to have Cashell's suggestions taken to the State Holstein Convention on February 21, 22, 23

Also during the program committee reports were given Reports were presented by Theodore Small, Audit Committee report, Clarence Stouffer, Nominating Committee report; James Burdette, Junior Members report; Robert Eckstine, Sale Committee report; Harold F. Crider, State Director's report; Philip Wagner, County Agent, Franklin County Dairy Promotion Committee report.

Franklin County Holstein Club Officers are: Stanley Burkholder, President; Fred E. Rice, V. President; Norman Sollenberger, Secretary/Treasurer; Harold F. Crider, State Director.

Directors to the Holstein Club are: James Burdette, R1 Mercersburg; Stanley Burkholder, R1 Chambersburg; Harold F. Crider, R5 Chambersburg; Paul R. Gsell, R5 Chambersburg; Wayne Hall, Star Route 1, Shippensburg; William Ile, R1 Newburg; Robert Mumma, Box 24, Dry Run; Fred E. Rice, R5 Chambersburg; Theodore Small, R1 Chambersburg; Norman Sollenberger, R3 Fayetteville; Clarence Stouffer, R1 Mercersburg; and Roy Cordell, R5 Chambersburg.

Paul Eckstine, R2 Mercersburg is the only retiring Director.

Junior Holstein Club Officers are: Winston Cordell, President; Arlan Crider, V President; Maryanne Johnson, Secretary; Paul Cashell, Treasurer; and Debbie Cashell and Steve Eckstine, News Reporters.

Junior Club Directors and Mike Cordell, Kelly Cordell, Rodney Crider and Rodney Meyers.

Junior Club Advisors are James Burdette-Chairman, Fred E Rice and Stanley Burkholder

AGWAY

ANNOUNCING NEW
MILK GUARD PROTECTION
BY AGWAY

Dear Dairy Farmer,

Agway has designed a new maintenance program for your complete milking system to insure your energy savings, top performance, and a drastic cut-back on costly repair bills. The name of this new maintenance program is — — — MILK GUARD PROTECTION!

You ask, "What is MILK GUARD PROTECTION?" It is your opportunity for a complete milking system maintenance check-up affording you top efficiency on a regular basis.

We, here at the Agway Service Department, have assigned one of our trained Service Technicians to provide you our MILK GUARD PROTECTION program.

Just tear off the bottom section of this letter and mail to Agway or call me collect at 717-394-0541 and we will be happy to perform MILK GUARD PROTECTION on your complete milking system.

Serviceably yours,
Ed Koncle

Ag Department to conduct town meeting in Manheim

MANHEIM — Pennsylvania Agriculture Deputy Secretary E. Chester Heim will be attending a "town meeting" luncheon at 11 30 on Thursday, January 31 at Encks Baron Stiegel Family Restaurant, 168 South Main Street, Manheim

The town meeting format is a question and answer exchange between those who attend and Deputy Secretary Heim. The Agriculture Department's Regional Director C. Eugene Wingert will host the program.

"This is an opportunity for Pennsylvanians to express their views and question a state official," said Heim. 'I look forward to discussing agricultural issues and other topcis of interest with the citizens of southcentral Pennsylvania.

"Just last month Governor Thornburgh and the citizens of Lancaster had a very informative town meeting. The town meeting concept advocated by Governor Thornburgh aims at improving state government by promoting a dialogue between state officials and citizens of the Commonwealth."

Heim will be speaking on a wide range of agricultural issues that are important to farmers and others living in rural communities

Topics open to discussion include farm family preservation legislation, the new Pennsylvania agricultural promotion campaign aimed at boosting farm incomes; alternative sources of energy, such as gasohol; a Milk Producers Security Fund, merit selection of personnel.

Reservations can be made by contacting Regional Director C. Eugene Wingert at 717-787-3400.

Grain corn up, silage down

HARRISBURG — Based on acreage, utilization and production data, Pennsylvania farmers produced more corn for grain and soybeans in 1979 than in 1978, but less corn silage, hay, tobacco and potatoes.

Quantities produced and percentage change from 1978 are as follows: corn grain produced 115,425,000 bushels, up two percent and a new record high; all hay produced 4,293,000 tons, down one percent; corn silage produced, 6,150,000 tons, down three percent; soybeans produced 2,624,000 bushels, up 34 percent; tobacoo produced 22,100,000 pounds, down 12 percent.

Comparable data for the U.S. is as follows: corn grain produced 7.76 billion bushels, up ten percent; all hay produced 145.9 million tons, up three percent; soybeans produced 2.268 million bushels, up 21 percent; and all tobacco produced 1.5 billion pounds, down 24 percent.

STOP FIRES BEFORE THEY START!

TROJAN T1058 THE HYBRID OF THE '80's

Few 105-day hybrids can stand up to T1058 for consistent high-yield potential in a variety of soil and weather conditions.

The record shows this strong-standing, medium-height champion has everything it takes to be the classic corn of the 1980's.

In 328 TST on-farm yield trials over the past two years, T1058 has delivered the high yields farmers have come to expect from Trojan hybrids.

Obviously, there's a special science to delivering this consistent performance. And no one applies that science more skillfully than the creators of Trojan T1058.

Year in, year out, the industry's finest research team is at work, making Pfizer Genetics the name to count on for bigger yields and built-in profitability.

Find out all about T1058 at your Pfizer Genetics Dealer's Trojan Days.

HYBRID CHARACTERISTICS OF TROJAN T1058.

Seedling Vigor:	Very Good	Drought Tolerance:	Very Good

PFIZER GENETICS HAS IT DOWN TO A SCIENCE.

At Inter-State meeting

Jones discusses advertising with local dairymen

BY SUSAN KAUFFMAN
Staff Correspondent

CHESTNUT LEVEL — The president of Inter-State Milk Producers Cooperative, Lester Jones, told a local district membership gathering the immediate future for dairymen looks good, but a long range view shows reasons for considerable concern.

The New Jersey dairyman, who has served as president of Inter-State since 1972, was introduced to the membership of District 3 by its director, Robert McSparran, as "ambitious, determined and optimistic – a true leader."

Presently operating a 900 acre farm in the garden state with his son, the Joneses manage a herd of 390 Holsteins. In addition to knowing the day to day routines and concerns of a working dairy farm, Lester Jones sees the dairy industry on a national scale as well. For many years he has served on many varied national boards in advisory as well as official capacities.

Among his many contacts with the dairy industry away from the home farm are seving as third vice president of the National Dairy Council, and as a member of the executive committee of the National Mik Producers Federation.

Tracing the efforts in past years to continue a demand in the marketplace for fluid milk, Jones remarked that there is an ever increasing need to support more advertising.

"Five years back when we were paying five cents per hundred weight for advertising to boost demand for fluid milk when national consumption had dropped, we were getting as much advertising as we are now when we are paying one per cent or 12 cents per hundredweight of the pay price for advertising.

"Advertising costs have gone up, too," he said.

"Milk is a Natural" and "Milk's the One" have proved to be very successful generic advertising campaigns," he continued.

Explaining the difference between generic and brand name advertising, Jones said generic advertising in terms of a type of product such as milk in general is attempting to increase the size of the pie in the marketplace while brand name advertising attempts to gain a larger piece of that pie.

In recent consumption surveys, Jones added, the tonnage of low fat, skim and whole milk products have increased slightly with butter increasing seven per cent last year and cheese making outstanding progress in the marketplace.

"The Dairy Council is trying to dissipate the unfavorable publicity such as cholesterol and heart disease in connection with dairy products." "Through research this organization proves findings before advertising can get under way," he said.

A major threat to the dairy industry in the future as Inter-State's president sees it is the action proposed by a consumer group called Consumer Nutrition Institute to destroy the classification system which has long been in effect.

Basically, the group wants to reconstitute powder products to fluid at the cost of about $1 per hundredweight decrease paid to the farmer, as Jones explained it.

The law now states that milk shall be sold according to use. Dairy interests claim that the movement afoot by the Consumer Institute is illegal.

"Only the dairymen will look after themselves," Jones emphasized. "The department of Agriculture won't, neither will anyone else except the dairymen themselves."

Jones touched briefly on Holly Milk progress stating that in December it was operating at one million pounds a day on the average, a record much better than previously.

"It is on the verge of profitability," he concluded.

Common problems on a national level as Jones explained were advertising and marketing.

"Dairying has had a favorable economic situation in recent years. There are serious threats in the future," he said.

"Imitation products and imports are of major concern. We will have to continue to work as a cooperative to handle these problems," he concluded.

A number of guests attended the meeting. Among them were Lancaster County Dairy Princess Lucinda Landis, dairy agent, Glenn Shirk, and five FFA students and their advisor Arba Henry representing the Solanco chapter. Scott Brinton, Randy Graver, Mark Trimble, Bob Kirk and Allen Anderson were the FFA members.

Inter-State Director Robert McSparran, left, presented 25 year awards to Elmer Weber, Merle Ressler who accepted for his father Martin, and David Aument of the Clyde Aument family. Not present at the meeting were 25 year members Earl Hershey and John R. Herr family.

4-H members who had the five highest placing project books in this district were honored with checks. They were Tom Arrowsmith, Matt Arrowsmith, Mark Hess, Susan Hess and John Emling.

Also recognized at the luncheon meeting were five families who had twenty-five years memberships in Inter-State.

Given plaques by Don Briener, fieldman, as McSparren announced them were Earl Hershey, Quarryville, R.D. #2; Martin Ressler, Quarryville, R.D. #2; David Aument, Fairfield; Elmer Weber, Wakefield; and John Herr, Holtwood.

Young cooperator, Ed Zug, explained his involvement in the program and the purposes of the program. He also reported as co-chairman of the dairy tent at the Solanco Fair that the total proceeds from the tent were donated to the fair association. The sum amounted to $1007.

He reported the tent served 4100 hamburgers, 990 hot dogs and 3400 milkshakes – among other items – at the three day event.

Delegate Aldus Martin briefly reviewed the programs and resolutions at the annual meeting held last November in Lancaster.

Dekalb honors top corn growers

HERSHEY — The top corn growers in Pennsylvania were recognized on Tuesday, January 22, by the DEKALB YIELDMASTERS CLUB at their annual meeting in Hershey

Five Lancaster County farmers were honored, along with 26 other Pennsylvania corn growers The Lancaster Countians were Wilmer Conrad, Lititz; Floyd H. Moore, Lancaster; Tom Zartman, Ephrata; Harold Brubaker & Sons, Strasburg; and Earl N. Landis, Manehim.

What is DEKALB'S YIELDMASTERS CLUB? According to Elmer Repschlaeger it is a nationwide contest which is designed, not so much to measure yeilds, but to exchange ideas on how to improve yields.

He explained that to enter the contest, a farmer must harvest one acre of their company's corn by machine The farmer must have a weight ticket to submit to show the actual harvest weight for that acre of corn And the harvest must be witnessed by an impartial third party.

Any farmer can decide to enter the contest, at any point during the growing season The only deadline, said Repschlaeger, is the November 15 report date for all entries.

Other Pennsylvania farmers recognized for their outstanding corn yields were:

Lon Gates, New Enterprise; John Marsteller Sr., Stewartstown; Allenor Holstein Farm, Bedford; Harold Raubenstine, Hanover; Bob Ragland, Stewartstown, Druck Farms, York, Robert Schriver, Hanover; Gerald L Shoop, Milton; Donald Meckley, Glen Rock; Charles A Hess, Dallastown; James W. Knaub, Red Lion; Oscar C. Winters, Hanover; Markle & Lauer, Glen Rock; William E. Ferrell & Sons, Eagle, Merle J. King, Cochranville, Glen Engle, Cochranville, Dan Mast, Oley, Irvin G. Engle, Atglen, Lapp Bros., Cochranville, William & Arthur Voorhees, Stewartsville, Charles Lamm, Sinking Spring, N Norman Myer, Jr, Coatesville, Lester Bros., Lincoln Univ; Rambling Rose Farms, Mt Holly, Thomas Yoder & Douglas Yoder, Elverson, Alvin Lamm, Jr, Sinking Spring

Flickinger will speak on feeding hay and silage.

Delaware Vegetable and Potato Conference, Sheraton Inn, Dover, continues through January 30.

State Horticulture meetings, Convention Center, Hershey, continues through January 31.

Sewing with Plaids clinic, 9:30 a.m., Hunterdon Co. Extension Center.

Dauphin Co. COWAMP meeting, 7 p.m., Swatara Twp. Building.

Garden Spot Young Farmers meeting, 7:30 p.m., Union Grove School, topic will be ventillating barns with ducts.

Wednesday, January 30

York Co. workshop, "The Incredible Crepe", 10 a.m., Pleasant Acres Meeting Room.

Thursday, January 31

Sewage disposal seminar, 7 p.m., Penn State Fruit Research Lab, Biglerville.

Town Meeting, 11:30 a.m., Encks, Baron, Stiegel Family Restaurant, Manheim.

Farm and Home Foundation Meeting, 6:30 p.m., Lancaster Co. Farm and Home Center.

Farm finance meeting

TERRE HILL — The Adult Farmer Program, Eastern Lancaster County School District will sponsor a Farm Finance Meeting on Wednesday evening, February 6 at the Union Grove School.

The meeting will discuss many areas of farm finance and farm management as related to todays money market including: the short money supply, higher interest rates, the problems the higher rates are creating, hedging as a management tool to insure a profit, where does leasing fit the money management system today and the use of Market Reports in farm management.

Speakers for the evening will include: Ronald Bard, Federal Land Bank; Richard Hess, Commodity Broker, Shearson, Loeb, Rhodes; Fred Greenfield, Telmark Inc. Leasing; and Les Houck, Agri-Broadcasting System.

All interested persons are invited to attend the Farm Finance Meeting to be held at 7:30 p.m. on Wednesday evening February 6 in the Union Grove School.

For more information contact Bob Anderson at 215/445-5041.

Brief answers to short questions

Sheila's Shorts

By Sheila Miller

Enterprising dairy farmers who are planning to operate an off-the-farm jug milk store in Pennsylvania need to acquaint themselves with the Commonwealth's Milk Marketing Law.

This regulation has a great bearing on whether it pays to expand and open new stores on land away from the home farm, or whether the business will have to stay confined within its boundaries.

The entire law, Act No. 294, amended July 31, 1968, fills 63 pages of a cream-colored Commonwealth paperback. The original act was passed by the state's General Assembly in 1937.

Along with the law, there is a milk marketing board. This board was set up to see that Pa. dairy farmers have an equal chance to market their milk, along with payment securities through bonding of milk dealers (a rather controversial subject at present).

This board is also interested in the consumer, and makes sure that the milk sold in the state is pure and wholesome, and is at a fair price.

All this seems to fall in line with the jug milk producer until Section 402. This section spells out which milk dealers or handlers can get exemptions and which ones can't.

Exemptions to what?-The state licensing requirements. In Sect. 402 it states, "That in cash sales of milk to consumers, if he shall have produced all the milk on the farm where sold and such milk has at no time left the producers' farm prior to its sale to the consumer and he shall have neither purchased, handled, or received any milk from other producers or handlers for cash sale or any other purpose and his total sales to consumers do not exceed two gallons to any one consumer in any one day, the producer so selling milk shall be exempt from the provisions of this act."

In other words, the dairy farmer who puts up a jug milk store on his own farm, with the cows and the processing plant, is not required to be licensed with PMMB. Any deviations, and the exemption is lost.

Another section of the Act that gets involved with the jug milk opration is section 802, on prices. In small type, the law is defined to allow the milk marketing board to fix the minimum and maximum wholesale and retail prices to be charged for milk sold by any dealer in the state..."except for consumption at the store where sold."

This means that a jug milk operation located entirely on one farm, from cows to cartons, is not governed by PMMB's maximum and minimum price regulations. Here again, though, any deviations and the special provisions are washed down the drain.

This exemption business is important for every jug milker to keep in mind when expansion thoughts start cropping up. It's best to have all the information and angles, and know the consequences before making too many financial and emotional commitments.

And, if you run out of indoor things to do on a snowy winter day, curl up with a copy of the Pa. Milk Marketing Law paperback. With any luck, you'll learn something you weren't sure of before you started reading, and it will help you get to sleep.

New officers in the Ephrata Area Young Farmers include: front left, President, Rick Pfautz; Public Relations, Warren Bollinger; back left, Treasurer, Walter Augsburger; Secretary, Kerry Boyd; and President Elect, Gerald Martin.

Ephrata young farmers name officers

EPHRATA — The Ephrata Area Young Farmers Association elected new officers for 1980.

President of the association is Rick Pfautz, R1 Stevens. He is a hog farmer with 225 purebred Durocs.

President-elect is Gerald Martin, R5 Ephrata. This dairy farmer has 48 registered Holsteins on his 120 acre operation.

Secretary is Kerry Boyd, R5 Ephrata. He also is a dairyman, with 30 cows, 25 heifers, and five sows. He farms 100 acres in partnership with his father.

Treasurer is Walter Augsburger, R1 Reinholds. A hog and poultry farmer, he has 19,000 layers and room for 1200 finishing hogs on his 244 acres.

Public Relations Director Warren Bollinger, R4 Lititz, is a dairyman with 50 registered Holsteins on his 110 acre farm.

The Ephrata Young Farmers plan their 11th annual banquet for February 2, 6:45 p.m., at the Durlach-Mt. Airy Fire Hall.

Program includes a film, several short talks, and awards for farm production.

Also on tap is a weed control dinner, February 12, at 7 p.m. at the Cloister Restaurant, Ephrata. Reservations are needed.

At the group's monthly meeting at Ephrata Senior High, property tax issues will be discussed by J.R. Moyer, EASD Business Manager. Meeting begins at 7:45 p.m.

And on Februrary 26 at 7:45 at the Ephrata Senior High, a beef managment meeting on purchasing and starting feeder cattle will be held.

Featured speaker is K.C. Williamson, Virginia Polytechnic Institute Animal Scientist.

He will discuss the new feeder cattle grading system and the value of preconditioned calves.

Present yield awards

Berks County corn growers warm up for spring

BY LAUREL SCHAEFFER
Staff Correspondent

LEESPORT — Eager to update their knowledge on corn and soybean management, over 100 Berks County farmers gathered at the Agricultural Center here, January 15th, for a special meeting devoted to these crops.

John Yocum, director South East Research Farm of Penn State University, discussed soybeans as a cash crop and their weed control. Discussing several aspects of growing corn was Joe McGahen, Extension Agronomy Specialist, Penn State University.

Also presented during the day long affair was a discussion on hedging crops, by Clarke Hess of Merrill Lynch; and a talk on the recirculating sprayer, presented by Guy Braxton of Monsanto.

The local farmers also heard a panel of Ag Industry Experts discuss what they thought to be the most serious production problems of 1979. But highlighting the entire program was the presentation of awards by senior County Agent Jim Haldeman to Berks County's Corn Growers Club.

Burd Schantz, Alburtis, had the highest yield of 158.1 bushels per acre and a three year average of 157.3 bushels per acre.

David Herbert, Fleetwood, followed with a yield of 156.3 bushels per acre. With a yield of 144.1 bushels was David Schantz, Alburtis.

David had the highest three-year average of 160.8 bushels per acre. John Stump, Bernville, produced 143 bushels per acre last year and had a three year average of 144.3 bushels per acre.

Discussing corn management, McGahen told the area farmers that there would have to be new break throughs in the science of plant breeding to achieve more than 140 to 150 bushels per acre on a whole average for farmers. To push yields higher, you have to look at the economics first, he warned.

"Why produce higher yields if it doesn't pay?"

Soil drainage is the most important factor in selecting a tillage method, the agronomist told his audience. Poorly drained soils can be improved by tillage rather than no-tilling. If planting is delayed, however, the tillage method wouldn't matter, he continued.

In well drained soils with low organic matter a cover crop was advised for no-tilling to achieve a consistency of performance. Cover crops help to keep moisture in the soil and reduce run-off..

Studies show no-till is equal to or better than tillage following sod. In poorly drained soils, however, there was a noticeable reduction in yields in continuously no-tilled corn, but when plowed one year and no-tilled the next, there was no yield reduction.

During the segment devoted to soybeans, the area farmers learned that weed control in this crop is more difficult than for corn.

"There is more potential to injure the bean," Yocum stated. You have to be a little better manager to be successful, he warned.

Yocum cautioned the growers on several factors which should be considered when growing beans. These included knowing the weeds and chemicals needed to control them. When dealing with perennials, Yocum also warned the farmers about knowing the growth stages of the weeds and in which stage they are easiest to kill.

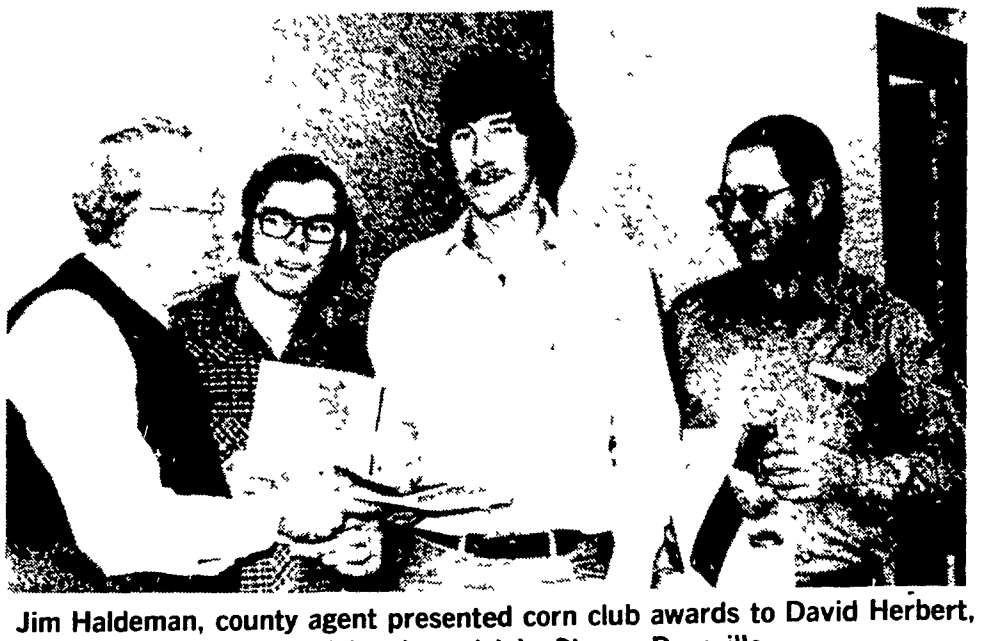
Knowing the soil texture and organic matter content of the fields was also stressed by the research scientist. The higher the organic matter of a soil the higher the rate of herbicides should be used.

Seed placement during planting was also stressed. Yocum told his audience the corn planter does a much more uniform job of seed placement then the grain drill. The speaker warned the farmers to use their agronomy guides and to follow the advice given for successful soybean production.

Hess told farmers hedging is an alternative marketing plan for their crops and stressed it is not a cure all or for everybody. However, a true hedge is like an insurance policy, but too often hedges become speculators.

Guy Braxton introduced the recirculating sprayer used for weed problems in growing crops with the use of a slide presentation.

This sprayer is effective in such problems as volunteer corn in soybeans. The sprayer projects a stream of herbicide over the crop and is caught and recirculated again. It only contacts plants taller than the standing crop.



Jim Haldeman, county agent presented corn club awards to David Herbert, Fleetwood; David Schantz, Alburtis; and John Stump, Bernville.

Stauffer named as co-chairman

Barbara Stauffer, Ephrata R1, has been named as co-chairman of the ladies program for the 1981 National Young Farmer Institute to be held in Hershey, December 5-9, 1981. She will serve with Carol Homan, Spring Mills, R1, it was announced by the executive committee of the National Young Farmer Institute.

Barbara's husband, Earl, is regional vice president of the Pennsylvania Young Farmers, and Carol's husband, Bill, is the 1979 state president.

Both women are very active in community and agricultural-related events. Barbara said the women will be helping to arrange tours for the 1500-2000 people expected to attend the conference, along with arranging special activities for the women. There will be two days of farm tours and agri-business tours.

Chairman for the women's portion of the program is LaVaughne Wolf, Orrtanna R1, whose husband Stanley has been elected chairman of the 1981 National Institute.

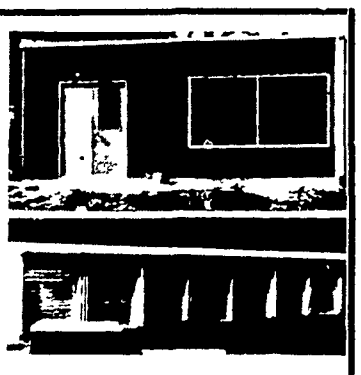
HUNDREDS OF INSTALLATIONS IN THE U.S.A.-THOUSANDS WORLDWIDE



Enjoy with pride the value and the real convenience of THE MILLER BUILDING, delivered complete and ready for use . . .

The Miller Building is ready when you are — and can be delivered to your site and erected in just a few hours upon your own foundation. You save both time and money when compared with conventional or even masonry construction. The uniqueness of The Miller Building is in the exceptionally strong internal construction. Not only does this allow for the added strength of siding materials but it permits maximum use of all interior space — permiting the wide use and easy application of finished wall materials. Besides the flexibility of modular units -- allowing additions or easy relocation — erection is fast and simple with no wait for a contractor.

Winter Time Is Ventilation Time

Cattle need a healthy environment to be healthy themselves and to have the opportunity to perform well for us, and reward us for the time and money we have invested in them. A healthy environment includes fresh air, some protection from the weather, and a clean, dry draft-free place to rest. Notice that I said nothing about warmth. If we provide cattle with plenty of forage in the winter, along with the requirements mentioned above for a healthy environment, they will be warm enough The body heat cattle generate from digesting forages will keep them warm.

These requirements are easy to meet during the pasture season when cattle can be outdoors. The challenge is much greater when we start to confine cattle, especially during the changing weather conditions of late Fall and early Spring, and during warm winter days! There are many ways we can provide cattle with a healthy environment.

One of the healthiest and perhaps easiest ways is to offer them a clean, dry, draft-free pen or barn that has one side opening to the southeast into an outside lot. A calf hutch is another good example of this type of shelter. In addition to planety of fresh air, cattle are offered a rather wide range of environmental conditions, and they have the freedom to choose their own comfort zones. However, these types of facilities do not fit every farm situation. There are other alternatives, but they may require more management and some wise decisions on your part.

When we confine cattle to the indoors, we make them prisoners to those conditions which exist in their pen or in the barn, conditions which often times they can not escape. If we do a less-than-adequate job, we also make them victims of our own mismanagement. Then we both lose out – the cattle and us. Remember, the more we confine animals, the less freedom we give them to choose their own comfort zones, and the more responsibility we place upon ourselves to supply them with the environmental conditions they need to be healthy and to do a good job working for us.

What conditions do cattle need, conditions which we should try to duplicate in our dairy barns? I mentioned some of these at the beginning. We can also learn a lot about what makes an animal comfortable by observing her actions closely. What is she trying to avoid? What areas and conditions does she seek out, and at what times and under what circumstances? Observe cattle in open-front facilities with outside lots – clean facilities and filthy, poorly-ventilated facilities; they'll tell you what they like best, and when. Think, too, about what makes you comfortable and uncomfortable. Think about those over-crowed, stuffy, smoke-filled rooms you may have been in at times, or that seat you had by a cold window or in the cold draft of a vent or fan. How good it felt to get out for a breath of fresh air or away from the draft! You were fortunate; you could get away from these unhealthy and uncomfortable conditions. Let's provide cattle a similar opportunity. Better yet, let's attempt to never let these unhealthy environments exist in our barns.

Barn can be ventilated naturally by cracking windows and vents, or mechanically by relying upon fans to change the air. As a guide line, we like to see 50 cfm of air being exchanged continuously for each 100 pounds of animal body weight. This provides for a continuous change of air, even in the coldest of days; it keeps the air fresh, and it removes air-borne germs and excess humidity. This is very important, even if it means keeping the barn cold. This can be accomplished by a small fan running continuously. In addition to this small fan, another fan (or set of fans) is needed to move an additional 150 cfm of air per 100 pounds of body weight. This fan should be controlled by a thermostat set around 45-55°F.

All of these fans should be located together in one cluster and located in a south or east wall for greatest operating efficiency. For draft control and for balanced air flow, air inlet shots should be located around the full length of all four walls to within 10 feet of either side of the fans. These inlets should be adjustable so the size of the inlet slot can be easily changed during various seasons of the year. All other cracks and air leaks should be sealed.

Few barns have these ideal air inlets. Then what? If we can't do an adequate job using existing windows as air inlets, then it may be necessary to install some strategically located ducts that bring fresh air in from the outside. This is often the case with remodeled stall barns. The new wing, with more windows and inlets, is usually the coldest end. Instead of shutting the windows in the cold end, which chokes down the fan and makes the old part of the barn even more stuffy, it is usually necessary to provide more inlets into the old section so as to more evenly balance the air flow. To reduce drafts, attempt to have a lot of small openings distributed uniformly throughout the entire barn.

What about pole barns and lean-to's? An air exchange will usually occur if we provide open eaves and an opening along the full length of the ridge. The ridge opening should not restrict the updraft of air trying to escape. It should be two inches wide for every 10 feet of building width, and no less then six inches wide. If the ridge is capped, the bottom of the cap should be at least 4-8 inches above the top level of the roofing. These openings will help let the warm moist air escape and reduce the amount of condensation dripping from the roof; it'll also lengthen the life of the building. Even with these openings, there may be a few minutes of dripping on a frosty morning when the sun first hits the roof. These buildings will be cold in winter. They'll seldom get much warmer then the outside temperature, and if they are shaded from the sun, they may actually feel colder.

So, in summary, remember that cattle need fresh air at all times, even on those cold days when it's very tempting to close the barn up tightly.

Mexico, U.S. agree to trade pesos and grain

WASHINGTON, D.C. — The United States and Mexico announced today an agreement for the sale of U.S. agricultural products to Mexico in 1980.

According to Undersecretary of Agriculture Dale E. Hathaway, the U.S. government has agreed to make available to the government of Mexico some of the quantities of wheat, corn, soybean and soybean products resulting from the suspension of exports to the Soviet Union and to assist in obtaining specific quantities of sorghum, edible beans, sunflower seeds, tallow and rice on behalf of the Mexican government.

The quantity of these products is expected to total nearly 4.8 million metric tons.

Both countries further agreed to continue parallel discussions for sale in 1981 and 1982.

The two governments look forward to establishing new and positive directions in their bilateral relationship. They forsee increased trade with one another whereby each country can help meet the needs of its neighbor, and both economies can thereby be strengthened.

NATIONAL CENTRAL BANK

WILSON D McELHINNY
Chairman and President

100 North Queen Street
Post Office Box 3959
Lancaster, Pennsylvania 17604

Dear Customers and Friends of National Central Bank,

In early February 1980, we will have a new name. National Central Bank will be Hamilton Bank.

On January 22nd, the decision was made to withdraw the bank from the Federal Reserve System and operate it as a state-chartered bank. As such, we can no longer use the word "national" in our name.

For a number of years, the National Central management has asked that Federal Reserve member and non-member banks be treated as equals with respect to the forms in which they are permitted to maintain their reserves against deposits Although Congress has considered various proposals for easing the burden of Federal Reserve membership, no actual changes have been forthcoming

As Hamilton Bank, we will continue to be a member of the Federal Deposit Insurance Corporation (F D.I.C) and all deposits will be insured exactly as they are now You will be able to use National Central checks and other forms, and you will find the same helpful, friendly staff at each office

The only change will be our name, and that's a change you helped us make. To find a new name, we conducted a research study in the six counties we serve, and Hamilton Bank was the clear favorite

So in early February, National Central Bank will be Hamilton Bank, and under that new name we'll go on working as hard as we can to give you more for your money, more for you

Sincerely,

Wilson D. McElhinny

Sheep assoc. pin-points problems at Farm Show

HARRISBURG — A spokesman for the Pennsylvania Sheep and Wool Growers Association recently remarked that sheep showman were planning to voice some constructive criticism to the Pennsylvania Farm Show Commission concerning next year's show.

At a meeting held on Sunday, January 13, a group from the assocation met to review problems they encountered at the 1980 Farm Show.

One of the major areas of concern involved the space shortage in the current Farm Show comples. The sheep showmen voiced their displeasure with the scheduling of both swine and sheep shows at the same time in the small arena. "It was like a three-ring circus," the spokesman said.

Show schedules were also said to be a problem for the junior exhibitors who wanted to show more than one species at Farm Show. All of the Junior shows were scheduled on one day at this year's show, with sheep, swine, and beef classes overlapping.

If a junior exhibitor had entries in two or three classes, a choice had to be made on which one to show in. Then the 4-H'er or FFA'er had to find someone else in the club to show their other entry, noted the spokesman.

The association spokesman also pointed out that health papers were another area that could be improved At this year's show, he said, a health certificate was required for each individual entry from each farm. This requirement, he said, is excessive when a certificate representing the flock would be sufficient.

And, the current weight limits for the market lambs will be brought to the Commission's attention, according to the sheep representative. The association is planning to suggest the present maximum weight limit be raised to 135 pounds. The spokesman pointed out that some breeds of sheep, like Suffolks, do not finish out at the present cut-off of 125 pounds.

Along with these problems, the Pennsylvania Sheep and Wool Growers Association will be calling to the Farm Show Commission's attention this year's major blooper.

The show schedule called for sale of breeding swine on Wednesday afternoon. However, the buyers of these hogs did not move them out of the barns after the sale which tied up a lot of pens in the sheep and hog area.

A major traffic jam resulted because the junior swine exhibitors were waiting, with their hogs in the parking lot, to move into the barns to prepare for their Thursday contest As a result, there were hogs next to sheep, confusion, and a number of unhappy exhibitors.

The associations' spokesman said they sent a letter of their recommendations and criticisms to Farm Show Director, Hugh Coffman They called for more space and better facilities, more organization of show schedules and sales, splitting the junior shows so that the exhibitors can show their own animals in the various species classes, revised health certificate requirements, and the increased market weight for lambs.

They are planning to meet with the Commission when the next meeting is held in March. SM.

December milk up

HARRISBURG — Milk production in Pennsylvania during December 1979 totaled 664 million pounds, up four percent from a year earlier according to the Crop Reporting Service.

The number of milk cows in the Commonwealth during December was 688,000 head, down 15,000 head from a year ago. Milk production per cow averaged 965 pounds in December, up 24 pounds from a year ago.

United States milk production during December totaled 10.0 billion pounds, two percent above December 1978. Milk production per cow averaged 930 pounds, 28 pounds more than a year earlier and 35 pounds above December 1977

Milk cows on farms totaled 10.8 million head, off one percent from last year

Dairy security

(Continued from Page A1)

The Pennsylvania confusion mirrors New Jersey's where a dairy security proposal recently was shoved to the back burner.

Senator Stapleton's office indicated the prompt payment idea may best be pursued through a federal law, crossing state lines, covering out-of-state handlers State legislation could leave too many loopholes

"Farmers should start on it as an alternate path. They may get there first," a Senate Ag Committee spokesman said

Otherwise, numerous questions remain to be answered

How large a fund? Who pays? What will the rate of payment be? Who will be covered? What about alternative bonding provisions?

It's not an matter of right vs. wrong, many insiders say. It's a complex issue.

Concluded the legislators, "As of the moment, we don't have anything" — CH

Del. soybean growers to decide key issues

DOVER, Del. — A meeting will be held this coming Monday at which the Delaware Soybean Association nominating committee will make the final decision on election for the advisory board

At present, the Delaware Soybean Association has not elected to join the Mid-Atlantic Soybean Association

The decision on whether or not to affiliate will be made when the advisors are elected

Some questions have been raised as to whether or not it would be a good idea for the Delaware growers to associate themselves closely with the Mid-Atlantic group.

Other local associations, like the Maryland group, have tied their programs to the Mid-Atlantic Association.

Among the advantages of not joining the Mid-Atlantic and national groups would be that all research monies could remain in Delaware for use at the Delaware Ag Experiment Station.

But marketing programs probably would have to be conducted through the Mid-Atlantic Group.

The final decision on how closely the Delaware Association will be tied to the larger groups will be decided when the advisors are elected.

The Monday meeting with the nominating committee will make the final decisions on election for the advisory board.

Farmers Union President Tony Dechant says

There's lots going on that's worse than embargo

CAMP HILL — "It's not a free enterprise world, it's a political world," maintains National Farmers Union President Tony Dechant.

"I'd like to live in the supply and demand world they talk about

"If the fit farmers are the ones who survive then how comes it that we've lost one million farmers and 10 parity percentage points in the 1970s?" he continues.

Dechant is not noted for his love of USDA's current parity levels. And Monday, despite the constant din in farm circles about the embargo of grain to Russia, Dechant was concerned about other problems.

"There's lots of things going on that are worse than the grain embargo," he says tapping the table for emphasis at each word.

Dechant has served as president of the 78 year old National Farmers Union for the past 14 years. He says intends to step down at the NFU convention in March

The grain embargo just emphasizes the political, not economic, nature of the world market, he says

Tony Dechant is far from pleased with the prices American farmers receive for their products. The President of National Farmers Union said he plans to step down from office in March.

Russia, China, even Japan have government control of the farm economy.

"I won't question the right or judgement of the President on the grain embargo. That is a prerogative of his office, and I'm not privy to the sensitivity of the military problem," Dechant says.

What bothers him is the farmers are being called upon again to bear the burden of foreing policy.

He ticks off the contributions American farmers have made to our foreign policy, not the least of which is the building of exports to balance our trade deficit.

"Will there be a cutback in Pepsi-Cola exports?" he asks.

He points out the government's "quick and sudden" halting of grain exports. The administration baled out the grain traders first, he says.

"Prices will fall because of this action," he predicts.

He says farmers should be quick to ask Congress to enact the 1002 provision of the Farm Act if exports are limited and have the loan rate increased to 90 percent.

"We want this on file for use during a national emergency at any time," Dechant says.

He points out the hardship the embargo would work on farmers as they prepare for another season.

In corn or spring wheat the land is prepared in many cases. Those farmers who have not already put fertilizer down are committed to fertilizer purchases.

Dechant labels devistating" the Agriculture Department's predictions for corn.

Originally USDA predicted a 1979 corn crop of 6.8 billion bushels

That was increased to 7 2 billion bushels, which Dechant says he feels is not unreasonable since nobody knows what's in the fields until harvest, anyway

He shuffles some papers as he builds to his point.

At the completion of harvest they increased their production estimate to 7 5 billion bushels

"And in the last few weeks they have jumped it to 7.8 billion bushels," he exclaims

"Not only did they miss the original prediction by one billion bushels but they have increased the figures by 300,000,000 bushels since the beginning of this year," he says.

Dechant says he feels the grain embargo will hurt the Russians.

But he added the Russians probably will be able to make other, more expensive arrangements, especially to obtain grain in the future.

He says if Canada and Australia hold back on their sales the damage to Russia will be worse.

Dechant says he wonders why, when four nations export almost all of the grain shipped in the world, they can not reach some sort of price agreement.

"Three of them speak English," he says, referring to the United States, Canada and Australia. The fourth is Argentina.

Of course, Dechant is ready with an answer

It's the cheap food policy in this country that is hurting all of the grain producers in exporting countries around the world, he says.

"Farm power, just in my time, has eroded. We've gone from 20 percent of the nation's population to four percent," he says.

Cheap livestock always follows cheap grain, he points out. He says the U.S loan rate is the floor price for world grain.

NFU has long fought for 90 percent of parity. Although it finally was written into law it has yet to be used.

"I was always taught to start high and bargain down," he says. "But farmers have to start low and try to work up."

He denies Farmers Union is a radical farm organization He points out NFU works with Grange and Farm Bureau in many areas of common interest.

"But we want floors on prices, and pricing provisions on the international level," he says.

All NFU asks is a farm business predicated on production expenses plus a fair profit, he says.

"I don't know if the old labels apply any more. We are consistent with our policy. Check the record and see who has fought for high prices for the longest," he challenges.

Farmers are going to suffer a 20 percent drop in farm income in 1980, noted.

"We can live without the Russian exports. What is hurting farmers most is the drop in income because of increasing costs.

"Interest, fuel, and all imputs are skyrocketing, and the farmer's income is going the other way. That's the real story in farming today," Dechant maintains. — CH

Montgomery Co.

4-H elects officers

NORRISTOWN — The Montgomery County 4-H Cabinet, an advisory board for the county 4-H and youth program, recently announced their officers for 1980, according to Nancy Kadwill, County Agent.

Re-elected chairman was Tom Campbell, an active community leader in the Norristown area.

Fred Haentze of Harleysville was elected vice-chairman. Fred, who is a 4-H sheep club leader, will also be chairman of the Building Committee.

Serving as recording secretary will be Rachael Roblee of Ambler, organizational leader with the Upper Dublin 4-H Community Club.

Corresponding Secretary will be Chris Jones, Schwenksville, of the Perk-Penn Horse Club.

Mary Ann Ribick of Phoenixville, active as a leader in the Hoofprints 4-H Club, will take on the responsibilities of Treasurer.

Two new members welcomed to the Cabinet included Dave Ketner of Schwenksville and Robert Shisler of Harleysville.

Stan Coolbaugh of Lansdale will continue to be Facilities Director.

Teen Council representative will be Jamie Graybeal of Telford.

Additional members of the Cabinet include George Shenkle and Harry Stewart of Collegeville, Luke and Anna Brandt of Harleysville, James Graybeal and Gloria Ruth of Telford and Paul Werkheiser of Norristown.

The 4-H Cabinet works with the Montgomery County Cooperative Extension Service staff to advise the overall youth program plus maintains and manages the 4-H Center located in Lansdale.

The 4-H Clubs are open to all youth ages 8-19.

Handicapped riders trade wheelchairs for horses

BY SHEILA MILLER

HARRISBURG — Other Pennsylvanians will soon be joining with Lancaster County in providing a new program for the handicapped. At a meeting held at the Sheraton near Harrisburg on Thursday, representatives from the Easter Seals Society and 4-H joined together for Horseback Riding for the Handicapped and Pony Express.

Even though there has been a program of this type in Lancaster County since 1971, it will be something new for many counties throughout the state.

Jack Sippel, executive director for the Lancaster County Easter Seals Society explained that the county's program was started nine years ago from a legacy donated to the society by a Mennonite family, earmarked for a horsemanship program. Working strictly with volunteers and members of the Lancaster Pony Club, the program had its ups and downs and finally split up after about four years.

Then two years ago, Carol Henkel, who is the current head instructor for the Lancaster County Handicapped Riding Program, and Mary Ann Ferro, assistant instructor, got together and shared their common interest in helping people with physical limitations enjoy the pleaures and therapy of riding horses.

The two young women approached Jack Sippel about the possibilities of reorganizing the program, and were taken on as the Easter Seals staff instructors.

Today the current program is serving as a model to others of its type throughout the state, and is a practical source of information for the development of the statewide program.

The riding therapy takes place at Hidden Acres Farm, Quarryville. One of the program's students, now an instructor, received a standing ovation at a recent horse show at Devon for her accomplishments in riding and her courage to overcome a handicap.

According to Carol Henkel, the social aspect of the program is just as important to the participants with handicaps as is the therapeutic benefit. She said the students become more extrovert when they can associate with their peers in a normal atmosphere where they are just one of the gang.

Henkel said that some of the handicapped riders find a new ability on top of a horse, and both riders and helpers gain a better rapport.

Carol's assistant, Mary Ann Ferro, agreed with the social benefits, and stressed that horseback riding for the handicapped had an automatic payoff. She said the horse's movement is excellent physical therapy, and it gives the students an opportunity to realize a specific goal.

The statewide program is just getting its hooves off the ground, but hopes to have a summer program by 1981, with a full-time state coordinator by January 1 of next year.

This Thursday's meeting was to get county Easter Seals and 4-H people together to discuss the program goals and details. If all goes according to plans, a major fund-raising effort will take place in September, 1980, called the Pony Express.

4-H'ers throughout the state will be able to participate in a ride to raise money so that the handicapped people will be able to ride. According to Frank Bortz, curriculum specialist professional development 4-H, youth at Penn State said this will involve the 100,000 4-H club members in all of the project areas in Pennsylvania. He said he is also relying on the 9,000 volunteer leaders and the 4,000 teen leaders to assist in making this a success.

A similar program in Iowa raised $196,000 in 1979 for their handicapped riding program. Saddle club members rode along highways, accepting donations, while singing "We ride so crippled children can walk".

The Pennsylvania program has a long way to go before the horses are ready to be saddled up. But the team-up of 4-H and Easter Seals is a marriage that according to Bortz, can't fail.

The 4-H'ers will be giving their heads, hearts, hands, and health, along with their experience in running a horse program. Easter Seals will be contributing their contacts with children and adults with disabilities, medical consultation, fund-raising expertise and their summer camps.

The horseback riding for handicapped will take a lot of team work, organization and dollars. Safety equipment, insurance, special mounting equipment, horses and their feed and care, student transportation, and medical costs all add up to a considerable sum.

But, it's a program that can survive on a shoestring, noted Carol Henkel, citing the experiences and budgets of the Lancaster program.

And, noted the meeting participants, it is worth every penny of the effort just to see the freedom and sheer joy beaming from the riders faces as they hurdle their handicaps and trade wheelchairs for horses.

PFU meeting

(Continued from Page A1)

ammended to recommend PFU conduct an investigation into the possibility of introducing a graduated land tax.

Members seemed to feel they needed to know more about the proposal.

They adopted a Northampton County proposal that municipalities be prohibited by state law from requiring lot sizes of more than one acre.

They further resolved the Public Utilities Commission should have no control over the hauling of lime and fertilizer in the state.

They approved resolutions asking that normal farm operations following established and customary procedures be exempt from nuisance laws, ordinances, and litigation.

They supported equitable co-generation agreements between power companies and individuals.

Members re-elected Forney Longenecker, Lititz, as state chairman. James Brown, Mercer, was elected vice chairman to replace Irk McConnell, Sr., McDonald.

McConnell was elected as a delegate to the National Convention in Denver the first week in March. Barbara Wood, Fannettsburg, also was named as a state delegate.

Ben Anspach, Bedford, won a free trip to the convention in a membership contest.

Members adopted a major addition to the preamble of their constitution.

It defines their concern for the future of the family farm.

At the annual banquet Tony T. Dechant, National President of the Farmers Union called for a standing policy that would go into effect whenever embargoes threaten farm income.

Dechant said farmers may be patriotic but they should not have to carry the burden for U.S. foreign policy.

He said the White House has not taken sufficient action to protect farmers from economic injury.

Dechant also announced to the convention that Farmers Union had gon on record this week in opposition to a proposal that a nationwide hearing be held by USDA on pricing policy on reconstituted milk under the federal milk market order system.

"To change it would undermine the functioning of the milk order system," he said.

Victor K. Ray, field services director for National Farmers Union said alcohol fuels production by farmers can be the most significant new market developemnt in the history of farming.

He said alcohol production could save the American family farm.

Robert J. Mullins, legislative representative for NFU, slammed the Beeferendum calling it "the beef tax."

He said the tax includes no guarantee the promotional program would raise farm income.

He said the refund procedure was designed to discourage the small feeder.

Mullins said American cattlemen could end up supporting foreign beef under the proposal.

He called it a "high flying program that will not help too many people other than some Madison Avenue types."

He drew applause from the audience when he recommended a "no" vote from all PFU members.

Other events on the program included a legislative panel with Senators Patrick Stapleton and Doyle Corman, and Representative Reno Thomas; a report on the American Farm Project, a rural humanities program sponsored by the Farmers Union, and a report on Green Thumb, a rural employment program for older Americans sponsored by NFU.

UNIPEL® 20-10-10

is a good fertilizer for Spring plowdown:

If it's ideal for Fall plowdown, (and it is!) you know it has to be good for Spring plowdown, too

Half of its high Nitrogen component is nitrate Nitrogen Goes to work immediately to help decompose plant residues to release their nutrients and provides a quick growth "kick" for early-planted crops in cool soils — such as corn and oats

The other half of its Nitrogen is long-lasting Becomes available as the soil warms up in Spring Then goes to work feeding plants continually through the growing season

There's also quick-acting and long-lasting Phosphorus to team with Nitrogen and readily-available Potassium to help establish good plant root growth and feed plants all-season long for good stalk and leaf growth That chemical combination of N and P also helps increase Phosphate uptake and enhance fertilizer efficiency

In a sentence, you've got a lot going for you with just one Spring plowdown application of UNIPEL 20-10-10 Let's discuss how we can start the program soon

BUCKS - MONTGOMERY COUNTIES

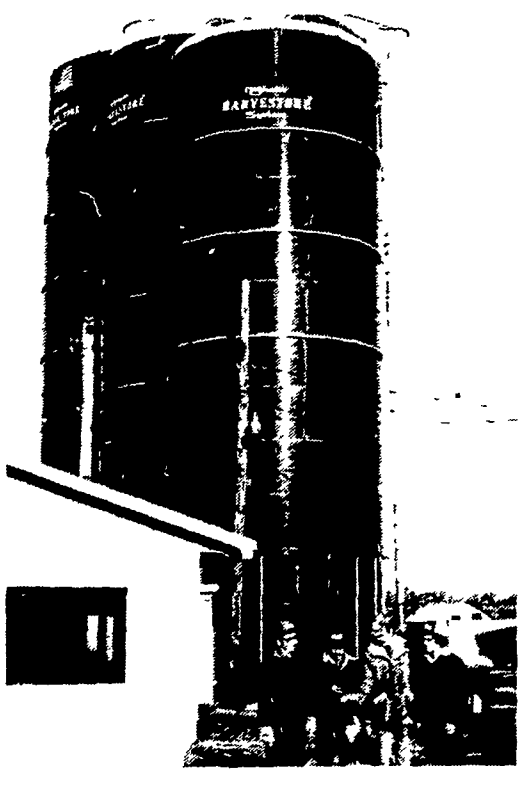
HOW DID YOU HARVEST YOUR WET GRAIN THIS PAST FALL?

Harold Knechel Family Farm, 471 Indian Creek Road, Harleysville, PA 19438

HAROLD KNECHEL HAD A PROBLEM...

HERE'S HOW HE SOLVED IT!!

Harold's son Jeryl is shown holding a sample of the high moisture corn from their Harvestore® Looking on (from left) is Michael Orndorff, Harvestore® representative, father Harold Knechel and son Darryl.



The first corn combined was 120-day seed, planted from the 19th to the 26th of June because of the extremely wet spring. The corn constituted the first ¼ of a 2060 HARVESTORE® Structure. Harold hired a self-propelled custom combine but the conditions were so wet that the combine had to stay on the rows to stabilize. The wheels of this four-row combine just matched Harold's first and fourth rows. During the time his corn was harvested this same machine was unable to harvest soybeans due to wet conditions. This 120-day corn was harvested when it had frozen at the dent stage and moisture was estimated at about 42%. (In order to harvest this corn they had to speed up the cylinder, open up the concave, and remove the lower screen in order to get all of the cob.) This is the first year that Harold has gone to High Moisture Ground Ear Corn and he did it for two reasons: (1) Incorporate the cob in order to decrease total moisture content and (2) To get the most out of his land because of increased costs of fertilizer, etc. Harold was very happy to get his corn in when he did. He believes that including the cob, adding about 3% dry oats to the mixture, and using dry ice after each filling to eliminate existing oxygen in the HARVESTORE® were the most important factors in obtaining an excellent quality feed with such high moisture grain.

In Adams Co. No. 53 is No. 1

GETTYSBURG — Last month, No 53 was No One in both milk and fat production during her 305 day lactation record The top cow, a five-year-old in the herd of Weim Sharr Farms, made 26,078 pounds milk and 1045 pounds fat for the best record in Adams County

Her herd mate, No 54 was the second top ranking cow in fat production in the county She made 1014 pounds of fat with 23,178 pounds of milk for Weim Sharr Farms

This same farms' cow No. 150, was in the top ten in milk production, making 24,375 pounds and 736 pounds fat

Ray Dutterer's cow No 203 was the second top Adams County cow in milk production She made 25,901 pounds milk and 978 pounds fat during her record

Another cow with a milk fat record worth mentioning was cow No 16 in the Yellow Buttercup Farms herd She made 935 pounds of fat and 23,410 pounds milk, ranking in the county's top ten

LeRoy Deputy was undoubtedly happy with his cow's milk production record As a matter of fact, Happy made 25,340 pounds, the third highest production record in the county Her fat record was 830 pounds

Sixty-five cows completed lactation records with over 600 pounds milk fat Thirty-eight had records over the 600 pound cut off, eighteen were over 700 pounds, five went over the 800 pounds mark, two cows made more than 900 pounds, and two cows topped the 1000 pound mark

Leading the county in total milk fat production was the Roy A Weaner, Jr herd with 2 04 pounds for 55 cows They were followed by the 110 6 cow record of the Yellow Buttercup Farm, with 1 96 pounds.

Noel & Holmes and Stoner Bros Dairy were tied with a milk fat production level of 1 95 pounds And Kling Ayr Farms was fifth with 1 85 pounds fat

DOOR FRAME AND DOOR.

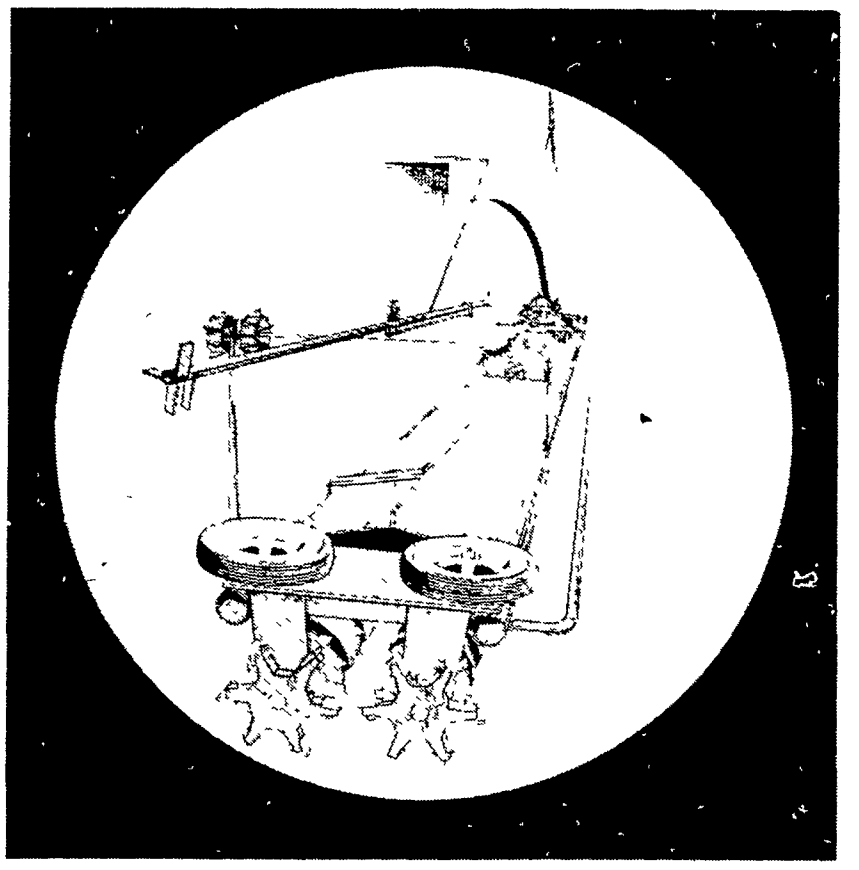
SOLLENBERGER POURED CONCRETE SILO FEATURES:
- 6" POURED CONCRETE WALLS REINFORCED WITH STEEL.
- CONCRETE TREATED WITH SPECIAL PROTECTIVE MATERIAL CALLED GLAZ-IT

SEE THE MAGNUM SILO UNLOADER!

Designed and Engineered by
The Pioneer In
The Silo Unloader Industry.

VAN DALE®

The new MAGNUM 27 unloading action starts with more aggressive wall cleaners with replaceable knives. Coupled with the dual, 7 and 8 inch differential speed augers this combination gives better wall pressure for cleaner walls and maximum silage delivery to the impeller. The impeller is a large 27" diameter driven by an extra-heavy "C" section belt for more traction and longer belt life. There's still more — the MAGNUM 27 features quick release pins so you can fold the machine, maintaining perfect balance, and pull it to the top of the silo in minutes. This makes it easy to fill 'n feed. There's also a new compound radius chute and a new roller torque arm which is attached to a larger, heavier support triangle. Add it all up and you have a performance champ that will give years of service.



TAKE TIME AND SEE THE MAGNUM AT K&S INC.

Pros and cons about Beef Referendum

Amer. Angus Assoc. backs Beeferendum

ST. JOSEPH, Mo. — Beef producers will soon have the opportunity to register and vote for a beef checkoff program that will enable our industry to sponsor beef research, foreign market development and, most important, to provide consumers with accurate information about beef, stated Dr. C.K. Allen, Executive Vice-President of the American Angus Association.

The following ideas reflects Allen's feelings and those of the association he represents concerning the upcoming beef referendum:

"The days that are scheduled for producer registration and voting may be the most important days in the future of the beef industry.

Almost all informed cattlemen support the Beeferendum. Unforunately, most producers assume it will pass, an assumption we can't afford.

Every person who is eligible should make a point to register and vote for the Beeferendum.

There is organized opposition to the Beeferendum although not nearly as much as there was in the last election. On the surface, it is difficult to understand some of the opposition but on closer evaluation, most of the opposition falls into two or three categories.

First of all, some people disagree with one or more minor points on how the Beeferendum is organized or will be handled.

The National Cattlemen's Association solicited the input from many diverse groups before writing and developing the mechanics and they have done an admirable job in incorporating these suggestions.

People who oppose the Beeferendum because it is not exactly the way they would do it are little different than the child who takes his ball and goes home if others won't play by his rules.

There is another group opposed to the Beeferendum and they are usually organized. This group is made up mostly of organizations that represent farmers in general or, in some cases, other cattle or livestock groups.

Some of these groups apparently are opposed to the Beeferendum because they are afraid it will weaken them. They put the welfare of their organization above the welfare of beef producers and the beef industry.

The few cattlemen who oppose the Beeferendum because they oppose centralized authority and fear government intervention are probably very rational in their approach.

I encourage anyone in this category to study the Beeferendum closely because I believe they will find their fears are unwarranted.

The funds raised by a checkoff will be administered by a Beef Board that consists exclusively of cattle producers and this Board will be responsive to beef producers because they are nominated by certified industry associations and because individual producers can get their funds returned if they are unsatisfied.

Have you ever asked why we have all the fanatical attention to fat in the diet?

Have you ever wondered why Senator McGovern's nutrution committee became so involved in developing dietary goals for this country?

Have you ever wondered why someone elected to the Senate would believe that this country didn't have time for research on dietary goals and that we should formulate dietary goals even if they weren't based on sound research?

There is one situation that answers all the questions above. The producers of margarine, cooking oils, and other polyunsaturated synthetic products have spent tens of millions of dollars annually promoting the concept that animal fat is harmful, that cholesterol in the diet causes heart disease and that animal fat are a possible cause of cancer.

This media blitz has formed prejudiced convictions and attitudes about nutrition among legislators and consumers.

No research has verified any of the advertisement claims and numerous researchers are reporting that not only are their claims false but there is a real possibility that polyunsaturated fats are harmful.

Who is going to tell the consumers that animal fat is better for them than vegetable fat, that beef contains the best form of iron available for human consumption, that many vegetarian's diets are protein or specific amino acid deficient and could lead to mental retardation, disease or death, especially in the young?

I can only think of one group willing to undertake this task and we can do it only if the Beeferendum is passed.

And this type of information and advertising program can work.

The American Egg Board since 1977 has halted a long term decline in per capita egg comsumption. Bolstered by their "Incredible Edible Egg" advertsing campaign, egg consumption in the U.S. is up 25% this year.

Have you heard of "turkey ham" or "chicken dogs"? They are just two of the numerous new products that have been developed that are helping to increase consumption of poultry dramatically.

Much of the increased consumption of poultry in this country is a direct response to new product research paid for by the poultry industry.

New product research develops new ways of preparing, merchandising, or presenting a product. There have been many changes in eating habits of Americans as we adopt changes in our way of life, like a greater percentage of housewives working.

One such change that we can all relate to is a decrease in demand for pot roast because roast takes more cooking time.

New product research will help us develop new products or modify old products so we can at least maintain beef consumption at current levels and with successful new product research increase the demand for beef.

How much is the beef industry spending on new product research today? You guessed it – practically nothing. What is worse is our competitors are very active in the new product research area.

Yes, there are many reasons why we should support the Beeferendum. The character and indeed the survival of the beef industry are at stake.

You can do your part by making sure that every cattle owner in your household registers and votes for the Beeferendum. Even better, encourage other cattlemen to register and vote for the Beeferendum."

National Grange supports check-off

WASHINGTON D.C. — The National Grange, at its last Annual Meeting, held in November, voted to continue its support for a beef referendum which would permit producers to vote on a check-off for the funding of promotional programs, research and consumer information on beef and beef products.

P.R. Smith, Assistant Secretary of Agriculture for Marketing, announced today that beef producers will be asked to register for the referendum between January 28 and February 6. They'll vote by secret ballot February 19-22.

Ray Fitzgerald, administrator of the department's Agricultural Stabilization and Conservation Service said his agency will conduct the referendum. The department's Agricultural Marketing Service would monitor the program.

Rules for registering and voting in referendums have changed, noted Fitzgerald. He said the department determined that 10 days (8 working days) would be sufficient for all producers to register and that the four day voting period would result in a more efficient voting procedure and reduce administrative costs.

A similar order, issued in 1977, although favored by 56.4 per cent of voting producers, did not receive the required two-thirds approval. Since that time, the Beef Research and Information Act has been amended by Congress so that a majority of producers will be sufficient for approval of the order.

Edward Andersen, Master of the National Grange, urged that all Grange members who are cattle producers or dairy farmers should vote in the referendum.

Brother Andersen said, "The Grange was not totally satisfied with the legislation as it pertained to the method of assessing the check-off but that should not stop Grangers, who are eligible, from voting in the referendum. I urge you to do so, and it is important to remember that it will be conducted like a regular election – you have to register before you are eligible to vote. So be sure to register."

Producers may register and vote at local ASCS officers. Registration and voting can be completed by mail if information and ballots are requested in advance.

The order, issued by U.S.D.A. authorizing the program, provides for a beef board of up to 68 producers to administer the program. There would be as many as five non-voting consumer advisors to the board.

Each state or geographic area would be represented on the board in proportion to its share of the U.S. cattle industry.

The program would be funded by assessments based on the value of cattle sold. During the first two years of the program, assessments could be up to two-tenths of one percent of the value of cattle sold (20 cents per $100).

After two years, the board could recommend an increase up to five-tenths of one percent.

As sellers in the marketing chain would be assessed. The buyer at the point of slaughter would deduct the total assessment forward it to the board. Any producer could request and receive a refund of the assessment paid.

Pros and cons about Beef Referendum

At annual meeting

Farmers Union slams proposed beef checkoff

HARRISBURG — Although the upcoming Beef Check-off is pegged as a "self help", a voluntary program of beef research, consumer information, promotion and foreign market development, the Pennsyvlania Farmers Union does not agree.

Leonard Zemaitis, Pennsylvania Farmers Union, Administrative Director, says that a truly voluntary program would allow cattlemen to deduct the beef tax at the time of sale only if they wanted it deducted.

Under the rules of the Beef Check-off, deductions of beef tax are mandatory all along the way to the slaughter house. Then the packer turns the money over to the Beef Board created by the Beef Research and Information Act

To get beef tax money returned, cattlemen must prove value added.

Zemaitis says it is mandatory that the tax be paid by the packer. If he can't deduct it from the seller, then the packer will include it in his cost of production. The result will be lower prices for the producer. Zemaitis believes that the producer will eventually pay the total bill.

There will also be cases where value has been decreased. Cattle often changes hands several times before they end up in the feedlot or slaughter house. If the value decreases and then is added back in the next transaction, double taxation will result over a portion of the final sale price, Zemaitis says.

It is difficult to understand why Beef Check-off proponents want a tax based on price, he said. The same people wanted beef imports controlled on a per head basis.

If cattlemen need a program as proposed, it would be better to have the tax a fixed amount per head, Zemaitis concludes.

Robert Mullens of the National Farmers Union told local Farmers Union members to vote against the upcoming Beeferendum. He outlined his reasons at the Pennsylvania Farmers Union meeting this week. At table in foreground is PFU Administrative Director Leonard Zemaitis.

Concerned Cattlemen question referendum

CRESBARD, S.D. — When the Beeferendum was voted on the first time last year, it may have gained over 50 per cent of the vote. But actually only 5.6 per cent of the eligible voters were in favor of it, the Concerned Cattlemen of the Dakotas contend.

Proponents of the upcoming Beeferendum 1980 say that a majority of cattlemen recognize the need for more adequate funding of research and information programs.

It's true, spokesman Larry Lindhorst says, that cattlemen are in favor of such programs. But, there is no way cattlemen will be assured they really want such a program.

A majority to me, Lindhorst says, would mean at least half of the eligible cattlemen who can register to vote.

In the last election 1.8 million persons were eligible. But, he said, less than 18 per cent showed up to register. Of the 322,175 registered voters, 130,464 or 40.5 per cent voted yes.

Lindhorst said that 191,711 didn't vote or voted no.

He said when less than 6 per cent of the grassroots cattlemen vote in favor of something, it is questionable whether or not the electorate is favorable or unfavorable toward the issue.

Few statisticians, Lindhorst said, could say that such a vote is representative with out giving a large margin of error.

Lindhorst said the Concerned Cattlemen are not agaisnt any of the purposes of the Beeferendum. But, they are opposed to the method of taxation, who pays the bill and how those who pay the bill will be represented.

The cow-calf operator will pay the full fare for all programs and costs if Beeferendum 1980 passes, the Concerned Cattlemen taskforse calculates.

Costs to producers, they say, will total more than trucking, commission, yardage, feed and insurance when the feeder-calf producer markets his cattle.

Current marketing costs based on a 50-mile haul will average about 15 per head, spokesmen LeRoy Vogel, Hoven, has determined. Beeferendum programs after the first two years will run as high as $6.40.

"Our earlier estimates were not high enough," Vogel said. "Cost to the producer could run from 1 to 1.6 per cent of the feeder calf selling price."

Our earlier projections included only the out-of-the-pocket Beeferendum costs, he said. Since then we have calculated the extra costs of production that must be passed down in the form of lower prices.

Vogel explained that everyone in the chain above the cow-calf operator can deduct cost of the program from someone else. The packer can reduce prices to the feeder, the feeder to the yearling operator and yearling operator to the feeder-calf producer.

They reduce the price for two reasons, he said, tax they take out for the Beeferendum and administrative costs.

According to testimony in the Federal Register, estimates of all costs to the industry (tax and administration) will be 0.8 cents per pound of beef.

With the price of beef (meat) more than 100 per hundredweight, that additional cost on fat steers for slaughter would come to about $6.40 per head. Vogel said that expense will eighter be deducted or passed along in tax or lower prices to the feeder-calf producer.

On a $45,000 load of calves, he said, that will amount to $720 out of the producer's pocket.

PFU speaks out against Beeferendum

HARRISBURG — The nation's cattle producers will be asked to fork over some hefty outlays of cash if the proposed beef promotion program is approved.

According to estimates made by the National Farmers Union, the "value-added tax" on cattle producers would pull more than $60 million out of producers' pockets during the first year of operation.

The midwest region of the country would contribute over 60 percent of the total under the check-off proposal.

Based on recent USDA figures, Pennsylvania cattle producers during the first year would pay approximately more than half a million dollars in assessments to the Beef Board.

The mandatory check-off, which will be voted on by producers in February, would apply to cattle each time they were sold. The tax, using the "value-added" approach, would "ride" with the animal until it was slaughtered and the funds would then be sent to the Beef Board.

Although Pennsylvania producers would be contributing about $533,000 a year, there would only be 1 member from Pennsylvania apppointed to the 60 member National Beef Board by the Secretary of Agriculture.

This Beef Board would decide, subject to the approval of the Secretary of Agriculture, where the producers' money would be spent.

The federal legislation which allows the establishment of a beef check-off program was passed by Congress in 1976. Under the law, the Beef Board could engage in promotion, advertising, research, and market development programs.

A survey of other federally-sanctioned check-off programs has shown that most of the producers' money has been spent on advertising and promotion. Out of some $42 million collected annually by the five present federal programs, over 60 percent was spent on advertising and promotion.

"The bottom line for any check-off is—will it increase producer income? We have analysed the proposed beef promotion program very carefully and have concluded that it will not, stated Leonard Zemaitis of the Pennsylvania Farmers Union.

Dairy cattle are subject to the check-off tax when livestock is sold for slaughter. Therefore, it is important for both Dairy and Beef producers producers to register for the vote.

To be eligible to vote in the Beef Referendum producers must register at their local ASCS office during the official registration period, January 28 through February 6.

The referendum will then be conducted from February 19 through 22. Producers may register and/or vote in person or by mail. Any person who owned cattle during 1979 is eligible to vote.

Supply and demand vs. Beeferendum

WECOTA, S.D. — The appetite for beef in the United States is more than equal to domestic supplies, the Concerned Cattlemen taskforce reveals.

Because of the domestic demand-supply situation, cattlemen don't need catchy little slogans to get people to eat beef any more than oil companies need slogans to get people to use gas, Chuck Bellman, Wecota, says

USDA statistics bear out that demand for beef exceeds supply. Americans are becoming more dependent on foreign beef each year.

That is why the U.S. is the biggest importer of beef in the world, he said. We import about 10 per cent more than we produce. The percentage will increase under the new counter cyclical beef import law for the next 10 years.

USDA statistics show that as per capita income increases, so does the demand for meat and meat products.

Consumption of beef, veal, poultry, fish, pork and lamb increased from 227 pounds per capita in 1964 to more than 260 pounds in 1976.

The only time meat consumption falls, Bellman says, is in a year like 1973 when supplies of all meats were lower. The big drop in supplies that year was in pork as hog men held back sows and guilts to gear up for greater production

But, Bellman says, when supplies in general dropped in 1973, income received by cattlemen shot up to 100 per cent of parity. That was caused by a six-pound drop in beef and a 12-pound per capita decrease in consumption (supply) of all meats.

On the other hand, supply and consumption of all meats jumped 10 pounds per capita in 1974. The result. Prices dropped to 70 per cent of parity.

The next two years, 1975-76, supply increased another 12 pounds and beef prices continued to drop to 59 per cent of parity.

Bellman says this type of fluctuation shows the inelasticity of demand for meat. (A little too much for too little has a great effect on price.)

Therefore, he says, it will be futile for a producer to control prices through income from a beef tax.

The counter cyclical beef import bill approved by Congress will increase imports by 40 per cent in 1980, according to the Concerned Cattlemen taskforce.

A spokesman, LeRoy Vogel, said that imports will jump from 1.2 to 1.68 billion pounds, equivalent to 200,000 head of live cows.

USDA has calculated that from 1980-1989, 14.277 billion pounds will be imported. The old law would have allowed 13.149 billion pounds.

Translated to cow numbers, Vogel says that an additional 450,000 head will be imported each year and more than 4.5 million in 10 years.

That's enough cow meat, he said, to assure two things. The consumer will become more dependent on imported beef as they have become dependent on foreign oil. And, more cattlemen will be headed for bankruptcy.

The Concerned Cattlemen consistently fought to have imports tied to price, the economic welfare of the industry, he said. The counter cyclical bill, however, is tied to cow numbers and is not in the best interests of the producer.

Proponents of the cow-number theory for beef imports are now supporting the upcoming Beeferendum, he says. Just as the new import bill will hurt the cow-calf operator the most, we find that the cow-calf operator will end up footing the bill and receive the least in return if the referendum passes.

"We didn't support a cow number formula because our studies showed we could have cheap beef even when numbers are low. This can happen during times of overliquidation or when there is an oversupply of competitive meats such as pork or chicken to replace beef in the diet," he said.

York County corn growers discuss grain embargo

BY JOYCE BUPP
Staff Correspondent

BAIR — A constant buzz of conversation filling the York 4-H center during the breaks in last week's corn clinic ranged over a diversity of subjects related to planting, tilling, harvesting and agriculture in general. But one topic seemed to take precedent over all others: the Russian grain embargo.

Almost everyone entertained their own feelings on the subject, although a few were reluctant to share them, and some admitted they just weren't sure what to make of the unbalanced grain price situation.

Merle Orner, Dillsburg, finished as York County's top corn grower this year and then placed second in the state's 5-acre contest. Orner feeds his 60 acres of corn through livestock and figured "it doesn't bother me at all."

"We must do it, but someone will come along and sell to them anyway," was how John Marstellar, Stewartstown, saw it.

"Every time Russia buys, the market goes crazy. But why? Other countries purchase larger quantities and that doesn't create nearly such a fuss." Marstellar crops about 350 acres annually in his grain, hay and livestock operation.

Dairyman Doll Zirkle of Manchester R2 agreed. "Someone will supply them anyway. It's hard to know what is right.

"Our not selling them grain won't change their political outlook, but it is a way we can show them that we don't support their actions. In Pennsylvania, a low grain price will actually benefit many, but not over the country as a whole," Zirkle said.

"It won't affect my grain prices," believes Wilson Nace. "With Mexico taking a portion, that'll help ease the glut."

Niles Hartman, of Dillsburg R3, was adamant on how he felt about the embargo and its implications.

"Anything we can do to put the Russians at an inconvenience we should do," he insists, "Even if we have to take a little less for our grain. I have not use for either individuals or government that lie."

"Is there any chance they'll let anyone besides the farmer fight this war?" wonders Paul McPherson, who grows several hundred acres of grains on his New Park R1 farm.

Corn growing panelists were, from left: John Smith, moderator, Roger Perry, John Marstellar, Geary Huntsberger and Earl Fuhrman.

"I'm a lot more optimistic now than when they first announced the embargo. It's a presidential election year and that's been pulling the market up. Until after election the government will hold up the floor," he said.

Merle Martin of Spring Grove R3 felt much the same way and allowed that the "farmers are being used as a political scapegoat."

And Robert Mays, New Freedom R1, added: "We're feeding them and they shoot back at us. I have mixed feelings."

East Berlin dairy farmer Ralph McGregor believes that "if we use the grain to make ethanol, it'll do us a lot more good here than over there; but we're not ready yet and it'll be a year or two before we're ready. Somehow the Russians must be stopped.

"They need a warm water port and more control in the oil areas; they have little future without those things. If the grain embargo helps, that's fine. I'm more concerned that we as a country aren't more ready to utilize that grain in other ways than for exports."

Walter Johnson, secretary-treasurer of the Master Corn Growers Association felt, like many others, the Mexican purchases would help bolster and sagging prices. But "if they want to resell it, we have no way of stopping them."

Pro or con, there was definitely a great deal of interest in what was going to happen to the millions of metric tons of grain left hanging in the balance of the political tug-of-war.

In search of answers, farmers kept the phones ringing almost non-stop at the Eastern Boulevard offices of the York County Agricultural Stabilization and Conservation Service, headed by Peggy Ann Carnill.

"There's been an enormous interest in finding out if there would be a set-aside," she said. "There was still nothing official and they've given us no indication at all of what will happen now."

Airville 4-H awards given

BY PATRICIA GREEK
Staff Correspondent

AIRVILLE — At a recent meeting of the Airville Milk and Honey 4-H Dairy Club, outstanding members were chosen for 1979. The award winners were selected by secret ballot with all members voting.

The Outstanding Officer Award was presented to Abbe Johnson, Airville. Abbe received this award for being the officer to do the most for the club this year. She also was the only one who had perfect attendance all year.

The coveted Outstanding Senior Member Award was a repeat from last year. Once again the recipient was Barb Kilgore, also of Airville. To receive this award, Barb did outstanding work in all areas including helping junior members with their projects.

Outstanding Junior Member was presented to Wendy McCleary, Stewartstown. Wendy worked extremely hard with the June is Dairy Month Display and did excellent work with her project animal.

A surprise this year was a tie for the Outstanding Rookie of the Year honors, which was given to two sisters. Emma and Anna-Mae Ettinger, Brogue, both did very well in their first year of 4-H, to receive the honor.

New officers for 1980 were also selected at this meeting. They are: President, Greg Fantom; Vice-President, Patty Greek; Secretary, Jana Beth Fantom; Treasurer, Barb Kilgore; News Reporter, Loretta Cooper; Song and Game Leaders, David King and Anna-Mae Ettinger.

Members are looking forward to another activity-filled year. Some of the events they will be staging or attending are: a tour in April, a June is Dairy Month Display, a softball game, judging contests, and the county 4-H Roundup. This will be held in conjunction with the York County 4-H Fair in August at the York Fairgrounds.

New members are always welcome.

Make Your Home a "NEW" Home

Join the National Energy Watch (NEW)

NEW was set up by electric utilities nationwide to give special recognition to energy-efficient homes A PP&L residential consultant can check your home to see if it qualifies for NEW membership. If it does, you'll receive a special NEW decal and membership certificate.

If your home doesn't meet NEW standards .

Let PP&L Survey Your Home

A PP&L residential consultant can make a detailed free survey of more than two dozen items in your home — like insulation, caulking and weatherstripping, water heaters and piping — and then give you recommendations on how to make your home more energy efficient to bring it up to NEW standards.

Or, if you prefer ..

Check Your Home Yourself

Get PP&L's free do-it-yourself energy audit. Use this easy checklist to go through your home — from attic to basement — to find areas where potential energy savings can be made

Let PP&L help you save energy. Mail us this coupon today!

WANTED:

Tractor Specialists to make and sell profit!

As a Case dealer you sell products that turn profits — for you and your customers

You ll be the Tractor Specialist With 14 sizes of 2 wheel and 4 wheel drive tractors plus heavy duty tillage tools And that s it! Our way is efficient It lets you concentrate your sales and service efforts Your parts inventory is clean and financially manageable And your used equipment lot deals mainly with fast moving tractors

If you d like to be doing better than you are maybe we can do something about it with a Case Tractor Specialist franchise Ask about our light construction line too Call or write for full information

Are you interested? Please contact

CERTIFIED SERVICE

SERVICE SPECIALIST

CALL 626-4705

1. Does your tractor need an overhaul? Tune-up? Filter change?
2. Do you have oil leaks on your equipment? Where oil leaks out dirt & water can come in.
3. Service your skid-loader or front end loader! Chain adjusted? Filter change? Tune-up?
4. Bring your loader buckets in, we have heavy duty cutting edges to put on.

Why Calf Hutches?

To raise calves inside a dairy barn the oxygen level gets too low. A calf does not have the resistance to fight against the high bacteria level. But putting a day old into a well bedded hutch where there is plenty of fresh air and sunshine, it can grow to be a healthy, hungry, strong replacement stock. Mother Nature can fight a lot of diseases that we are not aware of. To feed calves on the outside is easy and brings joy to see a healthy calf. This holds true for dairy and beef. One calf is worth much more than a hutch.

Save $10.00 a hutch on package deals.

Plywood is dipped in woodlife for longer life to the hutch.

HOW TO USE BING!

Use Bing to sire above average strength and dairyness. They are functionally correct with extremely good legs. Very correct teat size with good milkout qualities. The Bing's are a very clean bone group of great milk cows.

These Bing daughters are at the Arthur and Dale Peterson Farm of Alloway, New Jersey. The Peterson's are the breeders of the Bing bull and proud owners of many of Bing's daughters.

What's he doing baling at this hour?

Whether it's early in the morning and there's still dew on the windrows, or late in the afternoon . . . he's out baling! He's treating his hay with Beacon Hay Pre-Serv*, and that means he can bale at up to *25% moisture!* So, he can bring in his hay early in the day, perhaps before bad weather hits Or he can bale two or three hours later in the afternoon Or when the hay is almost field cured, but not quite

What's more, he'll have better hay

Because of its higher moisture content, there's less leaf shatter There are more high-protein leaves that will turn more milk production. No wonder we call hay treated with Beacon Hay Pre-Serv SuperHay!

Start using this food-grade blend of preservatives, antioxidants and flavors on your hay yourself Start making SuperHay, and start making super profits! Call your Beacon Advisor now.

Vo-Tech students benefit

Karen Brosius thrives on teaching, growing

BY SALLY BAIR
Staff Correspondent

Karen Brosius loves talking about her job. But more than talking about it, she loves doing her job, which is teaching floriculture at the Willow Street Vocational-Technical School.

"I love it," she states simply. "It is never boring, it is never repetitious. I move around a lot and there is never a dull moment."

How did she get a job she enjoys so much? "I was lucky," Karen says. She was married in August to Mahlon Brosius who grows mushrooms in Chester County with his father, Charles C. Karen graduated from Pennsylvania State University the day before the wedding and began teaching just after the honeymoon.

Karen did not begin studying horticulture at Penn State with teaching in mind, but through a friend she decided to study agriculture education which allowed her to teach. Now she is glad she made the switch. "This is so much more diverse and flexible than working in a florist shop," she says.

Karen points out that she enjoys the students she has because they have chosen to take the course, and there's a waiting list of others who would like to be there. Therefore, Karen says, "The girls know they have to produce, because other people want to take the course."

Sometimes the nature of the work comes as a surprise to students entering the first year of the two-year course; it is not all flower arranging. Karen explains, "We have some theory every day for 20 minutes to ½ hour. Half of the course deals with floral design and the management of a flower shop. And half of it is greenhouse work and floral crops. They learn to grow seasonal crops, and they have to have the experience of using fertilizer and learning pesticide application."

Students learn soil types, fundamentals of greenhouse management and basic floral design. There are 13 basic types of arrangements they learn to make, and they learn to identify 100 foliage plants during the course.

Since actual flower arranging is the real reason most of the students choose the course, Karen says they are disappointed when they find out they must practice the 13 basic flower arrangements with plastic flowers. It's the only practical way, Karen notes, because of the expense of fresh flowers. Students make the 13 designs three times before moving on to fresh flowers.

Once they get into the real thing, Karen helps the students keep an "artist's portfolio" of their designs. By taking pictures of what they've created, they will have a record to show future employers. "We take pictures of their finished design," Karen notes. "It makes them conscious of doing it well, and it makes them think that what they're doing reflects on their future job, so they do it better."

Preparing for a job is the whole thrust of the course Karen teaches, so seniors get a unit on preparing for job interviews. Karen said, "We role play job interviews, and the girls learn how to go out and meet with prospective employers."

Karen said that most of her students have the dream of working in a florists' shop or having one of their own. There is a program of "co-op" work during the senior year, which allows work experience as part of the school work. Karen adds, "It helps them get great experience while making money, and sometimes they have a ready-made job when they graduate". She said students are happy when "family and friends ask how to do something."

Karen became interested in horticulture through "a friend whose mother had a greenhouse. She started showing me around the greenhouse and let me have plants. You should have seen my room at school. I had a seven foot Norfolk Pine, and we were always carting flowers back and forth to school."

Apparently she has a natural green thumb, because she says her present home is filled with plants, and she's always interested in having new ones. She admits to talking to her plants, but laughs, adding, "When you talk to them a lot that means you're paying attention to them, picking the dead leaves off and watering them enough."

Students in the floriculture class at Willow Street Vo-Tech learn a variety of skills in the two-year course. Teacher Karen Brosius, center, gives some advice on making a corsage to Mary Ann Huddle, left, and Tracie Ewing.

Homestead Notes

Karen also serves as advisor to the Hans Herr Future Farmers of America Chapter at the school, and praises its benefits to her students. "They learn a lot about leadership qualities, and they get the benefit of participating in FFA contests.

One of her duties is teaching night school one night a week, but for Karen it's not a chore. "It's really fun, because they all want to be there. My students ages range from 25-50, and they really want to learn. We learn to make a corsage and an arrangement. It's fun and I include a little theory with the work."

Since she is under a twelve-month contract, her summers are busy at the school too. She said, "The girls are starting now to plan their summer projects. They will have vegetable or flower gardens, and I will visit the projects every two weeks." She added that girls can also choose window boxes, or choose to have a garden in the plot available in the court yard at the school for that purpose. She will also be attending summer FFA functions.

While working with fresh flowers is one of the joys of taking the floriculture course, Karen notes that they also work with arranging silk flowers. They learn to dry flowers and make "Williamsburg under glass" designs as well. They have even gathered and dried their own "weeds" for use in arrangements. "We must be really careful with our money," she noted.

Asked about future plans for the class, Karen lights up as she talks about her "dream." "When I was a student teaching in Bethlehem, I worked with horticulture therapy. I would like to start a program in our nursing homes, but it will take a lot of setting up." Karen explains that horticulture therapy is used with nursing homes and with the mentally ill to draw them out of their shells. In her student teaching project, they visited a nursing home every day and worked in a vegetable garden. Karen was very pleased with the interest the elderly patients took in what was being done.

Karen also works with the craft committee at the school, which is made up greenhouse growers, florists and other people in the industry. "They advise us and tell what the students need to be on the entry level of job skills," Karen said. "They are so helpful. I don't know what we'd do without them."

Although Karen grew up near Allentown, she is now living on a farm near West Grove, and "loves it." She has an herb garden and likes to preserve vegetables in the summer. "I love to go to the garden in the summer and scrounge for whatever flowers are there. Making an arrangement from that is a real challenge," she says with a smile. She also enjoys all kinds of crafts and sewing.

The floriculture classroom at Willow Street is filled with examples of the handiwork of the students, but it is also filled with the pleasant atmosphere provided by someone who is really happy with their position. Karen Brosius couldn't be happier.

Joanne Coccio, left, and Karen inspect one of the many hanging baskets they care for in the greenhouse.

Karen Brosius is as much at home in the greenhouse as she is in the classroom.

Farm Women Societies

Berks Co. Society 1

The Berks County Society of Farm Women, Group #1, held their monthly meeing at the home of Mrs. Agnes Noll, R.D. 1 Oley.

Mr. Gery Fisher, representing the 4-H of America, presented slides of his trip to Egypt on the "World Food Conference." He spent two weeks learning and discussing various methods of food consumption and economic conditions of the world.

Sixteen members answered roll call to the question, "Did you make any New Year's Resolutions?"

Members were reminded to send a card to Mrs. Marion Haas, who is in the Reading Hospital.

The State Convention and County Board meeting was discussed by Catherine Yanos, Ruth Walters, and Lillian Hetrick.

Donations were given to the 4-H Development Fund and the Red Cross.

Ruth Walters discussed the Easter candy project which will begin February.

Installation of Mrs. Dorothia Buch, Earlville, as a new member was conducted by President, Catherine Yanos.

Dates to remember are Game Party at Berks Heim on April 17, Spring Rally on May 1 at York, Berks Heim Tea on May 7 and Berks Heim picnic on June 8.

Plans are being completed for Group #1's 40th anniversary celebration on April 30 at the Voc. Ag. Center, Bernville.

The next meeting will be held at the Oley Legion Dinner, Oley at 1 o'clock on Feburary 13, featuring home made valentines for your husband.

Berks Co. Society 3

Berks County Society of Farm Women 3 held a banquet at Stahl's Steak and Seafood Restaurant, New Berlinville. Mrs. Harvey Moyer and Mrs. Richard Loeb were appointed delegates to the state Farm Women Convention in January. Mrs. Joseph Bartholomew, reported on fruit baskets and monetary donations given to needy families in the community.

Officers for 1980 were installed.

Berks Co. Society 6

Twenty members attended the January meeting of the Berks County Society of Farm Women 6 at the home of Mrs. Steve Hetrick, Oley.

Members decided to purchase bed pads instead of making them for Berks Heim. Upcoming events announced included Bingo at Berks Heim in April; county hoedown on April 19; Spring Rally at York on May 1; and Berks Heim tea on May 17.

The next meeting will be held at the home of Mrs. Richard Schlegel, Boyertown R3, on February 19. The by-laws will be read at that time.

Berks Co. Society 12

The January meeting of Farm Women 12 was held at the Bernville home of Rita Stump The women made up the calendar for the coming year, with several special events planned.

Pauline Hartranft brought along an ashtray center piece which she made and handed out instructions on how to make them. The next meeting will be held at the Bernville home of Pauline Hartranft, on February 11, at which she will demonstrate how to make the center piece.

Cumberland Co. Society 20

Cumberland County Farm Women Group #20 held its January meeting at the home of Mrs. Beatrice Strock, Mechanicsburg.

The meeting was called to order by president, Jean Basehore. Roll Call for the evening was "One thing your husband got you for Christmas".

A report was given by members attending the State Farm Women's meeting at the Farm Show.

The 1980 program booklets were given to each member and programs and committees were discussed. The program committee is Patsy Harris, Chairperson, Pat Deitch and Pat Tack.

Mrs. Leah Hoke, Mechanicsburg, was a guest at the meeting.

The next meeting will be held February 20th at the home of Mrs. Pat Tack, Carlisle.

Dauphin Co. Society 16

The first meeting of the new year for the Dauphin County Farm Women Society 16 was held in the home of president Sylvia Coble on January 15. Members held a "Happy Birthday to Us" party, with each member bringing a small homemade gift.

Twelve members and two guests answered roll call to the question, "How would you like to celebrate your birthday?"

A baby gift was presented to Marion Messick for the birth of her son, Neal Ryan, in December. Linda Brandt was elected to the office of historian to keep a scrapbook of activities.

The next meeting will be held February 19 at the home of Martha Hertzler at 7.30 p m. A trooper from the Harrisburg State Police will present the program "Lady Beware."

Lancaster Co. Society 6

Three new members were installed into the Lancaster County Farm Women Society 6 when they met at the Elizabethtown Church of the Brethren on January 12. New members were Mrs. Larry Baum, Ruth Weidman and Mrs. Laverne Oberholtzer. Hostesses for the meeting were Mrs. Sarah Holsberg, Katie Brandt, and Margaret Bowers.

A donation was made to Randy Garman, the policeman who was injured in Elizabethtown in the recent tragedy.

Edwin Myers, Elizabethtown, showed slides of streams, old mills, bridges, and farms in Lancaster County.

The February meeting will be held at the home of Mrs. Harry Shanks.

Lancaster Co. Society 7

Fire Safety Tips were the topic of the January 12 meeting of Lancaster County Farm Women Society 7, which was held at the Paradise Fire Hall. Gary Walters, Ray Hottenstine, Bruce Lefever and Robert Ranck, showed a film on fire fighting and instructed the group on safety rules.

The February meeting will be held on February 9 at the home of Nora Lawyer, Paradise.

Lancaster Co. Society 9

Lancaster County Farm Women Society 9 met January 10 at the home of Mrs. Charles Fink, with Mrs. Wayne Shaw, Mrs. Ben Stoner and Mrs. Glenn Morrison serving as co-hostesses. Twenty-two members responded to roll call, by giving their New Year's resolutions for 1980.

It was reported that 11 members attended the State Farm Women Convention in Harrisburg on Monday, January 7.

The February 14 meeting of the Society will be held at the home of Mrs. Paul Zercher, at 9:00 a m. to sew cancer dressings. Members are asked to bring a sandwich and a needle and thimble.

Lancaster Co. Society 13

Marian Campbell, director of the Lancaster Center for the Blind, was guest speaker for Farm Women Society 13 at their January 11 meeting. Mrs. Campbell explained the work of the Center and discussed the programs available to the blind.

Mrs. Grace Longenecker, Talmadge, was installed as a new member. Mrs. Ada Miller, Lampeter, was hostess, with Mrs. Lena Jones serving as co-hostess.

Ways and Means Chairman Mrs. Ada Bomberger, passed out envelopes for a "Bakeless Bake Sale." Reports on the state convention in Harrisburg were given by Mrs Nettie Bare and Mrs. Lydia Denlinger.

Society 13 will entertain Society 4 on March 8 at the Farm and Home Center.

Lancaster Co. Society 21

Lancaster County Farm Women Society 21 met January 10 at the Lancaster County Library Center in Quarryville with 15 members present.

Library coordinator, Mary Ann Cox, showed a film entitled, "A Day in the Life of Bonnie Consolo," about a handicapped wife and mother who was born without arms.

Alice Ressel gave a report on the State Farm Women Convention in Harrisburg. A suggestion was made that the by-laws be reviewed and updated.

Lancaster Co. Society 22

Lancaster County Farm Women Society 22 held its January meeting at the home of Mrs. Henry Hess, 15 Batt Avenue, Willow Street

Ann Diller reported the membership is low at both state and county levels, and recommended bringing in new members. It was decided to continue to support the foster child, Maria Rosa Perez of Guatemala, for another year.

New by-laws were reviewed, revised, and adopted. A discussion was held on a project geared to visit, phone or help elderly persons who have no family.

Ann Diller, Barb Martin and Millie Landis gave a very interesting and informative report on the state convention held during Farm Show Week. Members were reminded of the Spring Rally to be held May 1 at the York Fair Ground in York County.

A review of the book, "What Robs Us Of Our Beauty" by Joyce Landorf, was given by member Sherry Eshleman. It was a very interesting, spiritual and uplifting experience

The next meeting will be held on February 12 at the home of Mrs. John Harnish, 1036 Beaver Valley Pike, Lancaster

Lebanon Co. Society 14

Lebanon County Farm Women Society 14 held their January meeting at the home of Lorraine Yeager, with 14 members and one guest present.

Patty Buchmoyer gave a biography of the life of her grandmother, Sarah Buchmoyer. Pads were made for use at nursing homes.

The next meeting will be held February 19 at the home of Rosie Gingrich.

Junior Cooking Edition

Cold winter afternoons are the perfect time for junior cooks to take over the kitchen and prepare some new and old favorites. This week's Junior Cooking Edition is featuring several snack and dessert foods for the young cooks in the family.

Please forward your favorite recipes to the Junior Cooking Edition, Lancaster Farming, Box 366, Lititz, Pa. 17543.

Be sure to include your complete name, age and address. Also list the complete ingredients needed as well as pan size and cooking time.

JANUARY GOODIES

½ cup sugar
1/3 cup molasses
1/3 cup water
1/3 cup butter

Combine ingredients and cook until syrup forms a hard ball when dropped in cold water (265 degrees). Pour on buttered plates and cut in squares.

BROWNIES

4 ounces unsweetened chocolate
2/3 cup shortening
2 cups sugar
4 eggs
1 teaspoon vanilla
1 ¼ cups all-purpose flour
1 teaspoon baking powder
1 teaspoon salt
1 cup chopped nuts

Heat oven to 350 degrees; grease 13" x 9" x 2" baking pan. Melt chocolate and shortening in large saucepan over low heat. Remove from heat; mix in sugar, eggs and vanilla. Stir in remaining ingredients. Spread in pan. Bake 30 minutes or until Brownies start to pull away from sides of the pan. Cool slightly. Cut into bars about 2 x 1½ inches.

Annetta Hurst, Age 9, Narvon

CORN PONE or CORN BREAD

1 cup sugar
1/2 cup shortening
1½ cups sweet milk
1½ cups white flour
1½ cups corn meal
2 eggs
3 teaspoons baking powder
1 teaspoon salt

Mix sugar, shortening and eggs. Beat well. Add milk and sifted dry ingredients. Mix well. Bake in Pyrex loaf pan at 325 degrees about 40 minutes. Serve with fruit, milk and sugar.

Dorcas Nolt, Age 9, New Holland

FROZEN BERRY FLUFF

2 cups (1 package) crisp graham crackers, crumbed
5 tablespoons butter
2 egg whites
1 tablespoon vanilla
1½ cups sugar
2 cups fresh berries (strawberries, raspberries or blueberries)
1 cup heavy cream, whipped

Mix cracker crumbs and butter. Press into bottom of buttered 9" x 13" pan. Bake at 350 degrees for 8 minutes. Beat egg whites and vanilla slightly in large bowl, gradually beat in sugar and berries. Beat at high speed 12 to 15 minutes until mixture is fluffy and has large volume. Fold in whipped cream, spread over crumb crust. Freeze overnight. Cut in squares or wedges to serve. Makes 1 9" x 13" pan full.

Barbara Fisher, Age 11, Paradise

CARAMEL POPCORN

7 quarts popped corn
2 cups brown sugar
½ cup molasses
1 cup butter
1 teaspoon soda
1 teaspoon salt
1 teaspoon vanilla

Combine sugar, molasses and butter. Cook until slightly thick, add vanilla, soda and salt. Pour over corn. Heat in warm oven for two hours, stirring occasionally. Peanuts can be added.

VINEGAR CANDY

2 cups sugar
½ cup vinegar
2 tablespoons butter

Combine ingredients and cook until mixture is brittle when dropped in cold water (270 degrees). Pour onto buttered plates. Mark into squares while warm or roll into small balls. (This is an excellent hard candy - an old family favorite.)

EXTRA PROTEIN IN MOEWS WAXY-MAIZ HYBRIDS

Cattle and hog feeders in this area should plant WAXY-MAIZ hybrid seed-corn. College feeding trials show 10% better gains on 7% less corn with WAXY fed to cattle. We have several WAXY-MAIZ Hybrids for this area. They yield the same as yellow dent corn, but have higher energy starch. Hogs gain better and get to market faster on WAXY-MAIZ. We can show you how to boost cattle and hog feeding profits.

Ida's Notebook

Ida Risser

There are days when things go badly.

A heifer gets her leg caught between a stanchion and a stone wall and has it cut severely.

The milker pump breaks down the night you milk rather late and the serviceman is twenty miles away.

The hose comes off the new waterbowl and makes a real mess before it is discovered.

But then along comes a day that you wish had a "handle" on it so that you could hold on tightly and prolong its leaving.

On such a day, the sun rises pink, yellow and peach over the trees on a nearby island.

A flock of pheasants play a game of chase under the evergreens at the bottom of the garden.

And as you do the breakfast dishes you notice a pair of cardinals in the big apricot tree and a blue jay sits on the rail fence which your husband and sons so kindly put up last Fall. (I've always wanted a fence to completely surround my garden and this is a step in that direction as I've had so much sweetcorn eaten and so many beautiful vegetables trampled by cows and heifers).

I plan to bake a coconut cream pie for dessert and blueberry muffins for breakfast. The day has passed with several small jobs done but no feeling of urgency in finishing a job.

Some overalls had patches put on the knees, the house plants were watered, a letter written to an ill relative and the stair steps painted.

Too soon Spring will come with its rush of necessary work. So while Winter is here, I hope to enjoy some time to sit down and read some of the many books which I received as gifts.

Tallest Structure

The tallest structure in the United States is the television tower at Blanchard, N D , which rises slightly more than 2,000 feet above the Dakota plains

Time extension for milk comments

NEW YORK, N.Y. — Dairy farmers, milk handlers and consumers will have an additional 45 days to file comments and proposals on the issue of reconstituted milk, U.S. Department of Agriculture (USDA) officials announced today

The original comment period which would have expired Jan. 15 has been extended to Feb. 29.

P.R Smith, assistant secretary of agriculture for marketing and transportation services, said requests for the extension were granted because the proposals submitted by the Community Nutrition Institute (CNI) are national in scope and require extension study by those affected.

The CNI proposals would remove reconstituted milk from the Class I pricing provisions of federal milk orders. Reconstituted milk is made by combining whole milk powder or nonfat dry milk with water and butterfat.

Currently, all milk products used for fluid consumption are priced at the Class I level, the highest-priced class under the federal milk orders

Smith said requests for extension of the comment period on the proposed hearing were received from several interested parties including members of Congress, the National Producers Federation (NMPF), the Milk Industry Foundation (MIF), and the State of New York, NMPF asked for an additional 180 days and the others for unspecified amounts of time to complete studies on the CNI proposals.

The asssistant secretary pointed out that the extension is consistent with the administration's policy, emphasizing that the public should be given adequate time to study and become familiar with issues that have national ramifications and are being considered by the government.

Notice of the granting of the extension will be published in the January 18 Federal Register. Comments and proposals, with three copies, should be sent to the deputy administrator, Marketing Program Operations, Agricultural Marketing Service, USDA, Washigton, D C 20250.

Broiler placements slip slightly

HARRISBURG — Placements of broiler chicks in Pennsylvania during the week ending January 12, 1980 were 2,024,000, one percent below the previous week, according to the Pennsylvania Crop Reporting Service.

The placements were 11 percent below the same week in 1979. Average placements in the Commonwealth during the past nine weeks were three percent above a year earlier.

In the 21 poultry producing states, placements were 77,924,000. This is three percent above the previous week and six percent above the same week a year earlier.

Average placements in the past nine weeks were four percent above a year ago.

Broiler-fryers slaughtered in Pennsylvania under federal inspection during the week ending January 2 totaled 1,717,000, with an average liveweight of 4.08 pounds.

***

U.S. farm residents are now outnumbered about 30 to 1 by the rest of our population.

HOW TO STORE HERBS AND SPICES

Before you bring spices home from the grocery store, think about how and where you'll store them.

Spices contain volatile oils which give them flavor. If the oil evaporates, the flavor is lost. To prevent such loss, buy spices in quantities you can use before they become stale.

Protect such spices as paprika, curry powder, and mustard from direct sunlight to avoid loss of color. Keep white or light-colored spices from long exposure to light; they tend to yellow and develop off flavors.

Always keep spices in tightly closed air tight containers and in a dry place. Dampness may cause them to cake.

Avoid storing spices over a range or other heating unit. Keep only the spices that you use frequently on a spice rack unless the rack is located inside a cabinet or in a cool dark place.

There is no rule for the correct amount of seasoning to use in cooking since each is different. But many cooks are either too timid or too enthusiastic about using seasonings

In general, start with one-quarter teaspoon for each pound of meat or pint of liquid. Be conservative with red pepper, curry, chili, and garlic powders–start with one-eighth teaspoon instead.

Ground spices may be added near the end of the cooking period since their flavor is released immediately. On the other hand, whole spices are best for slow-cooked dishes such as stews. The long simmering brings out their full flavor and aroma.

What's the Best Way To Buy Eggs

Eggsactly what is a Grade A egg?

The grade printed on an egg carton indicates quality not size. Grades AA, A, B, or C indicate the interior quality of the egg and the quality of the shell.

The grade reflects the thickness of the white (albumin), the roundness of the yolk, and the size of the air cell. Egg sizes, on the other hand, are a measure of weight per dozen. Jumbo means that a dozen eggs weighs at least 30 ounces; extra large, 27; large, 24; and medium, 21.

To determine a good buy in eggs, divide the cost of large eggs (24 ounces per dozen) by 8 to get the cost of 3 ounces. If three ounces of the next size larger is less than the cost of 3 ounces of large eggs, it is a wise purchase.

Extra large eggs are frequently one of the best egg buys because the consumer frequently is not charged full price for the last 3 ounces.

When purchasing eggs, also consider cleanliness and cracks. Use clean, uncracked Grade A or above eggs in uncooked foods and drinks.

A cracked egg can be used for cooking if the inside membrane is intact. But if the contents are leaking, throw the whole egg away; dirt may have gotten in.

Use Caution On Water Heater Insulation

Homeowners have been encouraged in recent years to use insulation kits on electric water heaters to help conserve energy. However, certain precautions should be taken in using these kits.

To reduce the possibility of an electrical fault, and possible fire hazards within the water heater, don't put supplementary insulation over the access covers, place it over controls or over house wiring connection boxes and covers on these connection boxes.

The use of supplementary insulation on household electric storage tank water heaters, using specific installation procedures, has not yet been investigated by Underwriter's Laboratories.

Electric water heaters are usually provided with thermal insulation located between the water tank and the outer shell.

When the heaters are tested by Underwriter's Laboratories, temperatures on electrical parts and wiring are required to be low enough to reduce damage or deterioration of electrical wiring insulation. By adding additional insulation, the possibility of causing the wiring insulation to deteriorate is increased.

Nutrition Value

Turkey is exceptionally high in protein, low in calories and low in cholesterol It is also easily digested According to the National Turkey Federation, turkey is the only meat that costs less per pound today than it did 5 years ago

End your meal with a scrumptious cake

There's nothing like a delicious cake to finish off a family meal. Simple or elegant, a scrumptious cake is sure to please every member of the family. Readers have sent in a wide variety, so read on, then get ready to bake and enjoy.

SOUR CREAM POUND CAKE

2¾ cups sugar
1 cup butter
6 eggs
3 cups sifted flour
½ teaspoon salt
¼ teaspoon baking soda
1 cup sour cream
½ teaspoon lemon extract
½ teaspoon orange extract
½ teaspoon vanilla extract

In mixer bowl, cream together sugar and butter until light and fluffy. Add eggs one at a time, beating well after each addition. Sift together flour, salt and soda; add to cream mixture, alternating with sour cream Beat well after each addition. Add extracts individually to mixture, blending well after each addition

Pour batter into greased and floured 10 inch tube pan. Bake 1½ hours at 350 degrees. Cool 15 minutes, then remove from the pan.

Judy Donaldson, Burnsville, W.Va.

GRANDMA'S APPLESAUCE CAKE

2 cups applesauce
¾ cup lard
1½ cups sugar
1½ cups raisins
3 cups flour
2 teaspoons soda
1 teaspoon cinnamon
½ teaspoon nutmeg
½ teaspoon cloves
1 cup chopped nuts

Combine sugar and lard. Mix well Add applesauce, then add mixed dry ingredients. Add raisins and nuts. Bake in sheet cake pan till toothpick comes out clean

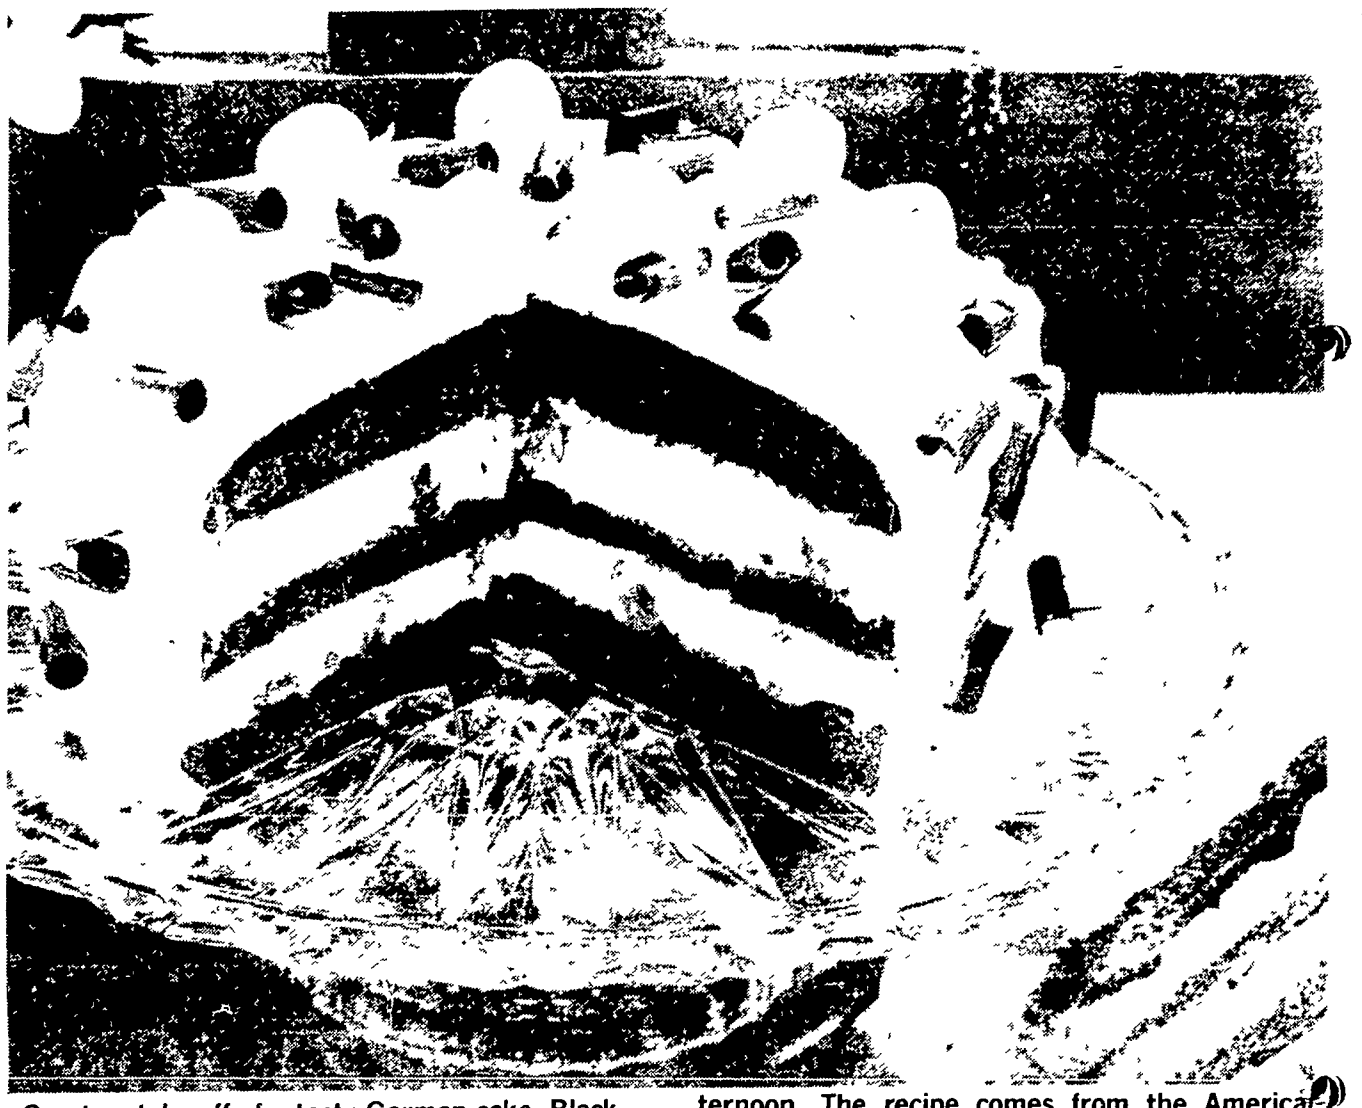
Marie Martin, Ephrata

CHOCOLATE FEATHER CAKE

1 cup cocoa
2 cups sugar
3 cups flour
2 teaspoons soda
1 teaspoon salt
2 eggs
1 cup soft shortening
1 cup hot water
1 cup buttermilk
2 teaspoons vanilla

Sift dry ingredients together in mixing bowl, add other ingredients in order given Put in 9" x 13" x 2" cake pan and bake at 350 degrees for 40 minutes

Jan Schreiber, Newport



Create a take-off of a tasty German cake, Black Forest Cherry Ice Cream Cake. It's a perfect partner for coffee when having guests in the afternoon. The recipe comes from the American Dairy Association and Dairy Council and the test kitchens of United Dairy Industry Association.

LUCY JOHNSON CAKE

¼ pound (½ cup) butter
2 cups sugar
2 cups flour
2 eggs
2 squares semi-sweet chocolate
½ cup boiling water
1 teaspoon baking soda
½ cup buttermilk
1 teaspoon vanilla
¼ cup ice water (very cold)

Cream butter and sugar Melt chocolate in boiling water Cool Add eggs to butter and sugar. Measure dry ingredients Alternate to cream mixture with buttermilk and vanilla Add chocolate mixture. Then add ice water Pour into greased and floured 13" x 9" pan Bake at 350 degrees until toothpick comes clean when inserted, about 40-45 minutes

Icing ¾ cups confectioners sugar
1 square semi-sweet chocolate
¼ pound butter
⅓ cup evaporated milk (small can)

Cook over medium heat for 12 minutes until thick and smooth Spoon over cake

Belinda Myers, Dallastown

PINEAPPLE CAKE

1 yellow cake mix
1 cup milk
1 package instant vanilla pudding
1 8-ounce package cream cheese
1 can (20 oz) crushed pineapple, drained

Bake the yellow cake mix according to directions for 13" x 9" cake and cool Whip the milk, vanilla pudding mix and cream cheese together and spread over cooled cake Spread drained pineapple over the pudding Top with whipped topping

Lois Bare, Mount Joy

CHOCOLATE ECLAIR CAKE

1 (1 pound) box graham crackers
2 small packages instant French Vanilla pudding
3½ cups milk
1 (9 oz) container frozen whipped dairy topping

Butter bottom of 9" x 13" baking pan, line with graham crackers Mix pudding with milk Beat at medium speed two minutes Blend in whipped topping Pour half of the mixture over graham crackers Then place second layer of crackers over pudding Pour remaining pudding mixture over this Cover with more crackers Refrigerate for two hours then frost

FROSTING FOR ECLAIR CAKE

6 tablespoons cocoa
2 tablespoons oil
2 teaspoons white corn syrup
2 teaspoons vanilla
3 tablespoons softened margarine
1½ cups powdered sugar
3 tablespoons milk

Beat together all ingredients until smooth. Spread over cake Refrigerate for 24 hours.

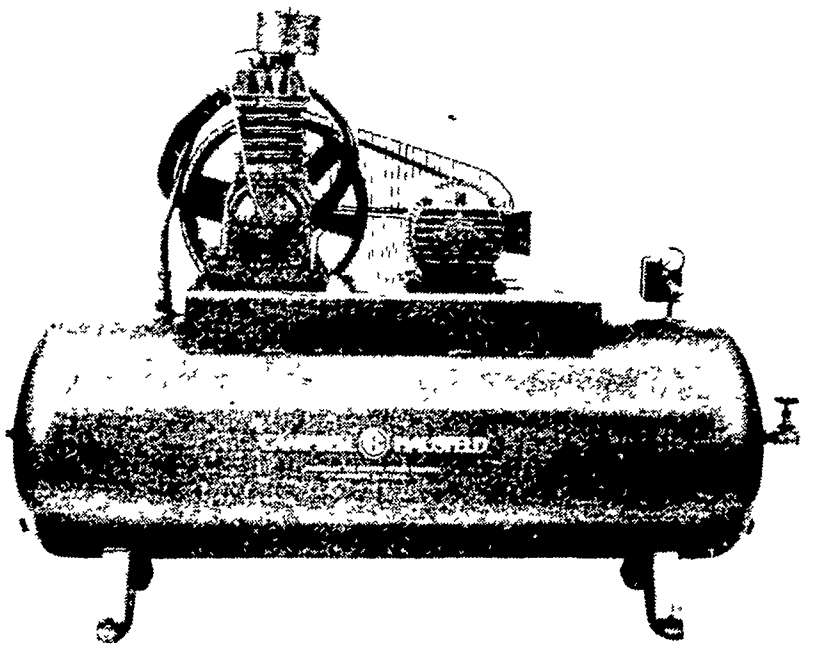
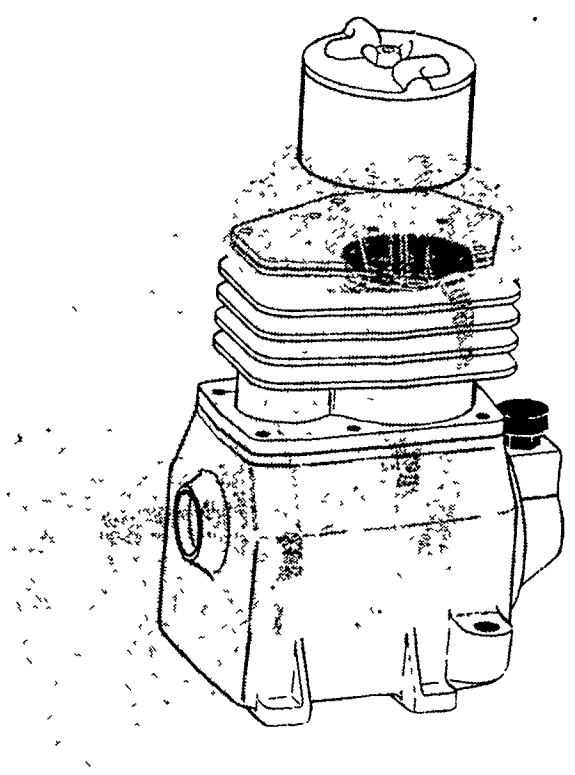
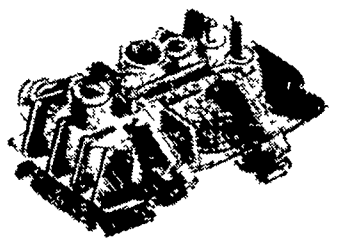
CAMPBELL HAUSFELD



"A two stage compressor worth the name begins with intelligent design"

That means Simplicity with a capital "S". The more unnecessary elements you eliminate, the better compressor you're going to have. At Campbell-Hausfeld we threw out those troublesome spring loaded valves that are buried inside most compressors, and we designed our own simple plate and reed valve system. you can change the valve in 20 minutes - if it ever needs changing. We make the big low-pressure piston of aluminum and the small high-pressure piston of cast iron so that they weigh the same — and balance each other. We cast the head of aluminum because aluminum dissipates heat quickly. We improve reliability, simplify assembly, and hold costs down by making cylinder heads, pistons, cylinder blocks and valves interchangeable between models.





We build these compressors so that nothing *can go wrong — but if it does go wrong we make it* easy and inexpensive to fix. That's what we mean by Simplicity with a capital "S."

(Continued from Page C9)

CHOCOLATE CHEESECAKE

Combine in blender:
4 eggs
1½ cups sugar
6 tablespoons cocoa
1 teaspoon vanilla
8 oz. cream cheese

Cover and blend till smooth. Pour half into a bowl, then add another 8 oz. cream cheese into blender, blend until smooth. Stir 4 cups of sour cream into mixture in bowl, then blend in mixture from blender. Pour chocolate batter into chocolate crust in a spring-form pan. Bake in 350 degree oven for 1 hour, 20 minutes or until edge is set and dull in color, while the center is glossy looking.

Crust: In a 9-inch springform pan blend 2 cups finely crushed chocolate wafer cookie crumbs with ¼ cup sugar; ¼ teaspoon cinnamon and 7 tablespoons melted butter. With a spoon, press crumbs over bottom and three inches up the sides. Cream Topping for Chocolate Cheesecake: In a small mixing bowl, cream 3 ounces cream cheese until soft. Gradually add ½ cup whipping cream. Mix at high speed to stiffly whipped cream. Blend in ¼ cup powdered sugar and 1 tablespoon creme de cocoa or a coffee flavored liquer. Cover and chill till ready to use. Pile topping in the center of the cake. Grate semi-sweet chocolate over cream.

B. Russell, Pine Bush, N.Y.

TROPICAL ISLE CHIFFON CAKE

2¼ cups sifted cake flour
1½ cups sugar
3 teaspoons baking powder
1 teaspoon salt
½ cup salad oil
5 egg yolks
1 teaspoon grated orange peel
¾ cup orange juice
1 cup egg whites
½ teaspoon cream of tartar
1⅓ cup flaked coconut

Sift together dry ingredients. Make well in center; add the next four ingredients in order; beat smooth. Beat egg whites with cream of tartar to very stiff peaks. Pour batter in thin stream over whites; sprinkle with coconut. Fold in gently. Bake in ungreased 10-inch tube pan at 325 degrees, about 55 minutes. Invert; cool.

Jane Ferguson, Kirkwood

BLACK FOREST CHERRY ICE CREAM CAKE

ICE CREAM LAYER:
1 can (1 lb.) red sour pitted pie cherries, drained.
1/4 cup sugar
2 pints vanilla ice cream, softened
2 tablespoons kirsch
CAKE LAYER:
1/4 cup (1/2 stick) butter
3/4 cup sugar
2 eggs
1/2 teaspoon vanilla extract
2 squares (2 oz.) unsweetened chocolate, melted
1 cup sifted all-purpose flour
1 teaspoon baking powder
3/4 cup milk
SYRUP:
1/2 cup sugar
3/4 cup cold water
1/4 cup kirsch
FROSTING:
1 cup whipping cream
3 tablespoons confectioners sugar
Maraschino cherries
Chocolate curls

To prepare Ice Cream Layers: Sweeten drained cherries with ¼ cup sugar and allow to stand 2-3 hours Line two 8- or 9-inch round cake pans with aluminum foil, allowing foil to extend over edge. Stir 1 tablespoon kirsch into each pint of vanilla ice cream. Turn one pint of ice cream into each cake pan. Drain cherries and sprinkle half over each ice cream layer; freeze.

To prepare Cake Layer: Generously butter bottom of one 8- or 9-inch cake pan and dust with flour. In a small mixing bowl cream butter; gradually add 3/4 cup sugar and beat until well blended. Beat in eggs. Blend in vanilla Add chocolate to creamed mixture. Sift together flour and baking powder; add to creamed mixture alternately with milk, beginning and ending with dry ingredients. Turn into pan. Bake in preheated 350 degree oven 30 minutes. Cool in pan on wire rack 5 minutes. Turn onto rack to cool.

To prepare Syrup. Combine 1/2 cup sugar and water in a small saucepan and bring to boil over low heat, stirring only until sugar dissolves Boil briskly 10 minutes. Cook to lukewarm and stir in kirsch (Yield: 3/4 cup) When cake is cool slice crosswise into 3 layers. Place layers on long strip of waxed paper and prick each lightly with fork Sprinkle about 1/4 cup syrup evenly over each layer, let rest 5 minutes To assemble ice cream cake On serving plate, place a layer of cake Onto it unmold a layer of ice cream Add a second layer of cake and second layer of ice cream Top with third layer of cake Return to freezer until ready to frost for serving

To prepare Frosting Whip cream until it begins to thicken Add confectioners sugar and continue beating until stiff peaks form Frost cake with whipping cream and garnish with maraschino cherries and chocolate curls Makes 12 servings

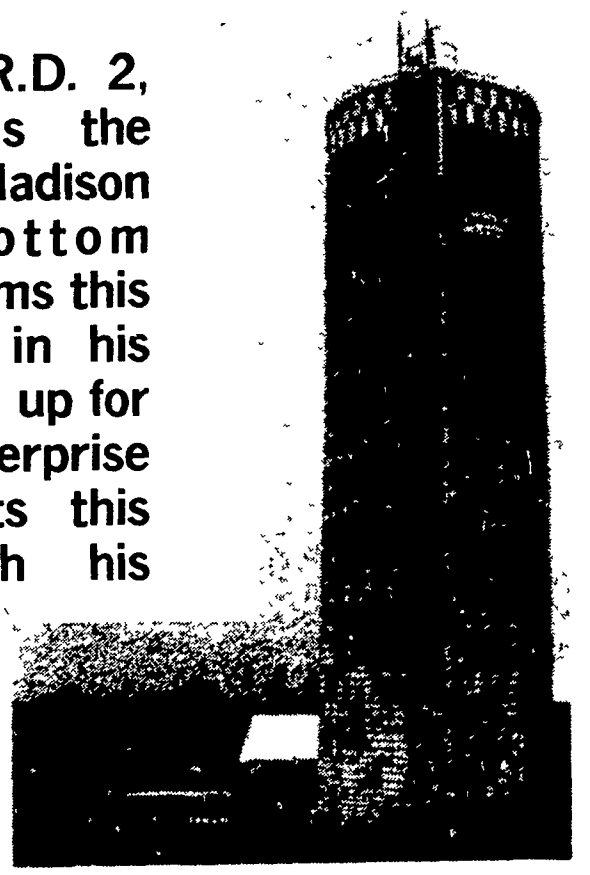
ABOUT BOTTOM UNLOADING SILOS

FROM AGWAY

John F. Stamy III of R.D. 2, Mechanicsburg, Pa. is the proud owner of this Madison Grain-O-Matic bottom unloading silo. John claims this silo plays a key role in his feeding program worked up for him by an Agway Enterprise Salesman. John credits this feeding program with his recent significant increase in milk production and fat test.



SO . . .

PFU chairman attends foreign affairs briefing

WASHINGTON, D C — Forney Longenecker, Chairman of Pa Farmers Union, was among 21 national and state officers of Farmers Union invited to a White House luncheon on Tuesday, January 15, 1980 They were briefed by cabinet officials on the Iranian-Afghanistan crises.

Presenting the latest developments were Secretary of State Cyrus Vance, Secretary of Agriculture Bergland, Secretary of Commerce Phillip Klutznick, Deputy National Security Advisor David Aaron, U S D.A. Assistant Secretary Jim Williams, and Treasury Department officials.

Secretary Vance said that the United States would proceed with the sanctions voted against Iran by the U N Security Council and subsequently vetoed

He said the U S. would proceed on its own initiative and seek the help of friends and interested nations in applying the sanctions.

"The sanctions will take time but they will have a practical, as well as a psychological effect," Vance said. "However, I can give you no assurance of early release of the hostages."

Secretary Vance said that the Soviet invasion of Afghanistan was a grave act which endangered the security of neighboring states, such as Pakistan and Iran, and which "required a strong response."

Secretary Bergland declared that the suspension of grain shipments will be a matter of great importance to the Soviet economy and that "the pinch will begin to be felt by mid-summer."

Assistance Secretary Williams reviewed the actions which were taken by the White House to avoid a severe decline in grain prices, and said that the goal is to restore and maintain the average price levels which prevailed on January 4, 1980.

He indicated that if an additional 10 million tons of feed grains were not brought into the grain reserves, consideration would be given, along with Congress, on the question of opening the grain reserve to grain not now eligible for loan or reserve status.

National Security Advisor Aaron explained that the U.S. simply could not continue with "business as usual" with the Soviets as long as the military aggression continues, and reported that all trade with Russia will now have to be reviewed and will be subject to licensing by the Commerce Department.

Berks Dairy Club Reorganized

FLEETWOOD — The Eastern Berks 4-H Dairy Club held its annual reorganization meeting at the Fleetwood First Federal Savings and Loan.

The officers for 1980 are as follows: president, Gary Kurtz; vice president, Helen Seidel; secretary and news reporter, Sandy Moser; treasurer, Bill Zollers; fair manager, Stacey Meyers. Refreshments will be provided by Scott and Gary Hauseman.

Marie Herbert was welcomed as a new adult leader. The next meeting will be held February 15 at the Fleetwood First Federal Savings and Loan.

On being a farm wife -And other hazards

Joyce Bupp

How in the world do you suppose families kept tract of messages and communicated with each other before some enterprising soul invented "refrigerator magnets?"

Our refrigerator carries so many notices, messages and public service announcements, that we may soon be forced to apply for a publisher's permit. We could consider adding a classified section - if there were any room left for it - which there isn't.

Headlining the vital communciations center is our all-time favorite bumper sticker, "Milk Drinkers Make Better Lovers." That sign remains permanent; in fact, the last refrigerator went out the door still held together with a twin to that sticker.

Randomly scattered across the white steel billboard is the rest of the mumble-jumble.

Post cards held up by magnets with smiling faces announce dairy princess meetings, 4-H meetings, and a search for calves for the county calf sale. One brilliant yellow sheet of paper carries a long list of upcoming horticulture events. Nearby are two lists, written in a second-grade printing style, of spelling test words to be studied.

One almost forgotten slip of paper bears vital statistics about classroom numbers and teachers names for emergencies. The grocery needs list hangs there handy for additions as needed, and will probably still be hanging there when I arrive at the supermarket.

For the philosophical minded, there's a selection of clippings to inspire, correct and comfort. One reminds me that "children have more need of models than of critics," and another very yellowed and treasured slip is titled (and frequently read) "A Prayer For Cross Mothers."

Since no such collection is complete without at least one cartoon, we include one that's been a favorite for a half-decade. It merely states: "Due to technical difficulties, tomorrow has been called off."

I've learned one other priceless bit of information from our kitchen communications center: If you cover a white surface with enough notices, the fingerprints aren't nearly as noticeable.

Soybean Association says embargo costs farmers money, markets

ST. LOUIS, MO — The American Soybean Association supports free international trade and supports continuation of long established and mutually rewarding international trade ties.

"ASA has consistently supported a policy of treating all nations equally in international trading practices," ASA President Allan Aves said in remarks prepared for oversight hearings of the House Agricultural Committee's subcommittee.

"Trade should and must transcend political differences if we are to have a prosperous and peaceful world. More than ever, American soybean growers are heavily dependent upon international markets and we must continue to assure good customers such as those in Asia and Europe that the U.S. is a reliable source of their food and feed needs."

The hearings, conducted by Congressman Paul Findley of Illinois, provided farmers an opportunity to react to President Carter's embargo of grain and soybeans bound for the Soviet Union.

"The President's embargo affected about 45 million bushels of soybeans and soybean products valued at about $298 million," Aves said at the hearing.

"Embargoes not only cause losses to U.S. farmers, they also increase the U.S. balance of payment deficit and cause our international customers to buy fewer U S agricultural commodities in the long run."

Aves restated ASA's six-point program proposed to USDA to reduce the short and long term impact of the embargo.

These included: increasing CCC exports credits for the export of soybean products to developing nations and China; increasing Food for Peace funding to finance soybean product exports to needy people in developing nations; implementing intermediate term credit provisions for construction loans for processing and storage facilities in developing countries; a new $5 billion revolving fund for CCC export credits; a three-year, $5 million increase in Foreign Agricultural Service funding for soybean market development programs; and removal of the cross compliance requirement for soybean farmers to participate in the soybean loan program.

"ASA has consistently supported federal policies which allow soybean farmers to receive their income from the market place rather than from government subsidies," Aves said

"In turn, we have expected the federal government to allow soybean producers unimpeded access to foreign markets."

Farm Show spectators ate up chicken

HARRISBURG — The combination of sunshine and a unique Sunday opening date swelled attendance at the week-long Pennsylvania Farm Show. They came, they saw, and they ate.

A food booth, operated each year by the Pennsyvlania Poultry Federation, did a record business, grossing 20% more than 1979 sales.

According to Federation director of public relations Don Timmons: "We sold 11,000 chicken-burgers, 6000 bowls of chicken corn soup, 3000 chicken hot dogs, 3500 turkey barbecue sandwiches, and 2000 buckets of chicken."

In addition to the favorable weather, sales also may have been enhanced by the use of precooked product this year.

Timmons noted, "This enabled us to turn product at a faster rate, and thus serve more people in the same amount of time than would have been possible if raw chicken had to be prepared for eating."

The Federation also reported that volunteer counter help was at an all-time high this year "thanks to all the industry people who donated their time to this worthy fund-raising effort."

1. Free Hot Water
2. HiPerForm Cooling
3. Mueller-Matic Washing

...only from MUELLER!

MUELLER FRE HEATER

1. • Save energy and get FREE hot water by capturing the heat you're wasting when cooling milk!
- In the Fre Heater,* refrigerant heat is transferred to water
- Thermostat delivers 140° F water to storage tank Mixing valve delivers "prepping" temperature water
- Eliminates most slow cooling, cold weather starting problems because
  1 No air cooled condenser
  2 Fre Heater is installed in doors
  3 Head pressure is stable ensuring longer compressor life
- A Fre Heater on 60° F water can produce a volume of 140° F water similar to the amount of milk cooled

*U S Patent No 4 041 726 and other patents pending

MUELLER HiPerForm

2. • Patented refrigerant control system,
- Fast cooling with HiPerForm and efficient Mueller Temp Plate* evaporator (cooling plate)
- Thorough agitation aids cooling, interval timer assures uniform blend
- Dependability longer compressor life unique control system and factory sealed pre charged refrigerant tubing
- One cabinet for cooler and Mueller Matic controls
- Mueller craftsmanship, stainless steel construction and large radius corners for easy cleaning

* A refrigerant control system licensed under and covered by Westinghouse Patent 3 264 837 and perhaps others

MUELLER MATIC

3. • Hand washing your cooler means your valuable time is "going down the drain" with the wash water
- Simple 3 step operation
  1 Insert jet tube
  2 Fill detergent bowl, check acid level
  3 Switch unit "on" for automatic operation
- Use on thousands of farms proves Mueller Matic* cleans coolers consistently better than hand scrubbing
- Gives your cooler a pre rinse, detergent wash, rinse, and cold water acid rinse — all automatically
- Jet tube spray and precision metered acid rinse sanitize every inch of cooler interior

* U S Patent No 3 407 824

Recipe Swap

In response to the question for recipes for home butchering, Annie Nolt, Leola, sends along the following recipe with the note, "Very delicious"

QUICK BOLOGNA

60 lb. beef trimmings
40 lb. pork trimmings
(Or 100 lb. beef trimmings)
3 pounds Tender-Quick
3 ounces black pepper
1 ounce mace (onions if desired)

Mix 2 pounds Tender Quick with chilled beef. Grind using coarse grinding plate Spread the meat in a cool place and let cure for 48 hours Grind chilled pork with 1 pound Tender Quick and let cure 48 hours. Regrind beef, using 1/8" hole plate Add pork and grind mixture again. Add seasoning and mix thoroughly A small amount of water may be added Stuff meat tightly into muslin casings Hang in cool place overnight Brush lightly with patent smoke. Leave hang 2 or 3 hours. Place in hot water (in an iron kettle) and cook until they float, 20 to 90 minutes, according to size of casings Plunge into cold water and chill. Hang in a cool dry place. Ready to use as soon as the bologna is cooled off

Question: I would like some easy ways to make dill pickles

Mrs. Harley W. Wright, N.J.

Question: I would like to have a recipe for a sauce to make Italian Steak sandwiches, and would like it to be as nearly like the kind served in sandwich shops as possible Please help.

G. S. Martin

Question: My family loves to eat french apple pies, but I've looked through all kinds of cookbooks and haven't found any.

Kathryn M. Watt

Readers continue to send in recipes for the instant hot chocolate mix requested in earlier columns.

INSTANT HOT CHOCOLATE DRINK MIX

1 8-quart box powdered milk
1 1-pound box powdered sugar
1 6-ounce instant coffee creamer
1 16-ounce instant chocolate drink

Edna Brubaker, Mount Joy, Pa.
Nancy B. Wallace, New Holland, Pa.
Becky Schoenberg, Shippensburg, Pa.

HOT CHOCOLATE MIX

4 cups non-fat dry milk powder
3/4 cup Hershey's unsweetened cocoa
1½ cups sugar
1/8 teaspoon salt

Combine all ingredients, mixing together well. Store in a tightly covered container. To use, place three tablespoons mix in a cup Fill with boiling water and stir until dissolved.

Lois Bare, Mount Joy, Pa.

INSTANT HOT CHOCOLATE

14 quart box of powdered milk
11 oz. coffee creamer
1 pound confectioners sugar
1 cup sugar
1 cup cocoa
2 pounds Nestle's Quik

Mix above ingredients together. To serve, add 1 cup hot water to 1/3 cup mix

Cheryl L. Sprenkle, Spring Grove, Pa.

INSTANT HOT CHOCOLATE

1 pound instant chocolate mix
1 8-quart box powdered milk
1 6-ounce jar coffee creamer
1 cup confectioners sugar

Mix together and store in airtight container. Use 1/3 cup mix in cup; add boiling or very hot water

This family farm operation features poultry and potatoes

BY DON CUNNION
Staff Correspondent

ALLENTOWN — The guiding philosophy at Heidel Hollow Farms, Inc., in Lehigh County, stresses diversification, efficiency and direct marketing.

The Finks — Orrin and Ramona and son, Dave — break their agricultural enterprise down into four major areas - poultry, potatoes, grain and hay.

They work as a team. but each member of this incorporated family farm has been assigned specific responsibilities: Orrin, potatoes; Ramona, poultry, Dave, hay and grain. They utilize 450 acres for thier projects

In each category an attempt is made to market direct as large a percent as possible. Orrin reports one-third of the potatoes he produces on 70 acres are graded and bagged for sale to grocery stores and restaurants in the Allentown area. The balance goes to chippers.

Ramona direct markets about 75 percent of the eggs from her 28,000 layers. Most go to retail handlers and jobbers. The rest to packers and commission merchants. Dave makes hay deliveries to buyers from Long Island to Virginia.

Layer population has increased by 12,000 birds recently with the installation of a new 18,000-layer cage operation built by the Favorite Company of New Holland.

But Ramona continues to operate a sloping wire floor house of the type developed at Penn State a few years ago.

"We put in the sloping floor system in 1972 and are happy with it," Ramona says.

"I don't understand why it hasn't proved more popular. We have a little problem with floor eggs, but feel there is less labor involved than with cages, especially when it comes to checking for dead birds.

"We plan to continue with the system for the time being at least. I hear cages have been banned in some European countries. If that ever happens here I'll be ready."

When the new cage house was installed Orrin came up with an idea that saved on both installation costs and labor for manure removal.

Rather than have additional deep pits built, Orrin had the side walls of the old pit raised 13 inches above the floor level. This provided two shallow pits on each side of the original deep pit.

Manure in the shallow pits is brought to one end with scrapers.

From there an augur system developed by Orrin moves the manure to the center of the roof of the deep pit. From there it drops directly into the spreader.

In the hay department, Dave has devised an important labor-saving system. It involves large wooden pallets. As the bales are tossed into the wagon in the field one man stacks them on two pallets that hold 70 bales each.

At the barn, a forklift quickly unloads and stacks the pallets.

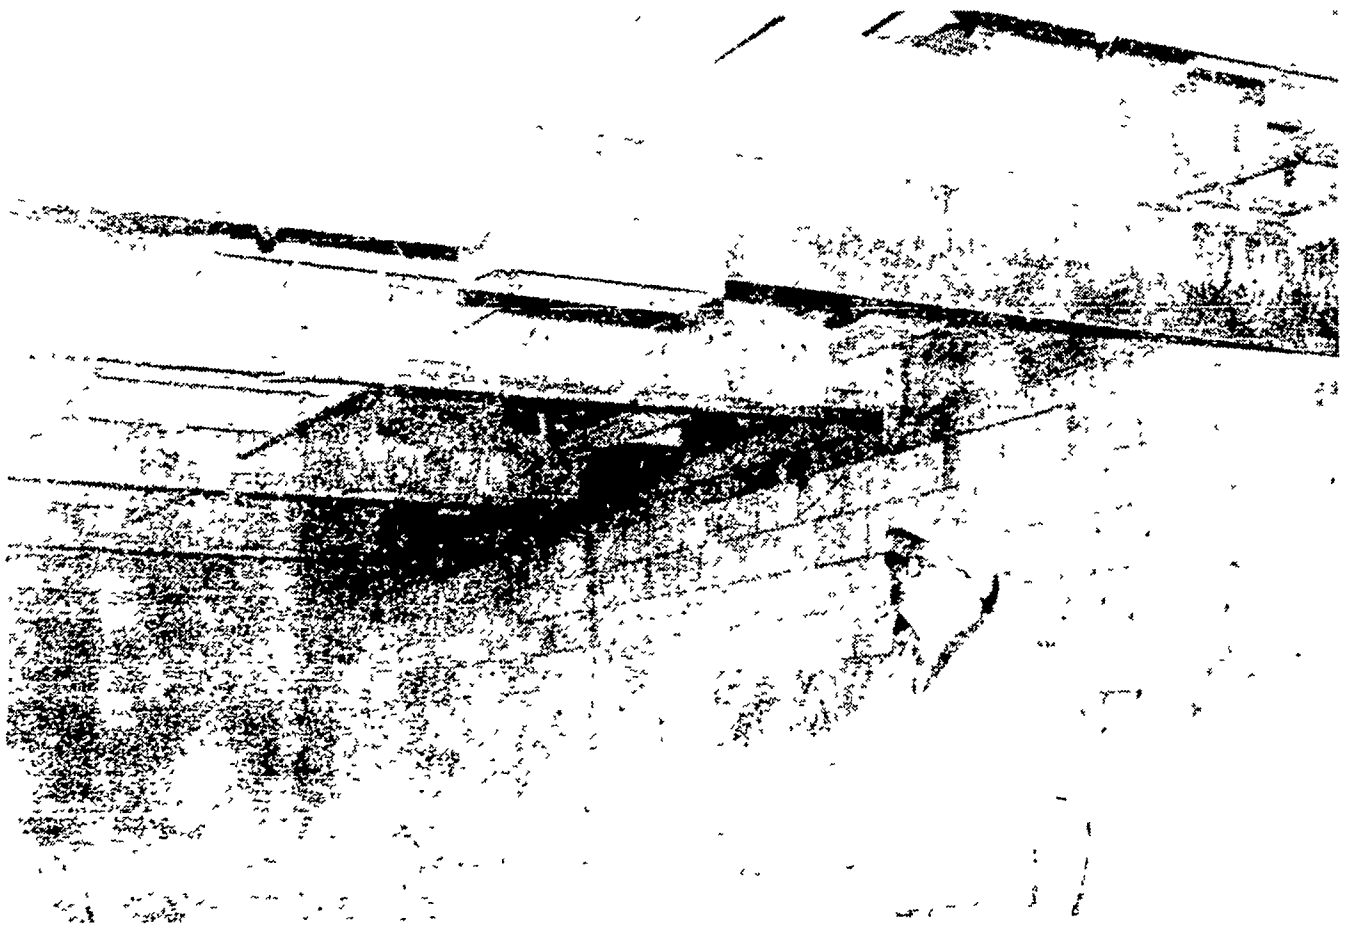
"With this pick-up and storage system," Dave explains, "one man does the work of four. By the same token, one man can out-load a trailer full of the pallets in only an hour.

"Without the pallets the job would require four men for two hours."

Dave produces 200 acres of alfalfa and clover-timothy hay a year and speeds up harvest with an 18-foot wheel-type rake. "We can handle eight to 10 acres an

(Turn to Page C16)

Welcome to Heidie Hollow Farms -- a typical Lehigh County family operation, likes to direct market as much as possible.



Orrin Fink inspects the auguring device under his cage house. It cut installation costs by avoiding the need for two more deep pits.

Wenger intends to seek re-election

STEVENS — State Representative Noah W. Wenger Tuesday announced his candidacy for renomination and election to the State House from Lancaster's 99th District. The 99th District includes the Townships of Brecknock, Clay, Earl, East Cocalico, East Earl, Ephrata, Leacock, West Cocalico, and West Earl; and the Boroughs of Adamstown, Akron, Denver, Ephrata, New Holland, and Terre Hill.

The two-term legislator is Vice Chairman of the Committee on Agriculture and Rural Affairs, and holds membership on two other major committees – Conservation and Local Government.

Wenger describes the "return to principles of financial conservatism and orderly budget making" as the major accomplishment of the General Assembly and the new Administration this session.

"It is my hope that common sense and bipartisian co-operation will continue in all matters affecting public spending," Wenger said.

"This session, the Commonwealth held spending increases to less than six percent despite double-digit inflation We posted one of the best state records in the nation in restraining spending, adopted a budget on time, and still managed to increase investment in business and job development, and added more than $120 million in additional money for public schools to keep property taxes down."

Wenger predicted the major problem for the Commonwealth in 1980 will be to meet spending demands within existing revenues.

"National inflation and a recession will affect the Commonwealth just as it does families and businesses," he said. "We will need continuing taxpayer interest and support of conservative principles of tax money management."

As a member of the Local Government Committee, Wenger said, "there is a growing realization that both the State and Federal governments must return to the role of partner of local governments.

"In recent years, an ever-increasing burden has been placed upon government at the community and county level with little appreciation of costs, and a lack of appreication for the fact that property taxation has reached dangerous and punitive levels."

Wenger, a farmer, also predicted the Commonwealth's role as a "friend of agriculture and agribusiness" will help make the 1980's a period of stability and growth for Pennsylvania's food-producing and processing industry.

Wenger resides with his wife, Barbara, and daughters, Nancy, Brenda and Pamela on a livestock and poultry farm at R1, Stevens.

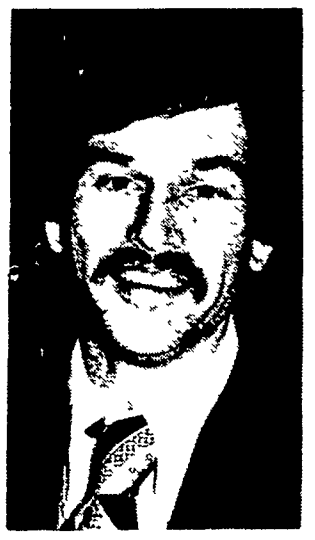
"Serving THE AREA'S Building needs since 1872"

New agronomy specialist joins York extension

YORK — York County farmers with problems about yellow alfalfa or weedy soybeans or stunted corn now have a new source to turn to for help. His name is Jim Haldeman, Jr., and he's the newest assistant county agent to join the staff at the extension service offices at Pleasant Acres complex.



Jim Haldeman

Haldeman is an agronomy specialist. He's a native of Leesport, Berks County, where his dad, James Haldeman, Sr., is a veteran county extension agent. Part of Haldeman's teen years were spent in the 4-H sheep and wool clubs, with animals raised on the small farm the family purchased when Jim was ten. A part-time job on a neighboring dairy farm also gave him some knowledge of the milk industry.

After graduating from Schuylkill Valley Schools, Haldeman pursued his agronomy major at the Altoona campus of Penn State, later transferred to the main campus where he graduated with a Bachelor of Science degree in 1974. Two years were spent at Penn State working towards a Master's degree under the supervision of Dr. Hartwig, and Haldeman is in the final stages of completing his degree thesis. That study deals with the uses of crownvetch cover crops in hilly plantings of no-till corn.

For the past three and a half years, Haldeman was employed by Shell Chemical Company, first as a trainee in Columbus, Ohio, and then in western Michigan as an ag chemical sales representative.

But Haldeman and his wife, the former Marsha Theisson of Hanover, missed the family, friends and rolling hills of southeastern Pennsylvania. He also wanted to work more closely with people and felt that extension work offered that opportunity.

Now the Haldeman's are rapidly putting down roots in the York area. Marcia works with impaired hearing children through the Lincoln Intermediate Unit and the couple has a home on Colonial Avenue.

While Haldeman's main interest and field expertise is in field crops, he's also had some experience with horticulture. Part of his responsibility will be working with the 4-H programs throughout the county.

Energy alternatives, such as the production of poplar trees as a fuel source, also interest York's newest extension assistant. Farmers with agronomy problems or questions can get in touch with Jim Haldeman at the county extension office.

Take the sharp edge off appetites with Cheese-Sausage Appetizers by combining three cups of buttermilk baking mix, one pound of bulk pork sausage, uncooked, one-half cup each of chopped celery and onion, two and one-half cups (10 oz.) shredded Cheddar cheese and three-fourths cup of milk, mix well. Shape mixture into one-inch balls. Bake in preheated 350°F. oven on unbuttered baking sheets 12 to 15 minutes. Serve warm. This yields approximately six dozen.

Family farm

hour with this over-size piece of equipment."

Dave also grows 200 acres of corn and does his own drying with an in-bin automatic drier that handles 1000 bushels at a time. The dried corn goes to an area feed mill to come back as feed for the layers.

In 1980 the Finks plan to move heavily into no-till corn. In preparation winter rye at the rate of two bushels per acres was aerial seeded on 100 acres last August. In the spring they'll spray with Paraquat and plant.

The Finks plan to continue to push for a greater volume of direct sales in all categories, but hold their over-all operation to its present size.

"We figure our future lies in staying relatively small, striving for greater efficiency, and direct marketing as much as our output as possible," Orrin sums up.

Ramona Fink checks a bird in the new cage laying house. Along with his modern facility she continues to operate a sloping wire floor house.

Dutch Dairy Goat Assn. to meet February 5

LANCASTER — An encore topic of "Kidding, Kid and Doe Care" will be the feature at the February meeting of the Dutch Country Dairy Goat Association.

The meeting will be held Tuesday, February 5, 7:30 p.m. at the Farm and Home Center, Lancaster.

Animated conversation sparked the kidding topic at last month's meeting and led the group to spotlight the subject one more time. The roundtable format proved a great success and will be continued.

One of the unique features of the club is the interest shown by Lancaster County Dairy Agent. Glenn Shirk. Shirk, a regular at the monthly meetings, has been a valuable source of information and reference material to the goat owners.

A slide show by Mr. and Mrs. Ivan Stauffer of their goats will be given. Refreshments will be served. The public is welcome.

The Association's aim is to assist dairy goat owners in caring for their animals by providing printed information and timely speakers, and to promote dairy goats and their products.

A membership drive is underway and being headed by a public appearance of club members on the "Noon Day on 8" TV Program, also February 5.

For more information on the club or the 4-H Dairy Goat Club call the extension office 394-6851 or Pat Kauffman 284-4340.

New Farm Bureau president will push legislative program

CAMP HILL — With just two weeks experience, Robert Delano is a newcomer in his present position.

But he is no stranger to farming nor to the back stage operations of a major farm organization.

The Virginia farmer was elected president of the American Farm Bureau Federation at the group's annual meeting in Phoenix during Farm Show week.

He travelled to Pennsylvania Monday to speak to members of the State Council of Farm Organizations. Before that meeting he took time to outline his feelings on a number of farm related topics.

While he repeated the standard statement that his first goal is to implement the policy of the voting delegates of Farm Bureau, he added he hoped to put major emphasis on the group's legislative program

Delano said he felt inflation was the prime problem facing America and American farmers today.

He said there are two ways to reduce inflation: either balance the budget or limit government spending constitutionally

Delano noted U.S Senator John Heinz from Pennsylvania has put in a bill which would limit government spending.

"This is a preferable route to take," Delano said

He said interest in writing an amendment to the Constitution is waning and said he feared some people were losing interest in the concept of balancing the budget altogether

' If we do put a limit on government spending then we will be able to have a balanced federal budget, but not before, ' he said

"Ninety percent of inflation is excess government spending," he added

He said Farm Bureau would work to get legislation passed to eliminate this problem

Delano said he came to the job with no "pet projects" or favorite ideas

While he said he hadn't even talked to all the employees yet, he is no stranger in Farm Bureau circles

He has been Vice President of the American Farm Bureau Federation since 1976 and served as President of the Virginia Farm Bureau.

Robert Delano, a Virginia cash grain farmer and new president of the American Farm Bureau Federation, says he'll emphasize legislative activity during his tenure of office.

His home is located along the Chesapeake, about 100 miles South of Washington, D.C. and to the East of Richmond.

He admits his farm background makes him a more Midwestern oriented farmer than either an Eastern farmer or a Southern farmer.

"I know about the grain end of agriculture and I am learning about the other problems," he said.

As a big grain producer he reacted quickly to the President's recent embargo of grain sales to Russia.

He was quick to point out that the amount of grain weighing on the American market should be considered as 19 5 million tons rather than 17 million tons.

He picks up the other 2 5 million tons from the grain which the Southern longshoremen have refused to ship out of the country.

"Even if the CCC buys all 19.5 million tons of grain it could cost agriculture between $4 billion and $5 billion.

"That will be taxpayer money," he pointed out.

He said he was interested in marketing and bargaining legislation which would allow farmers to bargain for the price they receive for goods.

He pointed out that farmers are at the mercy of the set prices and often fall victims to surprises such as the grain embargo.

"I hope to continue the kind of administration Allan Grant had," he said, adding "I will continue the emphasis on the export trade

"We need access to export markets.

"I have in mind sending a group to Brazil to study their use of gasohol. I want to see how they use corn and other biomass for fuel."

He said he felt programs to push for a bushel of grain for a barrel of oil were impractical.

"I'm against the use of grain as a weapon," he said.

"But we do support the President. If he has more information on the situation than we do, then we have to take his word for it "

Delano said he will continue to be interested in the thrust of agricultural labor unions, as was Grant

"We will not waive interest in sensible labor laws which allow the worker to make his own decisions," he said.

But he promised Farm Bureau would be against union boss control.

"Some union bosses have abused their privileges," he said.

Delano said he wanted to work with the Grange, National Farmers Union, National Farmers Organization and other farm and commodity groups to see that legislation and programs which would benefit the farmer are enacted.

He said he would work for some relief from the vast amount of regulations farmers have over their heads

In particular, he cited the number of regulations on clean air and water which have an impact on farming operations.

He said AFBF work on these programs, along with the legislative activity, should provide farmers with the forum they need in Washington.

The 55 year old Delano, while a self-professed grain farmer, holds a degree in animal husbandry from Virginia Polytechnic Institute

He pledged he would serve in his post with dedication and devotion.

Already, just two weeks into the job, he has made an impact in several agricultural areas.

A forceful speaker with a light Southern drawl, he should be an able representative for the nation's Farm Bureau members — CH

York County growers reap corn awards

BAIR — York County corn growers again made an impressive showing in the annual Pennsylvania five-acre corn club contest. Awards to competitors were made during last week's corn clinic, held at the 4-H Center.

Top honors went to Merle Orner, Dillsburg R3, whose 188.2 bushels per acre also earned him second place in the statewide shelled grain class. Orner's five acres averaged a plant population of 25,907 and was harvested at a standability of almost 97 percent with 36.8 percent moisture. His winning variety was Pioneer 3184.

Second place was won by Perrydell Farms of York R8 with a yield of 172 bushels of Agway 855X. Tied with that yield was Dale Fuhrman of Hanover R3, with Doebler's 78X.

Other growers who topped the 160-bushel mark were: Eugene Kilgore, Airville R2, with 169.7 bushels of Agway 898X; Ray Orner, Dillsburg, 168.2 bushels of Pioneer 3184; Donald Meckley, Glenville, 165.5 bushels of Doebler's 70X; Irvin Orner, Dillsburg, with 161.2 bushels of Pioneer 3518; and Ed Rohrbaugh, Seven Valleys R2, 161.1 bushels of Pioneer 3535.

Four of the county's corn croppers took part in a panel session detailing their management of corn acreage. Roger Perry of Perrydell Farms, York R8, noted their efforts to maintain high pH levels so that fertilizer and chemicals can perform well.

Soil tests are followed carefully because they have run into the problem of too much phosphorus and potassium on some ground, a warning brought out in an earlier presentation by the extension specialists.

No-till planting begins in early April using atrazine and Princep, with Paraquat needed for later plantings. Either Dual or Bladex herbicides are also incorporated into the spray program later in the planting season.

Perry observed that more corn was on the ground this year than usual, but blamed the exceptionally wet weather for that problem.

John Marstellar samples his ground every three years and generally puts 180 pounds of liquid nitrogen on ground not receiving manure, cutting that amount almost in half on fields that have been manured.

Most acreage, except for that with a heavy manure cover, is no-till planted. Weed problems were tackled with a combination of Aatrex and Lasso on some fields, and with Dual on others.

Weeds were the worst, Marstellar added, in shorter corn where the ground shade was not intense enough.

A type of minimum tillage with some plowing is the planting preparation done by Earl Fuhrman, Hanover R3. But, Fuhrman did plant a few acres in no-till this year and liked it well enough to plan even more this Spring.

He applied 400 pounds of a 30-11-11 and 300 pounds of starter in the row. Steep fertilizer cost increases will force a cutback on those amounts this year, Fuhrman figures, and he may broadcast less phosophorus and concentrate it in the row instead.

Good weed control resulted from a Lasso and Bladex combination that will be used again. Fuhrman plants this long season varieties in those fields to be chopped for dairy silage, saving the shelling acreage for short season, faster drying types.

Four panelist was Geary Huntsberger, Etters R1, the county's newest Master Farmer winner. Huntsberger farms several hundred acres of corn in a minimum type of tillage on

(Turn to Page C23)

Corn contest winners in York County included, from left, front: Roger Perry, Paul McPherson, Ray Orner, Joe Stump, Donald Meckley and Merle Orner; back, Earl Fuhrman, Doug Kilgore, John Marstellar, Ed Rohrbaugh and Wilson Nace.

Vermont joins ranks of Brucellosis-free states

NEW YORK, N.Y. — Vermont's 5000 plus cattle herds are now free of brucellosis following a costly outbreak that began in 1972, a U.S. Department of Agriculture veterinary official reports.

The Vermont outbreak was at its worst in 1975 when about 45 cattle herds were quarantined. Not counting producer losses, state and federal governments spent about $3.6 million on the outbreak from 1972 to 1980.

The last quarantine was lifted Dec. 28, 1979—in time for the state to enter the New Year with a clean cattle population.

"Great credit for this victory over disease must go to the State's farmers," said Paul Becton of USDA's Animal and Plant Health Inspection Service. "They have worked diligently with State-Federal animal health authorities to free their herds of brucellosis."

Vermont's costly outbreak resulted mainly from the importation of exposed cattle This happens all too frequently in other states as well, Becton noted. He believes it's time everyone involved in the program accept responsibility for stopping the movement of exposed animals

Becton, who directs the national brucellosis eradiction program, said Vermont joins the ranks of 11 other states with no cattle herds under brucellosis quarantine. The others are: Alaska, Connecticut, Delaware, Hawaii, Maine, Maryland, New Hampshire, North Carolina, North Dakota, Rhoda Island, and South Carolina.

Becton urged farmers to remain alert. Brucellosis still exists in many states. It is most often spread when newly purchased cattle are added to a herd without precautions.

Producers who raise their own breeding stock stand no chance of "buying" brucellosis. But for those who do buy replacements, Becton has some recommendations:

–Buy from sources with a reputation for selling brucellosis-free cattle or from certified brucellosis free herds.

–Buy animals that were calfhood vaccinated as shown by ear tags, tattoos and health records.

–Buy cattle that were tested negative for brucellosis within 30 days of purchase.

–Isolate newly purchased cattle for 45 to 120 days and then have them retested before mixing them with the established herd.

–Cattle buyers should know that one negative test is not enough to be sure an animal is free of brucellosis, said Becton. It takes anywhere from one to three months — sometimes longer — for exposed animals to develop a positive blood test reaction.

Brucellosis, also called Bang's disease, is an infectious bacterial disease of cattle and other animals It can be transmitted from animals to humans as undulant fever.

The most common sign of cattle brucellosis is abortion or birth of weak calves. Early detection of the disease allows the infection less opportunity to spread, therby reducing losses.

"Any farmer or rancher who suspects he has brucellosis in his herd should seek immediate veterinary assistance and get his cattle tested," said Becton. "Prompt action can prevent serious losses."

If you eat a good breakfast, you'll work and study better Why not include a cup of old-fashioned cocoa to make breakfast a meal no one can refuse? To make four cups of the beverage, mix one-fourth cup each of cocoa and sugar with one-half cup of water Bring to a boil and cook one minute, then add three and one-half cups of milk and one-half teaspoon vanilla. Heat to serving temperature, beating with rotary beater to make it frothy, thus keeping skin from forming on top Serve with a fluff of whipped cream to make it irresistible

Grangers attend leadership conference

Six members of the Maryland Grange attended the leadership conference held this past Saturday and Sunday in Carlisle, Pa. Discussing effective programs and state plans are, from left, C. Rodman Myers, Maryland Master; Louisa B. Hott, Womans Activity Director; Nancy Wolfe, State Lecturer; Ethel Brauer, Director of Junior Grange Activities; and Alan Brauer, Master of the Frederick County Pomona Grange.

Pennsylvania Grange leaders shared ideas on communications and program planning at the Grange leadership conference held in Carlisle. Participants included, from left, Ruth Hoover, director of womens activities; Sandy Westover, Junior Grange activities director; Charles E. Wismer, Jr., State Master; Mary Buffington, State Lecturer; H. Carl Deibert, state secretary; and Douglas Bonsall, state youth director.

Youth jobs available in conservation

HARRISBURG — Applications for the 1980 Youth Conservation Corps program, a summer work program which provides participants with a greater understanding of the environment, are now available.

Department of Environmental Resources' Secretary Clifford L. Jones said applications may be obtained from high school guidance counselors, Bureau of Employment Security Job Service offices, the offices maintained by DER's Bureaus of State Parks and Forestry, and State-affiliated YMCA's and YWCA's.

Completed applications must be received at the YCC Selection Office, P.O. Box 800, Falls Church, VA 22046, no later than March 15. Incomplete applications are not considered.

Participants are chosen through a random selection process and those selected for the program will be notified on or about May 1, 1980.

The YCC program is open to any youths who will be 15 years old by June 1 but will not be 19 years of age before August 30. Work sites are located on State lands administered by DER and on Federal lands administered by the U.S. Department of Agriculture and the U.S. Department of the Interior.

There are two types of programs: residential where corps members reside and work in a camp setting away from home, and non-residential where participants commute daily to their work site. Residential participants earn $75 50 per week plus room and board, while non-residential participants earn $93 per week.

Typical work projects, which provide first-hand experience in improving the environment, include stream improvements, construction of small bridges and other recreational facilities, thinning forest plantations and improving wildlife habitat.

Questions concerning the program should be directed to John Naylor, State Recruiter, Bureau of State Parks, Department of Environmental Resources, P.O. Box 1467, Harrisburg, PA 17120.

Potato stocks off 15 percent

HARRISBURG — Total stocks of potatoes stored in Pennsylvania on January 1, 1980, was 3,200,000 cwt., 15 percent less than a year ago, according to the Pennsylvania Crop Reporting Service.

Current total stocks is 53 percent of this year's production of 6,000,000 cwt., compared with 60 percent on hand a year ago.

At the U.S. level, an estimated 183 million cwt. of potatoes for all uses were in storage in the fall producing areas on January 1, 1980.

This was a seven percent decline from the record 196 million cwt. on hand a year ago, but three percent above the comparable 1978 total.

Disappearance of the 1979 fall crop to January 1, 1980 was 14 million cwt. (excluding Nevada), down seven percent from the 122 million cwt. disappearance for the comparable period a year ago.

This total disappearance to date includes 18.1 million cwt. of potatoes that were dumped during grading, fed to livestock on potato farms, discarded without grading, and lost due to shrinkage (moisture loss).

Todd Quinby holds the Philadelphia FFA hog show banner next to his grand champion that sold to Penn Packing for $5.25 a pound.

Jerry Clemens, buyer for Hatfield Packing Co., and Aaron Weilerstein, right, became business friends after Hatfield placed the high bid on Aaron's reserve champion market hog.

Phila. FFA hosts first hog show and sale

BY SHEILA MILLER

PHILADELPHIA — The City of Brotherly Love's FFA chapter hosted their first annual market hog show and sale last Saturday. The Philadelphia Chapter FFA'ers and their advisor, Ed Hall, were excited about the first big livestock show to be held at the W.B. Saul High School.

Holding a hog show in Philadelphia drew the interest of parents and passers-by on the four lane highway that runs past the school. People from the city stopped by to see what a hog show was all about, and some came to take advantage of the on-foot market.

For those city-folk who bought a market hog from one of the FFA students, advisor Ed Hall made arrangements to have the hogs taken to a local processing plant directly from the sale.

Not only were the local people there to buy hogs, so were Penn Packing, Philadelphia, Hatfield Packing, Hatfield, and Leidy Packing, Souderton. As a matter of fact, Penn Packing bought the grand champion hog, shown by Todd Quinby of Upper Bucks, for $5.25 a pound.

The contending bidder on the 194 pound grand champion was Hatfield Packing. During an afternoon of enthusiastic bidding, these two major companies bought 37 of the 47 hogs marketed.

Hatfield Packing bought the reserve grand champion from Aaron Weilerstine, Philadelphia. The 219 pound hog brought $2.10 a pound.

The sale average for the market hogs, whose weights averaged 198 pounds, was $0.58 per pound.

Seven FFA chapters took place in Saturday's show and sale. Students represented Philadelphia, Conrad Weiser, Upper Bucks, Lehigh, Eastern Northampton, Northern York, and Northampton.

In fitting and showmanship, the grand championship went to Cheryl Wessner, Lehigh FFA chapter. Todd Quinby, Upper Bucks chapter, took the reserve honors in this competition.

Judging the morning's show was Rodney Gilbert, Livestock Superintendent of Delaware Valley College. The sale auctioneer was Dale Stoltzfus. Premiums were donated by the Kiwanis Club.

LIGHTWEIGHT

1. Todd Quinby, Upper Bucks; 2. Nancy Carson, Philadelphia; 3. Chuck Stenlake, Eastern Northampton; 4. William Shick, Upper Bucks; 5. Maryann Troxell, Lehigh.

Charles Hess, right, a director of the Pennsylvania Master Corn Growers, signs up Ben Wineka as a member during the county corn clinic at the 4-H Center. York farmers have maintained the highest county membership for several years in the group, which encompasses some 300 individual growers and 28 agri-business associates.

York County

(Continued from Page C19)

the heavy soils of the northern end of the county, compared to the looser soils of the panelists from the south and western parts of the county.

No manure is available for the ground and Huntsberger goes heavy, about 95 percent, on liquid fertilization. A strict rotation program is maintained, both to add plant-produced soil nutrients and prevent washing on the area's hills.

Currently experimenting with field application of sewage sludge, Huntsberger has reservations about how rapidly the use of these waste products will be accepted.

"Sludge people don't know the difference between wet ground and dry ground," he observed. "We'll have to have storage of the product until ideal conditions are there for application. And the condition of the sludge will have to be guaranteed or the farmer should not have to take it."

Moderator John Smith, county extension agent, added to Huntsberger's comments on sludge, saying the only way he could recommend it is if the product has been analyzed so the recipient knew what nutrients he was applying to his land.-JB.

Fancy phone services now available in rural areas

MURRAY HILL, N.J. — Custom calling telephone service options provided via local electronic switching systems will become possible in rural communities because of a new remote switching system designed by Bell Laboratories.

The new system, called the 10A Remote Switching System consists of a local switching unit controlled by a host electronic switching system up to 175 miles away.

By using the host's call-processing power, RSS can provide such custom calling features as call forwarding and three-way calling. The system is made economically practical by microprocessor and microelectronic technology advanced at Bell Labs.

The benefits of electronic switching were previously available only in larger towns, suburbs and cities. Now, RSS makes it economically feasible to bring these benefits to areas where individual electronic switchers are less practical.

RSS will also provide access to services not available in some older rural switching offices. These include Touch Tone dialing, faster handling of operator-assisted calls, and certain business communication services.

The first RSS was cut into service in Clarksville, N.Y., by the New York Telephone Company on December 8. It is controlled by the No. 1 ESS office in the Albany suburb of Cullderland, 15 miles away.

Systems engineers at Bell Labs estimate that RSS units will be installed at the rate of about 100 per year. Most will go to work in many of the Bell System's nearly 4000 rural community dial offices.

The control circuitry in the remote frame uses MAC-8 microprocessors developed at Bell Labs. Built on a silicon chip less than one-tenth the size of a postage stamp, the MAC-8 microprocessor brings the processing capabilities of a small computer to a wide range of telecommunications equipment.

RSS units can be connected to host switchers by either analog or digital transmission links. A special feature programmed into the RSS enables it to provide basic local service if links to the host are accidentally disabled.

Besides replacing older switching equipment, RSS can be added alongside existing switchers to handle growth or provide custom calling features. It can also be applied in new service areas such as home developments or trailer courts.

Because of its compact size – a frame of equipment three-by-seven feet can serve 1000 lines – RSS will easily fit into small of crowded buildings.

RSS development began in 1976, with most of the work conducted in the Remote Switching System Development Department at Bell Labs' Indian Hill facility in Naperville, Ill. Western Electric's Northern Illinois and Dallas Works are manufacturing the units.

The second RSS is scheduled to be cut into service soon in Neola, Iowa. Its host ESS is located in Council Bluffs, Iowa.

York County corn clinic gives booster for yields

BY JOYCE BUPP
Staff Correspondent

BAIR — York County's annual corn clinic continues to be one of the most popular winter educational meetings sponsored by the extension service. Over 300 farmers filled the 4-H center for this year's meeting on January 17.

They heard extension specialists, compared tillage and planting practices and visited the two dozen commercial booths set up for the day-long event.

Featured speakers from Penn State were ag engineer James Garthe; Willis McClellan, the university's weed specialist; and entomology expert Stan Gesell.

In a presentation on reducing field losses of corn crops, Garthe exhibited data slides on the value of harvesting high moisture grain and treating it with acid preservatives.

Acid treatment allows storage of grains at 25 to 30 percent moisture, without the capital investment of a silo. Propionic acid, alone or mixed with acetic acid, is the product often used, in amounts of approximately one to three percent of the weight of the grain to be treated.

Actual quantities must be determined by the conditions of storage time, temperature and moisture content.

Because the acid does react with certain chemicals and with concrete, tests have been run to determine the type of materials that best resist the corrosive action of the acids.

Aluminum structures rated the highest points, but galvanized steel treated with several coats of primer and paints were also found to be suitable. Detailed specifications on those various materials are available from the extension service.

But acid-treated grain has perhaps an even greater advantage than just getting it harvested early. Acid treatments, says Garthe, can increase crude protein levels of feed grains up to four percent, at about one-tenth the cost of soybean meal protein additives.

Rolling the grain through a mill increased the nitrogen and protein retention even more. And, livestock made greater weight gains on the treated feeds.

According to Bill McClellan, Penn State weed specialist, certain farms across the state are encountering a brand new problem in fertilization - too much of a good thing. The good thing is poultry manure; and some fields near poultry houses are getting too much of it, resulting in excessive levels of both phosphorus and potassium.

"It's to the point where we must soil test to see where we can do the least damage with manure applications," warned McClellan. Estimates are that, for each pound of nitrogen going into the soil in poultry manure, a pound of phosphorus and a half-pound of potassium are also added

When phosphorus levels in the soil become too high, corn plants do not receive needed amounts of the trace mineral zinc, while high potassium counts affect the levels of magnesium. However, because of its great value in adding other trace elements, manure remains an important soil improver.

With the cost of chemical fertilizers escalating to unheard of levels, scientists are turning their research toward developing plants that biologically increase the amounts of nitrogen in the soils.

Alfalfa, for instance, is the best nitrogen producer, automatically adding 200 pounds per acre back into the soil.

Ladino grasses put back about 175 pounds, lupines add about 150 pounds, and crimson clovers and pasture grasses restore about 100 pounds.

McClellan also emphasized the need for regular lime applications, since a key to proper weed control with herbicides is the proper level of soil acidity.

Any pH reading below 6.2 is crucial, says McClellan, and just adding a ton of lime per year as a rule of thumb may not be enough if the soil was too acid to begin with.

York County

(Continued from Page C24)

For every pound added per acre, a corresponding five pounds of limestone is needed. Additions of organic matter to the soils, through manure applications and no-till mulches and trash, also increases acidity of the soils; and the higher the organic level, the more herbicide it takes to get clean weed control.

After tackling the dual problems of fertilization and weed control, the extension specialists focused the session toward another of the corn farmer's most painful headaches. stalk borers.

"We just do not have an answer," was the discouraging word from entomologist Stan Gesell. "There is no insecticide registered that will control stalkworm; we have none that we know will really work."

Burning off all stalk residue destroys the wintering larvae eggs, but Gesell labels that method strictly a "no-no". Plowing with a moldboard is also effective in controlling the pest, but that too draws criticsm due to high energy costs and soil erosion worries.

Furadan is the one control that works, at least some years, if used at planting time in the furrow, says the insect expert.

Both early and late corn crops are susceptible to the damage of the stalk borer at certain stages of growth. Mid-June the first egg hatch attacks the taller plants of the early planting.

Gesell recommended walking down the corn rows at about the third week of June, when plants should be about 30 inches high, to examine the plant tops. If three-fourths of the plants show "sawdust" borer residue in the whorls, the acreage should be treated.

Aerial applications seem to work best and will cost $10 to $12 per acre, roughly equivalent to the value of the corn destroyed by the pest.

Crucial period for the late-planted corn is the beginning of August, when the stalks are still soft and juicy. If the corn is to go for silage, no massive amounts of damage are likely to occur.

But if the crop is to be held for grain use, that extra standing time until harvest allows the worms to cause tremendous weakening of stalks and heavy losses from corn that falls to the ground.

National Central to change name

LANCASTER — National Central Bank will change its name to Hamilton Bank, withdraw from the Federal Reserve System and convert from a national to a Pennsylvania charter on or about February 1, 1980, according to Wilson D. McElhinny, the bank's chairman and president.

McElhinny said conversion of National Central Bank to state-chartered, non-member status has been under serious study for a number of years.

The action will be taken to utilize more of the bank's resources as interest-earning reserves and to insure the bank will remain competitive with other banks in southcentral Pennsylvania.

Deposits of the new Hamilton Bank will automatically continue to be insured by the Federal Deposit Insurance Corporation and the bank will be regulated by the Pennsylvania Department of Banking and the FDIC rather than the U.S. Comptroller of the Currency.

Other state-chartered, non-member banks operating in National Central's current legal branching area include American Bank & Trust Company of Pennsylvania, Continental Bank, Industrial Valley Bank, Dauphin Deposit Bank, Bank of Pennsylvania, York Bank & Trust Company, Fulton Bank, Farmers First Bank of Lititz, Southern Pennsylvania Bank and Drovers & Mechanics Bank.

National banks in Pennsylvania, which by law must be members of the Federal Reserve System, currently operate at a serious earnings disadvantage when compared with their state-chartered, non-member competitors, McElhinny said.

The earnings disadvantage is because banks must maintain a major portion of their reserves in the form of non-earning desposits at a Federal Reserve Bank. Non-member, state-chartered banks may invest 50 percent of their required reserves in U.S. Government or Pennsylvania tax-exempt municipal securities.

"Increased earnings realize from these investments will be retained to augment the bank's capital base. The resulting enlarged capital base will support the bank's future growth, allow further development of specialized financial services and permit the bank to be more competitive in southcentral Pennsylvania," he added.

The name change to Hamilton Bank was necessitated by the bank's decision to withdraw from the Federal Reseve System. The word "national" can only be used in a bank's name if it operates under a national charter and is, therefore, a member of the Federal Reserve.

McElhinny explained the search for a new name included a review of over 400 names by bank management.

Market research was undertaken to aid in the selection and included the use of seven 'focus groups,' including bank customers and non-customers from each of the counties were National Central Bank has offices.

"The studies indicated Hamilton Bank was the widest consumer appeal, is easily remembered and represents stability, dependability and quality," McElhinny said.

He said there will be no changes in the management staff or services of the bank as a result of withdrawal from the Federal Reserve System or the name change.

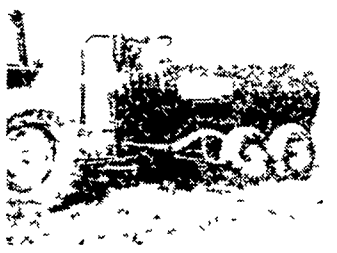
Maybe it's time you switched fertilizer tanks

Switch to a Calumet Vacuum Tank

Commercial fertilizer supplies probably won't increase during the next decade. But it's a safe bet their prices will.

That's why it makes sense to take advantage of the one source of fertilizer that won't run out—manure. When 500 hogs can save over a thousand dollars in commercial fertilizer costs, manure is just too valuable to waste

A Calumet vacuum tank with a 4-shank soil injector lets you make the most of manure's nutrients Soil injection can help retain four



times the nitrogen that's usually lost with surface spreading—in addition to reducing odor and run-off problems

Calumet vacuum tanks, in capacities from 1180 to 4500 gallons, are available with a choice of two vacuum pumps Both engineered to load fast and stay cool Heavy duty steel alloy tanks, coated with epoxy resist corrosion. Double reinforced A-frames and support skids add strength All vacuum tanks are backed by Calumet's 12-month warranty

Call for information on the value of manure—and some good reasons why you should switch fertilizer tanks

Four ag preservation plans weighed by Council members

BY CURT HARLER

CAMP HILL — Provisions of Amos Funk's proposal to preserve farm land by deed restrictions drew cautious praise and some fire at a meeting of the Pennsylvania Council of Farm Organizations.

Ken Greider, Executive Director of the State Association of Township Supervisors said "with a couple of ammendments we could support HB 1983."

That bill would allow municipalities to establish ag districts and would encourage placing deed restrictions on farm property to ensure it would stay in agriculture forever.

But State Representative Noah Wenger, vice chairman of the House Agriculture Committee said he was opposed to any bill which was not voluntary.

Funk, Greider and Wenger appeared on a panel discussion of preservation of ag land. They were joined by Deputy Pennsylvania Secretary of Agriculture Chet Heim.

Funk said he felt everyone — farmers, township supervisors, legislators, the Governor — favored preserving ag land.

"If everyone is in favor of preserving agricultural land, why then is not more happening?" he asked.

"The problem with Pennsylvania's land use efforts to date, as I see it, is the benefits go to everyone in the state," Funk said.

He said he had been surprised and shocked when told by several friends that a number of individuals who serve on the House Agriculture Committee do not want anything to do with land use legislation because it is too controversial.

"It also has been said if you scratch a farmer deep enough you will discover a land speculator," he said, noting farmers would like to have their cake and eat it too

Funk called for broad land use legislation to fit the needs of counties where urbanizing pressures are not great to those where presures are very great.

Greider, representing the Township Supervisors, pointed out that between 500 and 600 townships of 1458 in the state have zoning laws of any type

He said he felt no bill would be able to fully guarantee that a given piece of land would not be developed.

Noah Wenger, vice chairman of the House Agriculture Committee told members of the Council of Farm Organizations he could not support any land preservation plan that was not voluntary. He was joined on the panel by Chet Heim, Kenneth Greider, and Amos Funk.

He said a bill like HB 1983 could be supported by his organization.

But he added the Supervisors probably would not support any bill which gave a special interest group, including farmers, special treatment.

Chet Heim, commenting that he is a member of the Thornburgh administration, talked the party line on land use preservation.

He repeated the statement that any comprehensive land use plan must emphasize the farmer and the family farm.

He said any such bill would have to reduce the farmer's tax and allow him to realize some of the development potential of his land

Heim said the administration would support local control and not state dictation of land use policy.

He said the Administration looked for legislation to compensate the farmer for any loss of property. He also said they wished to avoid the use of eminent domain or taking of prime farm land

While a member of the Republican party, Noah Wenger had some more specific ideas to offer on his own.

"I favor voluntary ag districts with individual sale of property rights

"I stick with the voluntary approach since property rights are one of man's basic rights," Wenger said

He said he supported the idea of using local money to solve local problems.

"But I don't want land use planning out of the hands of the land owner and into the hands of the planner — professional planner or not," he said.

"That would be erosion of our basic constitutional rights," Wenger said.

He said he saw land preservation as a priority issue. But he added he was not about to tell young people they could not build a home in the area or tell industry it could not expand.

He cited Hershey Medical Center as one case where land went out of farming. "But it was not bad," he added.

Wenger said he felt the biggest problem with farmland preservation was losing the land upon the death of the farm's owner.

He said the property may be secure in farming until the owner dies and then the tax bite hurts, forcing heirs to sell off land and perhaps abandon farming altogether

He said he is supporting HB 1176 which is appraising land on its current use and not on its potential value for other reasons.

Wenger spoke favorably of HB 1608, the Capitol Stock Tax exemption legislation.

He said incorporation is a good way to pass the family farm from generation to generation

While the stock tax makes this prohibitive at present, 1608 would exempt a farmer from the tax provisions

He also said amendments to Act 319 and SB 296, recently signed into law, were valuable aids to preservation of farms

The purpose of the discussion was to share ideas with members of the Pennsylvania State Council of Farm Organizations Members of the group are drawn from the leaders of all farm groups in the state

The land preservation session was one of several seminars held during the Organization's annual meeting Monday.

Grangers fight scenic river tag for French Creek

PHOENIXVILLE — Chester County Grangers have voiced strong opposition to proposed state legislation that would bring French Creek into Pennsylvania's scenic rivers program.

And, according to Everett Wilson, legislative chairman of the Chester-Delaware Pomona Grange, there's not much the state could do to overcome his group's objections.

"Our biggest concern is that farmers will lose control of whatever land they have along French Creek," Wilson said.

"Scenic sounds good, but if it means we can't cross a stream with a manure spreader, or that we can't plant crops where we normally would, then we have to oppose the legislation."

Wilson also said he was concerned about the effect a scenic rivers act could have on road buildings near French Creek, citing a dangerous bridge where Route 100 crosses the stream, and a stretch of dirt road paralleling the stream which some area residents would like to see paved

David Weinstock, an official with the state Grange office in Harrisburg, said the statewide Grange does have policy opposing scenic rivers legislation because such acts could impair normal farming operations.

"We're opposed because, while the scenic rivers idea is esthetically and environmentally pleaing, the laws that designate scenic rivers can tie up our agricultural resources. And the original Scenic Rivers Act gives the Pennsylvania Department of Environmental Resources the right to use eminent domain for scenic easements along the waterway."

There is so far only one official scenic river in Pennsylvania. It is the Schuylkill, from its origins north of Reading to the point where it leaves Philadelphia's Fairmount Park for the last leg of its journey to the Delaware.

Stiff opposition from farmers and other landowners killed a scenic rivers proposal in the Wolf Creek and Slippery Rock Creek areas north of Pittsburgh. The threat of eminent domain was one of the most hotly contested items in the proposal there, as it is in French Creek.

"DER has said they would not use eminent domain in French Creek," Weinstock said. "And the law they're proposing - each scenic river requires its own legislation - excludes eminent domain.

"While we have no reason to suspect that this administration would not live up to its work, how do we know what administrations after this one would?

"We don't know. We can't know. And that's why we're opposed. The scenic rivers program simply has too many potential problems for agriculture." DW

How farmers can get pesticide recertification

BAIR — Sometime within the last three years, thousands of Pennsylvania farmers took a test, sent it in for grading, and if they passed, received a certification card licensing them to purchase and apply toxic pesticides.

Many took the test figuring that it would be a one-time happening and then they'd be permanently certified.

"What the law didn't say was that you had to update that certification every three years," says Donald Lott, ag pesticide inspector for the Pennsylvania Department of Agriculture. Lott briefed the 300 farmers attending the York County annual corn clinic on how to go about updating their pesticide certification.

According to Lott, officials knew from the beginning that recertification would be necessary, but no one was exactly sure of the method to be used. The first certification period runs out in September, 1980, and regulations governing the relicensing procedure have already been changed three times.

Private applicators can be recertified by attending one of numerous update seminars being incorporated into a variety of area meetings, such as the county corn clinics. Applications are available at the meetings and farmers need their certification cards and the identification number on them to complete the forms.

Lott said by late August or early September farmers will be receiving renewal applications if they have not already been recertified; and these will be available for farmers who have not obtained their forms at one of the meetings.

"Have your updated certification in your possession at all times," the inspector urged. "If you lose it, contact the extension office immediately for a duplicate."

To insure compliance with the law, spot inspections are being made, at an average of three checks per county per month. Farmers not able to show proof of certification will have their license to buy toxic pesticides revoked and will have to be retested to obtain a new card

A resident of Adams County, Lott invites farmers with questions on pesticides or the recertification program to contact him at any time either at his office at 717-787-3400 or at his home 717-642-8060.-JB

MF 100-190 HP Tractors

NO FINANCE CHARGES Until March 1, 1980

PLUS Special 10% annual percentage rate financing for the next year!

Don't let high finance rates stop you from buying the tractor you need Right now during Massey-Ferguson's "Early Bird Bonus Days," when you buy one of our hard-working MF 2000 Series Tractors and finance it with MF, you'll pay

- NO FINANCE CHARGES until March 1, 1980
- A LOW, LOW 10% annual percentage rate for the next full year (March 1, 1980 to March 1, 1981) of the contract

PLUS if you buy before January 1, you may be eligible for INCOME TAX SAVINGS that can make even more of a difference

We have some super deals on these two-wheel drive tractors and a whole lot more during MF "Early Bird Bonus Days." So hurry in for details OFFER ENDS February 1, 1980

Farm organizations support better roads, property rights

CAMP HILL — The Pennsylvania State Council of Farm Organizations resolved Monday to support better roads for farmers

In addition they voted a number of resolutions supportive of individual property rights.

The Council is comprised of members of almost all farm groups and interests in Pennsylvania

Citing the deteriorating condition of Pennsylvania highways, the group decided to support the current HB 2103

That bill allows vehicles to engage in local pickup and delivery of agricultural commodities and to use secondary roads regardless of posted weight limits

Members pointed out many trucks involved in hauling goods to and from farms today weigh over 30,000 pounds

They noted many of these secondary roads are "pancake roads" or roads without proper foundation

The measure was adopted in support of the food processing industry which said it feels the Pennsylvania Department of Transportation's demand for a bonding agreement or discontinuation of use of roads is not fair

PennDOT has asked roads be posted up to a 15 ton limit

In addition, the resolution called for the Commonwealth to maintain secondary roads within a 10 mile radius of processors' plants to accommodate the maximum truck weight limits

Members resolved to support and endorse any bills which would provide a more equitable workmans compensation system both for agricultural employers and employers in general

The members passed resolutions stating in different ways their support of personal property rights

They resolved to oppose the use of Wilderness Areas

The much-discussed resolution was born out of the controversy in the Warren, McKean and Elk County area where the government has proposed to take 36,000 acres of privately held land for a Wilderness Area

Much of the land is in timber holdings The resolution drew strong support from the Christmas Tree Growers Association which opposed any chink in the armour of such a resolution

One point of debate was whether or not to support multiple use of such lands or to support other appropriate land use

Both ideas were felt by the Christmas Tree growers to leave the door open to government taking of ag land

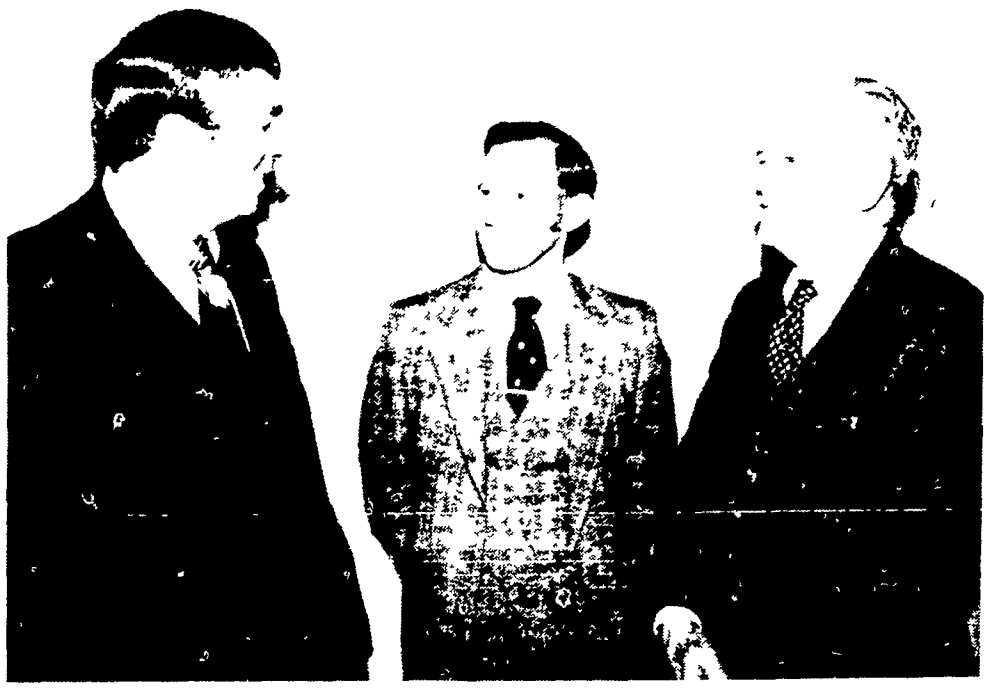
The members took a strong stand against government taking of farm land

They re-affirmed a resolution supporting legislation to prohibit use of prime farm land for highways and certain disposal purposes unless a committee with knowledge of land use determines there is no feasible alternative

They added a resolution stating that if such land is not utilized in the originally intended purpose within 10 years, that the original owner shall be entitled to re-acquire the property

Rather than tie down a fee schedule for re-acquiring the land they left their statement broad

Two alternatives considered were using the original price to re-acquire the land and paying a fair market price



Robert Delano, left, President of the American Farm Bureau Federation met with Eugene Gayman and Donald Parke at the Council of Farm Organization meeting. Gayman is president of CFO, and president of Pennsylvania Farmers Association Parke is CFO vice president, and executive director of PennAg Industries Association.

Also in the personal property area, they strengthened their resolution kon the state trespass law

They asked the state to impose a minimum fine of $300 for trespassing In addition they called for full restitution of any damages to personal property

They continued to oppose dog racing in the Commonwealth The resolution was adopted to protect the harness racing funds which support agricultural research

In addition, the members approved several changes in the by-laws of the Council

Among them were increasing the numbers of members on the executive board to allow wider representation of the many member-farm groups

The fiscal year was changed, and several other modifications were made in the by-laws to conform to present needs.

Speaker at the evening banquet was Robert Delano, the new president of the American Farm Bureau Federation.

Members also were given an update on preservation of agricultural land Speakers included Millersville farmer Amos Funk, Ken Greider, Executive Director of the State Association of Township Supervisors, State Representative Noah Wenger, and Deputy Secretary of Agriculture Chet Heim — CH

Hans Herr FFA'ers elect new officers

Willow Street morning session

WILLOW STREET — The Hans Herr chapter of the Future Farmers of America elected officers at a recent meeting. These represent students attending the morning class session at the Willow Street Vocational-Technical School, according to Jim Kerr, chapter advisor.

Steve Spayd, 17, was an FFA member for three years, is from Solanco High School and is studying horticulture at Willow Street Vo-Tech School. He now holds the office of president of the Hans Herr Chapter of the Future Farmers of America. He is also involved in Mechanics Grove Youth Group, the Robert Fulton Fire Company, the Wakefield Ambulance Crew, and for six years, the Lancaster County 4-H Dairy Club. He lives presently at Nottingham R1.

Vice-President of the Hans Herr FFA Chapter is Barbara Gibble She attends Solanco Senior High and is in floriculture at Willow Street Vo-Tech. Barbara, 16, a Girl Scout for 9 years, and for five of those years she held the position of president. She is on the Solanco Girls Basketball Team and resides at Quarryville R2.

Also from floriculture at Willow Street Vo-Tech is Cindy Bechtol, FFA secretary. Cindy, 18, attends McCaskey High School. Her activities include the Science Club, Vidette (school newspaper staff) and her school's Literary Magazine entitled "Burning Glass".

From Pequea Valley High School and floriculture at Willow Street Vo-Tech, is Suzanne O'Shields, treasurer. Suzanne, 16, was a member of 4-H Club for three years. Two of those year she was a secretary.

FFA reporter of the Hans Herr Chapter is Ginger Roehm. She is sixteen years old and her activities include Student Council for three years at Lampeter-Strasburg, one of which she was secretary. She was also a freshman cheerleader at Lampeter-Strasburg. She presently attends Penn Manor High School, and is in horticulture at Willow Street Vo-Tech. Ginger is employed at Willow Street Diner, and lives at Willow Street R2.

From Pequea Valley is Shari Skethway, 16. Shari was elected sentinal of the Hans Herr FFA Chapter. She lives at Paradise R2 and her activities include varsity field hockey, varsity gymnastics and the Gordonville fire company Auxiliary Shari is also in floriculture.

Student advisor or parlimentarian is Bill Howard, 15. He attends Willow Street Vo-Tech for horticulture and his home school is Solanco Jr. High. At Solanco, Bill is involved in Wrestling, and Drama. He lives at Quarryville R1.

From Solanco, Julie Herr, was elected chaplain. She is in Floriculture at Willow Street Vo-Tech. Some of her activities include working on the farm at her home, and she grows flowers for a hobby. Julie, 15, lives at New Providence R1.

Willow Street afternoon session

WILLOW STREET — Officers of the afternoon session of the Willow Street Vo-Tech's Hans Herr Future Farmers of America chapter were elected recently.

President Mary Rose, 17, a senior at Solanco High School. She has been in FFA for two years. She placed third in county FFA floriculture contest, and has the greenhand degree. She lives at Nottingham R2.

Carmen Baciotti, 17, is vice president. He is a senior who goes to Lampeter Strasburg High School. He has been in FFA for two years. He placed ninth in county FFA Horticulture contest. He also is in varsity wrestling at his home school.

Deb Stivly, is Secretary. She is a senior at Solanco High School. An FFA member for two years, Deb, 17, was involved in state and county FFA floriculture contest. She works at Quarryville, R3.

FFA officers for the afternoon session at Willow Street Vo-Tech include: From left, Lisa Deisley, teasurer; Mary Rose, president; Deb Stivly, secretary; Hildegard Walton, reporter; Jeff Miller, student advisor; Carmen Baciotti, vice-president; Wes Prichard, chaplain; Karen Silvius, sentinel.

FFA officers for the morning session at Willow Street Vo-Tech include the following: From left, Bill Howard, student advisor; Shari Skethway, sentinal; Julie Herr, chaplain; Suzanne O'Shields, treasurer; Barbara Gibble, vice president; Ginger Roehm; reporter; Cindy Bechtol, secretary and Steve Spayd president.

Treasurer is Lisa Deisley, 17, a senior at McCaskey High School. She has been in FFA for 2 years, and has the Greenhand degree She works at Turkey Hill Minute Market on Manor Street, and lives at 710 High Street, Lancaster.

Hildegard Walton, 17, is reporter. She is a Senior at Lampeter Strasburg High School, and has been in FFA for one year. She is in Safety League at her home school. She lives at 222 Miller Street, Strasburg.

Wes Prichard, 16, Nottingham R2, is Chaplain. He is a senior at Solanco, and has been in FFA for two years. He placed first in FFA horticulture county contest and seventh in the state, and has the Star Greenhand degree.

Karen Silvius is sentinel. She goes to Penn Manor High School where she is a senior, and has been in FFA for two years. Karen, 16, placed third in county FFA contest and sixth in state, and lives at 2 Maplewood Circle, Willow Street.

Jeff Miller, 17, is our student advisor. He is a senior at Solanco and he placed third in state and second in the county in FFA contests. He will proceed to national. He is in football and wrestling at his home school and lives at Quarryville R1.

1980 National Angus show held in Denver

ST. JOSEPH, Mo. — Angus producers at the 1980 National Western Stock Show in Denver staged one of the strongest breeding cattle shows in the history of this traditional January livestock extravaganza.

Grand champion bull of the open breeding cattle show and the 1980 national Angus Show was Ankonian Sentry, the senior champion, shown by Quirk Land and Castle Co., Hastings, Nebraska. Calved April 14, 1977, the bull weighed in at 2,287 pounds just before entering the show ring.

For his reserve grand champion bull judge George Ellis, Columbus, Montana, selected Ken Caryl Mr. Angus 8017, the 2,265-pound reserve senior champion bull owned by Angus International, North Platte, Nebraska, and Ken Caryl Ranch, Littleton, Colorado.

Sayre Farm, owned by Mr. and Mrs. Sayre MacLeod, Phelps, New York, had the grand champion heifer of the 131 head female show. She is Sayre Patriots Lena, the intermediate champion.

Judge Ellis went to his junior champion heifer for reserve grand champion. She is Premier Blackbird 317S shown by R.H. Holcomb Jr., Ruxton, Maryland; Bluegrass Angus, Danville, Kentucky; and Premier Angus, Cloverdale, Indiana.

Carload, Pen Champions

Grand champion carload of bulls was shown by Ken Caryl Ranch, Littleton, Colorado. The 15 junior calves averaged 278 days of age, and had an average weight of 603 pounds for an average weight per day of age of 2.89 pounds.

The reserve grand champion group was the carload shown by Windy Acres Angus, Harrison, Nebraska. The 15 junior bull calves averaged 302 days of age, weighed 800 pounds and had an average weight per day of age of 2.65 pounds.

The Baldridge Place, North Platte, Nebraska, exhibited the grand champion pen of three bulls. The three calves average 333 days of age, weighed 853 pounds, and had an average weight per day of age of 2.56 pounds.

The reserve grand champion pen was shown by Huckfeldt and Krebs, Gordon, Nebraska. They average 677 days of age, weighed 1,507 pounds and averaged 2.23 pounds per day of age.

Judges of the 21 pens and the seven carloads were Bob Sitz, Harrison, Montana; Howard Hillman, Canova, South Dakota; and Henry Gardner, Ashland, Kansas.

Other National Champions

In the individual bull show the junior champion was General U Patton shown by R&J Ranch, Briggs, Texas; New Melleray Corp., Dubuque, Iowa; and Hicks and Patton, Union Springs, Alabama.

Craft Lucky Strike, was the reserve junior champion bull. He is owned by Robert Zeedyk, New Carlisle, Indiana, and Nancy Schwabenlender, Wauwatosa, Wisconsin.

Sir Wms Warrant, was the intermediate champion bull, shown by J.B. Jobe, Littleton, Colorado, and Quirk Land and Cattle Co., Hastings, Nebraska.

Reserve intermediate champion was Briarhill Jay, entered by Picket Fence & Lincolnland, Grayslake, Illinois; James J. Hicks, M.D., Union Springs, Alabama; and L.B. Pierce and Sons Inc., Creston, Illinois.

The senior bull calf champion was R&J Commander 658, shown by Treasure Cove Farms, LaCygne, Kansas, and R&J Ranch, Briggs, Texas. Reserve senior bull calf was Tree Lane Superior 36, Tree Lane Farm, El Paso, Illinois.

Junior bull calf champion was Ken Caryl Ironsides 0498 shown by Buck Stevens, Point Reyes, California, and Ken Caryl Ranch, Littleton, Colorado. The reserve was Thomas Cactus, shown by Robert E Thomas, Baker, Oregon.

Reserve junior champion heifer was Schearbrook Blackbird 160X exhibited by Lisa Bohlen, Howell, Michigan

The reserve intermediate champion heifer was E&W Enchantress G21, shown by Stacie Ellis, Greentown, Indiana.

Laura Hart, Adair, Illinois, had the senior heifer calf champion, Double HH Erica 8530 Jeffrey S Johnson, Summitville, Ohio, had the reserve senior heifer calf champion, Summitcrest Irene K388

Weaver Angus Farms, Peoria, Illinois, showed the junior heifer calf champion, WAF Zaramere 905. Reserve champion was Nelson Betty Lue 9030, exhibited by Clyde Nelson, Salmon Idaho

Tree Lane Farm, El Paso, Illinois, and Way View Farms Inc., Hebron, Ohio, won first in the get-of-sire class with the progeny of Byergos Black Revolution.

Junior get honors went to Glenkirk Farms, Maysville, Missouri, on calves by Eileenmere Masterpiece JAD. Briarhill Farms, Union Springs, Alabama, showed the best six head.

N.Y. firm suffers license suspension

RIVERHEAD, NY — The produce trading license of Philip Melfi of Riverhead, New York, doing business as Riverhead Food Terminal, was suspended by the U.S. Department of Agriculture, after he failed to pay a reparation award of $6,476.

The department's Agricultural Marketing Service set the award in favor of a Florida shipper for watermelons purchased in May and June of 1978.

The firm failed to answer the charges, and the department ordered payment of the amount claimed.

Riverhead Food Terminal is not eligible to operate in the produce business under the Perishable Agricultural Commodities Act until the award is paid. In addition, Philip Melfi—the firm's sole officer, director and stockholder--may not be employed by or affiliated with any PACA licensee with the department's approval.

All interstate traders in fresh and frozen vegetables must be licensed under PACA, which establishes a code of good business conduct for the produce industry. The department is authorized to suspend or revoke a trader's license for violating the Act.

Don Powell, left, of Strasburg, a district sales manager with the Gehl Company, received the R. M. "Dick" Gehl Total Performer trophy from John G. Kamps, center, Company president, during a recent Sales Meeting held in Oconomowoc, Wisconsin. This trophy is presented annually for the highest overall performance by a member of the Gehl sales force. Looking on at right is Bill Lanhper, regional manger of Powell's territory. Powell was cited for his "*overall total performance with regard not only to sales performance, but for his* dedication to dealers and customers as well."

Del. picks All American Pork Producer

SMYRNA — George P. Staats of "Imperial Farm," a purebred swine operation just west of Smyrna, has become Delaware's All-American Pork Producer for 1980.

Besides supplying many commercial producers in Delaware with breeding stock, Staats has shipped hogs to growers in Virginia, North Carolina, Connecticut, New Hampshire, Pennsylvania, Maryland and New Jersey. He recently sent boars and gilts to Russia and Brazil.

Staats' pigs have done well in state boar trials as well as at area fairs.

A pen of Imperial Farm Hampshire boars led the 11 pens of boars from four states on test at the Delaware 1979 Boar Test Station run cooperatively by the Delaware Pork Producer's Association and the Delaware Cooperative Extension Service The pen indexed 136

He also produced the leading boar, a Hampshire with a 153 index, an average daily weight gain of 2.27, a feed efficiency rating of 247, and 5 inches of backfat.

One of his Yorkshire boars led the test with a daily weight gain of 2.34 pounds.

Last summer he had champion Yorkshire and Hampshire gilts and reserve champion Hampshire and Yorkshire boars at the Delaware State Fair. He also exhibited the second place January Yorkshire boar at the 1979 Maryland State Fair.

Staats' herd includes 110 purebed sows–65 of them Yorkshires and 45 Hampshires.

Farrowing is done in crates on solid concrete floors, with pine shavings for bedding. Sows are turned out twice each day for feeding and watering.

After 10 days to two weeks in the farrowing house, he moves sows and pigs to an open-fronted nursery, with two sows and their litters in each pen. Pens are bedded with a separate sleeping area for the young pigs. Weaning takes place at eight weeks.

After weaning, sows are placed in outside lots until it is time to breed them again. All are hand mated.

In order to make new bloodlines available, Staats buys purebred herd sires from type conference sales and other purebred producers' farms.

George P. Staats of "Imperial Farm" near Smyrna has been named Delaware 1980 All-American Pork Producer.

Young boars and gilts are developed on either pasture or concrete. His pasture system is a rotational one where animals go onto new grass-legume pasture each year.

Staats and his 19-year-old son, Ray, are in partnership farming 1200 acres of corn and soybeans and 100 acres of vegetable crops. They hold a swine production sale in the spring and fall.

The new All-American winner is a director of the Delaware Pork Producers Association, member of the ASCS committee, chairman of the board of his local Southern States Cooperative, and a 4-H club leader

Local presentation of his award was made January 15 at the annual banquet of the Delaware Pork Producers Association He will receive a special plaque from the National Pork Producers Council when the American Pork Congress meets in St. Louis in March.

According to University of Delaware extension livestock specialist Dr. Dick Fowler, about 40 states now participate in the All-American pork producer program.

Winners are selected on the basis of production efficiency, leadership in their local swine industry, participation in civic activities and general overall excellence in farming.

Nominees must be under 40 and must have made an outstanding contribution to the pork industry in their state.

Carter's gas rationing plan ignores farmers

WASHINGTON, D.C. — The chairman and ranking minority member of the Senate Committee on Agriculture, Nutrition, and Forestry charged Wednesday that the Carter Administration's proposed standby gasoline rationing plan ignores the intent of Congress to give priority to agriculture if shortages occur.

Senators Herman E. Talmadge (D-Ga.) and Jesse Helms (R-N.C.), in a joint letter to Energy Secretary Charles W. Duncan, Jr., asked that the proposed plan be amended "to assure adequate fuel supplies for the complete food chain."

"Unless the plan is amended, we will run the risk of seeing crops rotting in the fields while the public experiences grossly inflated food prices caused by shortages," Talmadge and Helms said.

The two Senators said that Congress, in its second effort last year to write legislation authorizing a Standby Gasoline Rationing Plan, clearly intended that agriculture is to be given priority treatment for gasoline supplies in time of shortages.

"The proposed plan's provision on agricultural priority, which is almost identical to the one congress rejected earlier, fails to meet the requirements of the Emergency Energy Conservation Act of 1979 and is inconsistent with the President's recent assurances of adequate fuel for agricultural operations," Talmadge and Helms told Duncan.

"In view of this clear Congressional intent, you may understand our surprise and concernt to find that the proposed Standby Gasoline Rationing Plan's priority for agricultural operations is nothing more than a promise to supply 'supplemental fuel rights' for 'off-highway vehicles' used in 'farming' in amounts sufficient to meet 'productions goals approved by the President,'" the letter said.

"Though farming is the most important link, it is just one segment of the food for every American. Fuel must be available at every step of the food chain - or the whole system breaks down. In addition, to limit the priority to 'off-highway vehicles' does not recognize that one-half of the gasoline consumed on the farm for food production purposes is used by 'on-highway vehicles.'"

A Good Buy

Chicken remains one of the best meat buys on the market these high-price food days. It provides excellent protein for fewer calories than most meats

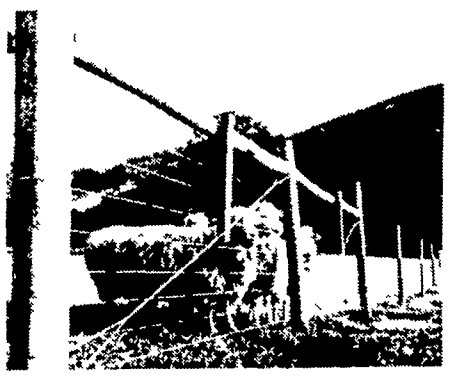
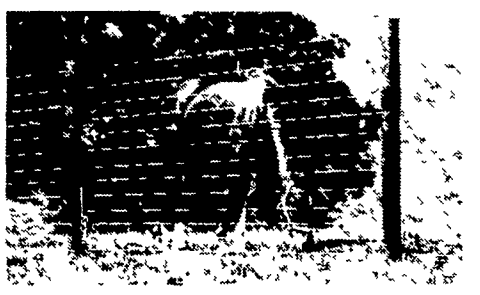
HIGH-TENSILE WIRE FENCING FOR CONTROL OF CATTLE, SHEEP, HORSES, HOGS, DEER, DOGS, COYOTES & RACCOONS





This fence is constructed with 10 strands of smooth, 12½ gauge HIGH-TENSILE FENCE WIRE - wire so strong (200,000 psi minimum ultimate tensile strength) and so durable (Type III galvanized) it is doing much to revolutionize farm and range fencing.

SECURITY WITH ECONOMY - Although new in this country, high-tensile wire fencing has been performing well on the vast ranches of Australia and New Zealand for 30 years. HIGH -TENSILE FENCE WIRE is twice as strong as barbed wire, easier to handle and safer for livestock. A ten-wire high-tensile fence costs about the same as a five-strand barbed-wire fence and 30% less than a woven-wire of equal height; but it lasts longer and looks neater with less maintenance than either of them.

ALL-PURPOSE VERSATILITY - High-tensile fencing uses the higher strength of the wire, so that - once up and stretched to 250 pounds minimum tension - each strand of High-Tensile wire withstands over 1,000 pounds of livestock pressure or low- temperature contraction without losing its elasticity. Tension is maintained by seasonal adjustment of permanent in-line wire strainers. Sheep do not like the wire's stiffness, and neither do horses; and cattle that have charged high-tensile fences have bounced back with no damage to their hides but no wish to try again.

ELECTRIC FENCES - High-Tensile Wire Fence also lends itself to electric fences, and various designs have been erected which turn away deer, dogs, coyotes and raccoons - even bears.

IFYE honors Moon after 35 years service

BY SALLY BAIR
Staff Correspondent

HARRISBURG — "I'm overwhelmed," Henry Moon said simply as he accepted an award by the Pennsylvania International Farm Youth Exchange (IFYE) Alumni Association recently in Harrisburg.

Moon, formerly assistant state 4-H leader and assistant professor of agriculture extension at Penn State, has retired after 35 years of service. In his last 15 years with the University, Moon's duties included working with IFYE delegates and exchangees and other aspects of international program.

Moon supervised the international adventures of 96 young people in the IFYE and 4-H Teen Caravan program. It was an experience which left a deep impression on him.

"I enjoyed every minute of it. It brought me a lot of happiness. I cannot express what it has meant to me in my life," Henry told the group of thirty-five alumni who gathered to honor him. "I owe many moments of happiness to the program and I appreciate what you've done for me."

The Association presented Moon with an engraved silver plate and a framed picture featuring the IFYE emblem surrounded by paintings of nationals from ten countries.

Moon is understandably enthusiastic about the benefits of this international program. "For those who participate," Moon states, "They experience personality growth and gain a depth of understanding about the family and role expectations. It is a great contribution to them in getting ready for life."

He said there is a "deep emotional impact" on the delegates and their hosts in another culture.

In the IFYE exchange program, young people travel to another country and live with farm families there in an effort to gain better understanding of that country's way of life.

Henry added, "The acceptance of a child-parent relationship must have a solid effect on the depth of international understanding achieved."

Over the years, Moon says, "The value to the individual has remained the same. They really learn to understand another way of life by living it."

Some changes have occurred, however. The name of the program has changed from International Farm Youth Exchange to International 4-H Exchange, reflecting the fact that more and more 4-H'ers are non-rural.

The Teen Caravan program has been developed as an opportunity for younger 4-H'ers to experience an international exchange on a shorter, smaller scale. Further more, Henry notes, there are now speciality interest groups which travel behind the iron Curtain countries of Poland, Hungary and Russia.

More developing countries are participating through the Youth Development program in which young people travel as advisers who work with youth in their host country. Henry noted additionally that relations with some Latin American countries have become strained as governments change.

The program held its first exchange in 1948 and someone from Lehigh County in Pennsylvania was among the first eight young people to travel abroad in an effort to create a better international understanding which might prevent another war such as the one the world had just experienced.

It has grown and continued to offer hundreds of young people the opportunity to live with host families abroad. In Pennsylvania a total of 136 young people have participated in the program as delegates.

Moon has also been responsible for the exchangees who come to Pennsylvania to live with farm families in this state, and at times, it has provided both challenge and humor. The opportunity for the exchangees is unique.

Moon states, "The exchangees get a more honest and accurate opinion of the American family life. They see a contrast with the television shows, wild west programs and movies which are often offered in other countries to portray the American way of life.

"I have had the constant feeling that exchangees are overawed to find that the American farmer works and American kids work. Many of them come from a class system in which they don't work. They have learned to appreciate the American approach to the work ethic."

He added, "Exchangees often go home saying, 'Americas don't have time to relax'".

Officers of the Pennsylvania International Farm Youth Exchange Alumni Association present retiring Assistant State 4-H Leader with an award honoring his work with the exchange program. From left, Davida Waters, former vice-president; Douglas Pierson, president; Henry Moon and wife Bunny.

Moon notes he often finds the first host family is the one with which the strongest bond is made because it is there that the language is the biggest problem.

"Delegates are so frequently endeared to the first family that they want to return and show off what they have learned."

Moon said he has appreciated all the letters he gets from exchangees when they return home, adding, "Welcoming home IFYE's means so much to me."

He said his work with the program has "built a whole family of contacts. The IFYE program is a hard thing to leave."

Moon is married to the former Bunny Ely. They are the parents of four married children and have five grandchildren.

Dauphin Co. 4-H dancers win blue at Farm Show

HARRISBURG — One of the highlights of the Pennsylvania Farm Show is the Folk and Square Dance Contest, according to Frederick Rudy, Extension Agent - 4-H Youth, in Dauphin County. This year the Dauphin County 4-H Clubs entered two sets in the competition.

This was the first year of competition for these 16 4-H'ers. These 4-Hers danced three dances to determine the white ribbon placings and one additional dance to determine the red and blue ribbon placings.

The set entered in the under 17 class won a blue ribbon. This set consisted of eight 4-H'ers. They were: Brenda Hensley, Brenda Fisher, Shelly Fetterhoff, Cindy Baker, Greg Taylor, Kurt Hess, Eric Kreider, and Calvin Dimpsey.

The second set won a white ribbon. These eight were: Tina Taylor, Wendy Wiestling, Lisa Yohn, Barbara Baker, Rick Baker, Todd Kohr, Doug Shope, and Scott Rummel.

SCS urges only best land be cropped

HARRISBURG — "Pennsylvania farmers must soon decide whether to keep their soil tied down on the land or to allow additional millions of tons of it to wash or blow away this season," said Graham Munkittrick, State Conservationist for the USDA, Soil Conservation Service.

"Because of an excellent demand for American grain in the year ahead, there is no set-aside or diversion for wheat and feed grains, and each farmer will decide for himself how much cropland to plant," Munkittrick said.

He pointed out that the most serious soil erosion occurs on a fraction of the cropland, usually sloping land with highly erodible soils. He warned that switching to crop production on hard-to-protect acres can undo years of work and hundreds of millions of dollars invested in soil conservation practices.

"Whenever farm prices are high, we see thousands of acres of cropland that should never been plowed and the destruction of a lot of good conservation systems," he said. "Each farmer should ask himself if the chance in the short run is worth the risk of long-range damage to his farm."

Munkittrick added that marginal lands are not the only source of soil erosion.

'Even in a so-called normal' year, about 31 million tons of soil wash away from Pennsylvania's cropland," he said. "Millions of acres of cropland in current use need more conservation applied.

Many farms need more contouring, contour strip-cropping, terraces, and more conservation tillage," Munkittrick said.

He urged farmers to plant only the best, protected land to crops, and save the rest for future generations.

Technical and financial assistance in controlling erosion is available from several Department of Agriculture agencies, including the Soil Conservation Service and the Agricultural Stabilization and Conservation Service.

Lancaster Co. Cons. Dist. holds seedling sale

LANCASTER — The Lancaster County Conservation District directors are offering all landowners an opportunity to beautify their property and improve Lancaster County's Environment.

Once again they are sponsoring their annual tree seeding sale.

A check issued to the Lancaster County Conservation District shall accompany all orders and must be received at the District Office, Room 6, Farm and Home Center, 1383 Arcadia Road, Lancaster, PA 17601, by March 12, 1980. 717-299-5361

Seedlings will be picked up at Long Park, Pavillion #1, 1441 Old Harrisburg Pike, Lancaster, between 9 a.m. and 1 p.m. on Saturday, April 12, 1980.

Long Park is located south of Park City Shopping Center.

NFO rep says world demand will offset grain embargo

BY DON CUNNION
Staff Correspondent

DOYLESTOWN — The rapidly expanding world demand for feed grains will more than offset any temporary price setbacks caused by the embargo on sales to Russia, Orva Kanerva, NFO grain representative, told some 50 Bucks County farmers at a meeting, Wednesday in the Neshaminy Manor Center near here.

Kanerva pointed out the population explosion changes in dietary habits and the shift from rural to urban living in all parts of the world are major factors in a massive increase in demand for high-protein foods.

Even India, he said, once a major exporter of wheat, now is an importer of grain.

The United States, he said, will be called on to supply a major share of the world's grain needs.

He noted the U.S. now accounts for 50 percent of all wheat moving in international trade and that most other grain producing countries, including Canada, have had static outputs the last few years.

"While Canadian wheat output has remained virtually the same for the last five years, U.S. production has gone from 3580 million bushels to a projected 5400 million bushels for 1980."

Despite their tremedous expansion in grain production, U.S. farmers continue to depend on a 200-year-old marketing system run by private operators who are more interested in volume than price, Kanerva said

"Most farmers sell to individuals and try to outguess the market. As a result, three percent sell on a rising market, half of one percent sell at the top of the market, but 90 percent wind up selling at the bottom of the market."

"The present marketing system reacts to all kinds of things he said. "Most of them psychological in nature. But the underlying factor is that it depends on a plentiful supply of grains at relatively low prices

"These low prices have been a driving force in increasing the efficiency of U.S. farmers, but they also have forced many of them out of business over the years. We're now to the point where a million farmers produce most of the food and fiber moving in commercial channels."

But cheap grain isn't necessary in world trade, he said.

"You hear the grain traders insist the world market won't pay higher prices for U.S. grain, that they'll go elsewhere. But where can they go? No other countries can come anywhere near meeting world grain needs The grains just aren't there They're here - in the U S."

How can farmers beat the time-honored, conventional marketing system? Kanerva offered an answer· Sign up with NFO to sell the grain for them under a binding contract.

Copies of the contract, passed out at the meeting, provide for both immediate sales and deferred sales Under the latter, a grain grower can commit a fixed number of acres or bushels for a period of up to five years, thus providing the NFO with a "bank" from which to draw for negotiated sales

' This reserve supply will enable NFO to negotiate for the best possible prices in massive quantities in the world market," Kanerva said.

The "immediate sale" portion of the contract is designed to provide producers with needed operating cash.

Kanerva pointed out that NFO, which started out as a protest organization, nowadays operates chiefly as a marketer of grain, milk, livestock and specialty products, such as sunflower seeds, for its members. It sells on commission.

The meeting, one of 175 being held around the country under the title of "Stop the Drop" in grain prices, was called together by Bill Garges, Bucks County NFO president.

Brief talks were given by J.H. Rushing, hog representative, and Warren Marsh, grain representative

Government regulation reducing dairy drugs

NEW ORLEANS, La. — Government regulation is discouraging research on animal health problems and limiting the range of products available for less numerous species of food-producing animals, a drug industry spokesman has charged.

Dr John Crissinger told dairymen attending the annual meeting of the National Milk Producers Federation the increasing cost of securing government approvals for new animal drugs, and of defending drugs already approved, means that research must be directed toward the largest possible market

Crissinger, a veterinarian, is marketing manager for American Cyanamid Company's Professional Veterinary Products line.

Crissinger pointed out that, because of the cost of meeting regulatory requirements, few if any pesticides are being developed for vegetable and fruit crops

"The market is simply too fragmented to justify development costs in most instances," he explained.

"We find this scenario already occurring in animal agriculture," he cautioned.

"Dairy cattle will remain an important market, but in the long run veal calves and cull cows may well be affected."

In today's Washington climate, the speaker said, individual interest groups are finding they can no longer stand alone.

While dairymen have been effective in advancing their interests, Dr. Crissinger urged them to seek the wider constituencies which will be necessary in the future.

"Build support not just for milk but for the dairy industry among consumers and in our own communities" he urged. Dr. Crissinger pointed out that the average dairy farmer manages a larger capital investment than most independent businessmen in most communities.

"You probably are respected in your community as an important businessman," he said. "Use this leadership position to help build support for your industry."

Apple holdings off

HARRISBURG — Pennsylvania apples in cold storage on November 30, 1979 totaled 291,939,000 pounds, or 6,951,000 boxes of 42 pounds each, according to the Pennsylvania Crop Reporting Service

Apple holdings are down 9,736,000 pounds (or three percent) from a year ago.

York Imperial apples are most abundant with 2,236,000 bushels in cold storage.

Three apple varieties closely ranked in cold storage include· Golden Delicious apples at 1,118,000 bushels; Red Delicious at 1,082,000 bushels; and Rome Beauty apples at 1,009,000 bushels

Purebred sheep meeting to run at Ohio State

DENVER, Colo. — Following the theme of Progress with Purebred Sheep: Challenges and Change, a National Purebred Sheep Symposium will be held at the Columbus, Ohio, Hilton Inn, March 23-25, 1980.

Purebred breeders, commercial producers and educators from all parts of the country will take a critical and forward-look at the place of the purebred industry in the total scope of today's American Sheep Industry

Sponsored by the Sheep Industry Development Program and the Animal Science Department of Ohio State University, the Purebred Symposium will get underway with registration at 10:00 a.m. Sunday, March 23, followed by a tour of the Ohio State University Sheep Facility and purebred and commercial flocks.

The Symposium will wrap-up with the challenge of "Where Do We Go From Here Goals, Guideline for the Future" on Tuesday afternoon, March 25.

Larry Mead, editor and publisher of the Sheep Breeder and Sheepman magazine and very well-known in all purebred circles, will deliver the keynote address at a lamb banquet Sunday evening

On Monday, the general session will open with a look at the purebred industry from the standpoint of purebred breeders, commercial producers and educators.

The Monday program will include discussion of What is the Value of Breed Type; Structural Soundness. Is It Genetic or Environmental; Body Size: Where Do We Go From Here and Why; Are You a "Breeder" or "Multiplier;" Breed and Flock Promotion and Changing Our Approach to Shows and Sales.

A panel of purebred breeders will also describe their breeding programs and how they work

Following a lamb barbeque at Ohio State University, the evening program will look at Opportunities for Controlling Reproduction, Synchronization of Estrus, Ovulation, Induced Parturition, and the Use of Frozen Semen and A.I. for Sheep. Demonstrations and discussion will be held on guidelines for carcass improvement, carcass data; the importance of blood grouping and typing, and research in reproductive physiology including fertilization and ova transfer.

An open forum will provide plenty of opportunities for participants to pose questions to the speakers.

The Tuesday program will cover Group Breeding – A New Concept for Rapid Breed and Flock Improvement; the Future for New or Synthetic Breeds and Types; Identifying Superior Individuals for Flock Replacement; and a panel on How I Like Performance Testing in My Flock.

An overview of the current testing programs will balance out the session

A panel of purebred breeders will also provide insight into their breeding programs along with a free-wheeling discussion of Managing the Purebred Flock for Production, Show and Sale.

The role of the National Purebred Associations' Future Purpose and Function will be analyzed with discussion of Centralized and Computerized Record Keeping, the Leadership Role and Coping with the Problem of Crossbreeding, and the Value of a National Purebred Organization.

Advance registration fee for the symposium will be $40 per person which includes the banquet, luncheons and a copy of the symposium proceedings. Tickets may also be purchased at the door for $50.

Advance registration checks should be made payable to SID, Inc. and mailed to the Sheep Extension Office, Department of Animal Science, Ohio State University, 2029 Fyffe Road, Columbus, Ohio 43210, attention Sharon Evans.

If you are unable to attend the entire symposium, single day rates are available at $25 per day.

Advance hotel reservations are recommended with special symposium rates of $32 single and $38 double at the Hilton Inn, 3110 Olentangy River Road, Columbus, Ohio 43202.

Be sure to specify you are attending the National Purebred Symposium. Reservations should be made directly with the hotel

N.Y.-N.J. milk prices up to $12.25/cwt

NEW YORK - Dairy farmers supplying milk plants regulated under the New York-New Jersey marketing orders during December will be paid on the basis of a uniform price of $12.25 per hundred pounds or 26.3 cents per quart.

Market Administrator Thomas A. Wilson, who announced December's price, also stated that the uniform farm price was $12.62 per hundredweight in November 1979 and $11.42 per hundredweight in December 1978.

The uniform price is a nationwide weighted average of the value of farm milk used for fluid and manufactured dairy products.

The total amount of milk received from the 17,567 dairy farmers supplying the New York-New Jersey Marketing Area was 824,323,298 pounds during December 1979.

This was more than 20.0 million pounds above last year. The gross value to dairy farmers for milk deliveries was $103,185,244.81.

Mr. Wilson explained that this included differentials required to be paid to dairy farmers but not voluntary premiums or deductions authorized by the farmer.

Regulated milk dealers utilized 394,080,064 pounds or 47.8 percent of the total amount of milk for Class I.

The Class I milk is used for fluid milk products such as homogenized, flavored, low-test and skim milks.

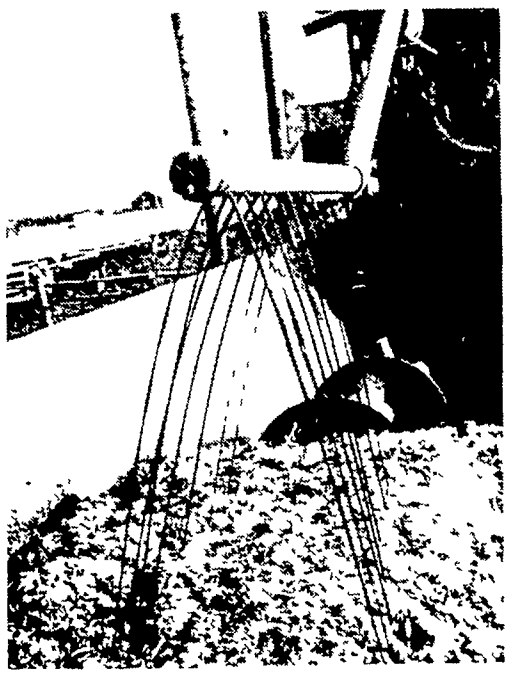
For December 1979, handlers paid $13.50 per hundredweight, or 29.0 cents per quart, for the milk used in Class I products compared with $12.43 a year ago.

The balance of the milk, 52 2 percent, was used to manufacture Class II products including butter, cheese, ice cream and yogurt. For this milk the handlers paid $11.40 per hundredweight.

The uniform price is based on milk containing 3.5 percent butterfat. For December 1979, a differential of 15.0 cents was applied to the price for each one-tenth of one percent that the milk tested above or below the 3 5 percent standard

All prices quoted are for bulk tank milk received within the 201-210 mile zone from New York City

ATTENTION ON THE FARM MIXERS



Improve your dairy, beef and sheep rations by incorporating Mol Mix/LPS Liquid Supplements in your grain or total mixed rations It's the proven liquid supplement formulated to provide your herd with low cost, high quality balanced diets for top performance

MOL-MIX/LPS

* Adds palatability for top feed intake
* Eliminates dry, dusty rations
* Adds low cost protein
* Eliminates ration separation
* Adds needed phosphorus, vitamins and trace minerals
* Does not add bulk
* Will not build up on equipment
* Flows evenly the year round
* Requires a minimum of equipment

Stop in or call today for Mol Mix/LPS and put palatability plus nutrition to work in your herd for top net dollar returns

Investment exec sees brighter cattle markets

KANSAS CITY, Mo. — Positive factors "decidedly outweigh" the negative in the near-term outlook for cattle breeders and investors, despite an impending recession and its potentially depressing effect on consumer demand, says Ronald Jarvis, Jr., president of Oppenheimer Industries, the Kansas City-based diversified agri-investment firm.

"Although we've seen a slight weakening in cattle prices in recent months, a number of important statistical trends prove very heartening for the near future, at least," said Jarvis.

"Most significantly, the Department of Agriculture has revised downward its estimate on fourth-quarter beef production, predicting a 17 percent decline in place of the 10 percent drop it originally foresaw. That certainly should have a positive effect on December futures prices."

Jarvis also noted that weekly cattle slaughter dropped recently to about 113,000 head, which is 21 percent below the figures of a year ago. And total red meat and poultry production now is expected to be off by one percent in the fourth quarter by USDA estimates, although a three-percent increase had been expected

"Price fundamentals for grain as well as cattle look very positive, despite crop harvests that currently far outstrip domestic demand," Jarvis observed. "Yet the mood among both ranchers and farmers is rather conflicting. They don't know whether buoyancy over current conditions or caution about the future should dominate their decisions.

"Normally, for example, this would be a time for recycling hefty proceeds into additional land and equipment," he explained.

"But the threatened recession and concern about interest rates are producing second thoughts about new investment. And availability of funds also may prove to be a problem. Many country banks already have loan-to-deposit ratios in the 65-70 percent range, the highest level in many years."

Jarvis recommended in light of conflicting signals, producers and investers "proceed with caution."

"But I certainly would put as much emphasis on the verb as on the noun," said the Oppenheimer president. "Proceed. Because with positive indications as strong as they are, I do not see this at a time for standing still in the cattle or grain industries."

On-farm storage: will it pay in 1980?

OCEAN CITY, Md. — This year promises to be the most expensive one yet to hold grain in hopes of obtaining higher prices later on, University of Delaware extension crops marketing specialist Carl German told a crowd of 850 farmers at the recent Delmarva Corn Technology Conference in Ocean City, Md.

It will cost more in at least two ways, he explained: (1) higher interest charges for financing inventory (perhaps obtained at 10 to 12 percent), and (2) greater risk that prices may not improve enough to pay for holding your crop.

"You can be sure that the costs of on-farm grain storage facilities are going to continue to rise," added the specialist.

The big question is whether revenues for drying and storage will be able to keep pace.

"If you decide that on-farm storage is for you," German cautioned the corn farmers gathered in Ocean City's Convention Hall, "shop around and do your homework. It's no longer appropriate to make flat recommendations regarding the cost and benefits obtained from on-farm grain storage."

The economist based his remarks on the results of a study he reviewed recently on the economics of on-farm corn storage.

The study takes into account the costs of owning and operating a variety of storage facilities, including batch-in-bin dryers with storage, batch-in-bin and stirrer dryers with storage, automatic batch dryers with storage, and continuous-flow dryers with storage at annual volume rates ranging from 6000 to 100,000 bushels.

When annual operating costs were calculated for these different systems, a 24,000-bushel facility was found to be the smallest size unit which is economically feasible at today's operating costs and corn prices.

The rate of return before taxes from on-farm storage units compared in the study ranged from negative to nearly 30 percent, reported German.

In some cases, the rate of return before taxes was below the interest rate which could have been earned on the money invested in the system. All systems involving 6000-bushel storage capacity yielded negative rates of return.

Furthermore, on-farm storage facilities of the type compared in the study only begin to become feasible for the 500-acre grain producer. And rising costs will have the effect of making the minimum farm size required even larger, predicted the economist.

Smaller producers wanting to store grain do have alternatives, he noted. They can look into the possibility of pooling their resources, labor and capital with other farmers.

Currently members of one grain company on the Shore pay an annual cost of approximately 59 cents per bushel for corn drying and storage (including interest on inventory).

Compared to this, one local commercial facility charges somewhere in the neighborhood of 98 cents per bushel.

The important thing is to look closely at all your options, stressed the economist. Every farmer should make a careful analysis of his costs and potential returns before deciding whether or not to invest in storage facilities on the farm.

Penn State conducts survey

UNIVERSITY PARK — Preservation of farm land, health care, employment, opportunities, education, transportation, energy, consumer protection–these are some of the issues that concern many Pennsylvanians today. They're also issues in a comprehensive survey being conducted in mid January by Pennsylvania State University researchers

Called "Pennsylvania: The Citizen's Viewpoint" the survey will ask more than 20,000 randomly selected Pennsylvanians their opinions on a wide variety of issues facing the state and local communities.

The survey is being done, according to project director Dan E Moore, so that local officials, citizens' groups and civic organizations can know what Pennsylvanians see as priorities for the 80's.

In preparing the survey, Moore and project coordinator Anne Ishler consulted with over 1000 of these key people.

A unique aspect of the survey is the large number of people who will be asked to complete the questionnaire. The main reason for this, says Moore, is to have enough people sampled in every county so that results can be analyzed by county, by region and by major urgan area.

How well survey reflects citizen opinion will depend on how well people respond to the questionnaire.

When similar surveys have been conducted in other states returns were in the 70 percent range. Moore feels that Pennsylvania can do at least as well

If you get a copy of "Pennsylvania. The Citizens' Viewpoint" in your mailbox take time to let our opinion be known.

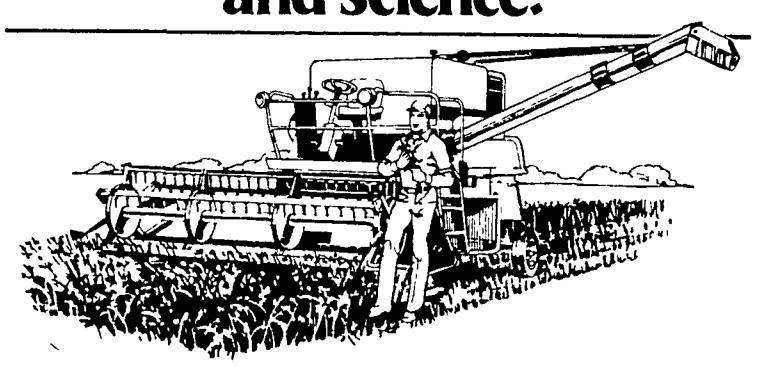
AGRIPRO SOYBEANS

The difference between luck and science.



AGRIPRO 10

A great new early group one variety, Agripro Ten can give you a head start over other varieties, with excellent emergence and standability, and race one phytophthora resistance.

AGRIPRO 25

An early group three variety, Agripro Twenty-five has demonstrated exceptional yield potential across the entire bean belt. It can withstand phytophthora stress, and has excellent standability.

AGRIPRO 20

A group two pureline variety that's topped university tests across the bean belt, Agripro Twenty is resistant to race one and tolerant to race three phytophthora

AGRIPRO 40

Our newest full-season group four variety, Agripro Forty has delivered outstanding yields, with phytophthora resistance, excellent emergence, good seedling vigor and good standability.

NAPB NORTH AMERICAN PLANT BREEDERS First in the science of yields.

Sale Reports

The first consignment auction of the year was held by Goodrich Auction Service, Newark Valley, N.Y. About 400 persons attended.

Over 20 tractors, 15 trucks, and 100 other pieces of equipment were sold. Prices were strong and the weather was fine. Auctioneers were Ed Goodrich, Jr.; Howard Visscher; Roy Teitsworth; and Tom Conhey. Buyers and consigners from Canada, New York and Pennsyvlania were present.

xxx

A Public Sale of Holstein Dairy Cattle and Farm Machinery was held January 16 by Merle C. and Minnie C. Eigenbrode, 2½ miles northeast of Waynesboro, Franklin Co., Pa.

The top price for a cow was $3025, 2nd was $2550 and 3rd high was $2300. Nine week to 6 month old heifers $500 to $610 and 8 to 10 month old heifers $800 to $890.

Other prices were· J.D. 2-B Plow $590, Case Tractor & 2 row Picker $2400, Welsh Trailer Sprayer $380, Grove Wagon $1625, Hesston Haybine $3800, Int. 4-row Corn Planter $2150, N.I. Manure Spreader $1300, old 1-row Potato Digger $195, 2 Iron Butcher Kettles $75 & $100 and 2 Snout Hooks $18 each.

Auctioneers were Edgar J. Stull & John Downin.

xxx

A Public Auction of farm eulpment was held January 18 by Jer-Lynn Farms, 10 miles northwest of Fogelsville, Lehigh Co., Pa.

Two large items sold were J.D. 4240 Tractor w/Quad. range $23,000 and J.D. 7000 4 row Corn Planter w/seed monitor, soybean & insecticide attach. $7,200.

Conducted by Ralph W Zettlemoyer Auction Co.

xxx

A Public Sale of very fine antiques was held at Redding Auction Service, 3 miles north of Gettysburg, Pa on January 19th. The sale for the Losha A. Grove Estate, 10 Center Square, New Oxford, Pa. was attended by 800 to 900 people who came from 8 different states.

Some items were. Small Chippendale Desk (restored) $3400, Grandfather Clock $5600, Farm Tables $775 to $1800, Chippendale Chest of Drawers $810 to $2650, Blanket Chests to $680, Valet Mirrors $140 to $260, 6 cane-seated Chairs $450, 1 & 2 Drawer Stands $115 to $350, Tilt-Top Stands to $870, Mixed Wood Corner Cupboard $2225, Folding Top Tables $475 to $625, Set 4 Windsor Chairs $1240, Windsor Side Chair $460, R.S. Prussia Bowl $1075, 6 Adams Plates, $330, Brass Buckets to $135 and Oriental Rugs to $2750.

C. David Redding was the auctioneer.

xxx

A Public Land Auction was held January 15 by Baldwin & Merkel, adjoining the borough of Kutztown and Kings Shopping Mall, Berks Co., Pa.

The 115 acres of open land without buildings containing 1000 feet fo road frontage was sold for $387,000.

Sale conducted by Ralph W. Zettlemoyer Auction Co.

xxx

A Public Sale of trucks, mechanics, electricians and plumbers tools was held January 19 by J. Richard Hummer, 1730 W. Main St., Ephrata, Lanc. Co., Pa.

Some items sold were: 1970 Chev. Pickup Truck with snow plow $2860, Lathe including parts and workbench $1100, Acetylene Torch & Tank $450, Hydraulic Drill Press $580, Black & Decker Rotary Hammer $235, Electric Chain Hoist $270, Electric Welder $160 and High-Powered Washer $140.

Auctioneers were T. Glenn & Timothy G. Horst.

xxx

A Public Sale of shop equipment and farm equipment was held January 15 by Henry U. & Barbara S. Stoltzfus, between Morgantown and Churchtown, Lanc. Co., Pa.

Prices received were: N.H. Grass Mower $1100, Iron Worker $3200, Portable 200 amp Welder $200, Diesel Power Unit $1800, Anvil $160, Drill Press $225 and 20 ton Alfalfa Hay $66 per ton.

Elton & Alvin Horning Auctioneers.

xxx

A Public Sale of farm equipment was held January 17 by Clifford E. Groff, along Prescott Road, S. Lebanon Twp., Leb. Co., Pa. There was a good attendance at the sale.

Some prices were: Int. 756 D tractor $9000, J.d. 7000 4-row Corn Planter $5800, IHC 510 Drill $3100, Ford 3000 D Tractor $2700, Int. 650 1 row Harvester $3000, J.D. 336 Baler $4450 and Hobart Electric Meat Slicer $385.

Auctioneers were Buffenmeyer and Hartsock.

Pros and cons of farm-grown fuels

OCEAN CITY, Md. — Farmers attending the recent Delmarva Corn Technology Conference in Ocean City, Md., got some cautionary advice from several speakers on the production and use of alcohol for tractor fuel.

Speaking about on-farm production of alcohol, John W. Gird, University of Maryland extension agricultural engineer, warned corn farmers not to get carried away with the idea of producing their own fuel.

One bushel of corn gives you 2.6 gallons of alcohol, said Gird. But whether or not it pays you to convert your corn to ethanol will depend on many factors, including the cost of corn as grain vs. the cost of ethanol, gasohol or diesel.

"An on-farm alcohol production system isn't practical," he added, "unless you consider using materials such as wheat and other grains, potatoes, sugar beets or molasses, as well as corn."

The specialist also warned that the cost of installing stills is extremely high — as much as $85,000.

A few farmers around the country are gambling on some of these systems, but with on-farm distillation technology still in the developmental stage, it's possible that some of these systems could soon become obsolete.

Another thing to consider is the fact that farm-produced alcohol is lower in quality because it is less pure than the commercial product.

Gird recommends experimenting with a small, trial still first before you invest any big money in a large-scale system. Also see how your farm machinery performs with alcohol. Some systems need considerable modification to be able to burn alcohol.

Whether or not you brew it yourself, think twice about using alcohol as a diesel substitute in your tractor, cautioned another Corn Conference speaker, Louis I. Leviticus of the University of Nebraska's tractor test lab. Gasohol and ethanol don't mix well with diesel.

For one thing, injecting ethanol into the manifold of a naturally aspirated diesel engine means you won't get all the power you want at full throttle because ethanol displaces oxygen in the combustion chamber, causing incomplete fuel combustion.

Mixing ethanol with diesel fuel also decreases the lubricating qualities of diesel fuel, notes University of Delaware agricultural engineering research associate Jim Kemble.

This can cause premature failure of the fuel injection pump and fuel injectors on both naturally aspirated and turbocharged diesel engines. Either ethanol or gasohol will also cut your diesel fuel so you get less BTU's per gallon.

This is usually no problem at partial throttle, partial load, but it means you won't get all the power you want on full throttle, full-load operations.

Besides questioning the use of alcohol with diesel fuel in tractors, Leviticus had some words of warning about the many so-called fuel-extending gadgets on the market today.

Most of these items are quite unworkable, he said. Take fuel heaters, for instance. The fact is, heating does not substantially improve the energy content of your fuel. On the contrary, for every 10 degrees increase in fuel temperature, you reduce your maximum power by one percent.

Also, beware of add-on superchargers and turbochargers. They may increase power past design limits and cause damage to engine and drive train components.

The best way to save fuel, advised the tractor lab director, is by more efficiently matching your implements to your tractor and running it at the proper speed for the particular farming operation being done.

Gearing up and throttling down can sometimes give you a 30 percent fuel savings.

Farmers in the market for a new tractor should get all the energy data they can before making a choice. And don't forget to look into the oil consumption record of different pieces of equipment.

Reports on tractors tested at the University of Nebraska's lab are available on request for about 15 cents plus postage. Compare reports on your old tractor with new ones on the market. Using this available energy data can save you lots of money, Leviticus said.

Farmers interested in obtaining these reports should write to: University of Nebraska Tractor Test Laboratory, Lincoln, Nebraska.

Besides reports on individual tractors, summary booklets are available covering in less detail all units tested during a given year.

PFU members approve family farm policy

CAMP HILL — Delegates to the Eighth Annual Convention of the Pennsylvania Farmers Union adopted a major addition to the preamble of their constitution.

The addition is known as their family farm policy.

It was adopted to read:

"The family farm structure of agriculture since the founding of this nation has provided a system of food production as well as economic and social stability. The family farm type of agriculture has proven its widespread benefits to our society, and remains the most viable system of agricultural production in the long-term interest of the nation.

"While the family farm still represents a large portion of the agricultural system in the U.S., other structures are increasing their grip on the nation's food supply system. New directions are an absolute necessity within this decade to reaffirm and redirect policies to preserve and enhance the family system of agriculture.

"No singular plan or policy can by itself achieve the objectives of a stable family farm system. A combination of production and income stabilization programs, land tenure, credit, resource conservation, equality of taxation, cooperative endeavor, education, social and other broad policies must be established at local, state, national, and international levels to provide a systematic approach to preserving the family farm system of agriculture in this nation.

"Family farm structure of agriculture requires that the ownership, operation, and management of a farm unit are vested within the family who lives on the farm and derives a livelihood from that farm Policies which encourage the separation of ownership, operation, or management of agricultural units are contrary to the interests of family farmers as is any single commodity approach to agricultural policy.

"The problems involved in the structure of agriculture are not only economic and social issues but also matters of morality and justice.

"Family farms are a balancing force in the social, economic and political structure that is vital to the stability, preservation and improvement of representative democracy.

"Agriculture has historically been called upon to respond to the national and international crises and past decisions have left agriculture and the family farmers without a stabilized policy framework for individual farm decision making.

"There already exists a crisis in family farm structure and without substantial changes in present public policies and the establishment of new public policies this may be the last generation of family farmers. Unfortunately this crisis may not become sufficiently evident until the trends become almost irreversible. The opportunity to reverse these trends exists today. To wait until the present crisis is fully documented and evident is to doom the family farm structure of agriculture. The posponement or rejection of reforms would result in the ingredients for the inevitable social conflict that has historically been climaxed by violent upheavals within the society.

"It is evident that the social, economic, and environmental costs of permitting the family farm to disappear from this society are incalculable since it would set forth the beginning of the distgruction of the very basis of U.S. society and its democracy."

Lancaster County delegates to the Pennsylvania Farmers Union convention in Camp Hill this week included, from left, Mr. and Mrs. Forney Longenecker, Daniel Groff, Robert Spahr, and Abe Witmer.

U. of Maryland professor indicted for grain swindle

WASHINGTON, D.C. — Former University of Maryland Professor Wolcott E. Stewart, President and sole stockholder of Exchange Market Traders, a commodity broker from Laurel, MD was indicated by Federal Grand Jury in Baltimore, MD on Tuesday, January 8, 1980 on 14 counts of Mail Fraud.

The indictment charges that during a three month period, March, 1978 through June, 1978, Stewart contracted with farmers in Maryland and Pennsylvania to provide their grain to graineries in Baltimore, Salisbury, MD, McGaheysville and Harrisonburg, VA.

The defendant instructed the graineries to make payment directly to him for the delivered grain. Stewart, upon receiving the payment for the grain, approximately $182,000 00, deposited such in his own personal bank account and used the money for his own personal gain.

Pursuant to a Federal warrant issued by the District Court, Baltimore, MD, Stewart was arrested by Postal Inspectors, on January 17, 1980.

Assistant United States Attorney J. Moscowitz advises that Stewart could receive up to seventy years in prison, $14,000 in fines, and/or both. Bond was set at $15,000 by Magistrate Frederick Smalkin.

Wonder Why?

Horse racing is described as the "Sport of Kings" but it's not the sport of presidents While British royalty frequently visits the track, U S presidents never seem to do so This unique difference is also true of prize fighting

SEE ECONOMIC WARNING FURTHER DOWN

DO YOU DOUBT THE HIGH YIELDS WE REPORTED WITH THE REAMS PROGRAM OF 100 BU. SOYBEANS PER ACRE, 5 FT. ALFALFA, OVER 30% PROTEIN?

Two cases of 100 bu. beans were reported by people I trust. The Reams program is reported to produce 20 ton alfalfa per acre in a year, but he doesn't print it because people would think he is a liar.

The two main materials used are plenty Hi Cal lime (not Hi Mag.) and soft rock phosphate, not much potash. Well manured farms need none. We or you don't get those yields the first year or two. Neither does a chronic sick man become a Pikes Peak race winner in a year or two. He east non toxic natural food for years, what God gave man to eat, Gen. 1:29 That diet won that race for years. You can't beat nature, both in food and fertilizer.

In a 10-10-10 commercial fertilizer you have 30 lbs. of plant food to the hundred. Soft rock phosphate has no filler. It is high in calcium, phosphorus, many minerals and trace elements, just what you need. And only $80 per ton bulk because it comes direct from the mines - no blending expense and hand labor. Spreading $9 per ton locally. 50 lb. bags, $90 per ton.

Now the Yolo Microbion Co., an entirely different company, the culturer of our BX soil bacteria has plenty legitimate test reports in various states, of BX and about ¼ of the normal amount of fertilizer producing 5 to 25 bu. extra over the normal amount of fertilizer.

Now a combination of these two programs is a winner at a very reasonable price. BX draws the nitrogen out of the air and increases P and K by making it more available what is in the soil, and probably drawing some out of the air also because the soil test readings go up.

The combination of soft rock phosphate and BX and Hi Cal Lime is making happy customers.

Reports are the Arabs will raise prices much more because they want to strangle us, figuring one's loss is another's gain. Our leaders are glad then they can call it a national emergency and do with us what they want. Bureaucratic plans are discovered. Much worse is to come. Get ready to be self supporting. Raise all your own food. Build a solar greenhouse for yourself and others. Pity city people. Go organic to save inflated chemicals. Don't stop farming but don't get big. People will have to eat to live. Our fertilizer customers will have a tremendous advantage. No alfalfa spraying. Better standing and more nutritious crops. Little vegetable spraying if any.

We are not just in business for the fast buck to grab your check and run. In fact pioneering a business is not profitable at first. We are offered many products, but we pick out, those which we think pays the farmer the best because we love farmers. "We stay alive if farmers survive," says a sign.

If you want to have me stop in sometime, draw good directions. Time is precious. Take soil samples in the meantime. We test free at the shop for good customers.

NEDCO president decries illusion of prosperity

SYRACUSE, N.Y. — An alarming trend is pervading thought patterns of consumers building an illusion of false prosperity in the dairy industry, according to Edward McNarmara, President of Northeast Dairy Cooperative Federation.

This fact, along with the call to continued support of the dairy parity program was brought forth by the coop leader at the National Milk Producers Federation's recent annual meeting held in New Orleans, Louisiana.

McNamara voiced this concern during his comments as part of a dairy leader panel responding to the topic, "Is Parity Outmoded - What are the Alternatives".

In his commentary, McNamara said that, "The American dairyman can be proud of his record. He is a proud man, and will not stand for direct payment programs hinting of welfare. He is becoming wary of new methods to price his product, and of organizations who hint at his undue profitability creating inflation when the exact opposite is true."

The dairy executive cited figures from a survey of over four hundred northeast farms by the Springfield Credit Bank, its president Howell Hughes and research analyst Peter Field.

"These figures do indeed suggest an alarming trend, not of over profitability but rather just the opposite, exclaimed McNamara.

The figures taken from the Bank's Agrifax Program, "show that in 1978, although average milk sales income increased by $16,830 over 1977, expenses increased at an even faster rate to $16,876, creating a net reduction of $44 on gross milk revenue of $113,000."

"In addition, from 1973 through 1978," McNamara said, "the farm price of milk has not been as high as the index of prices paid by dairymen in any year.

Although increased prices for cull cows has been helfpul in 1978, dairymen have relied mainly on inflated land, cattle, and machinery values to continue their operations.

"Cull cow sales on that $130,000 operation amounted to $4,600 income, while increased values of cattle, land and machinery amounted to almost $12,000," he said.

These figures point out all too clearly where farmers are getting the dollars they use to purchase machinery, new buildings, etc., creating outward signs that make them seem prosperous to others.

McNamara said, "Dairymen have been increasing their debt load each year. If we have a down-turn in the economy and these values decrease, the dairyman is going to be out on a limb as his debt load becomes unmanageable in relation to lowering value of his assets."

McNamara further pointed out that the 80 percent parity price support program (signed by President Carter during the NMPF Convention), "has been responsible for lower dairy product prices to consumers, and while keeping dairymen in business at minimal profit, created tremendous efficiency. Very few businesses can point to the dramatic efficiencies that dairymen can."

"The following statement appeared in a national advertisement," he said... "We're in danger of having our prosperity slip away because the growth of productivity has slowed to almost zero, while wages and salaries have continued to climb. Ever-increasing inflation is the result. It's urgent that the trend be reversed. Tax reforms should be adopted to encourage investment in efficient equipment..."

"Technology, new machinery, computerized equipment, etc., have also been available to other businesses but they have not been able to match the farm rise in productivity per man," said McNamara responding to the advertisement.

"Some quick examples supporting this are: In 1925, 3.41 man hours per 100 pounds of milk were required as opposed to 0.37 hours in 1978. 8.7 quarts of milk per hour of labor could be purchased in 1959, in contrast to 12.9 quarts in 1979."

"Consumer groups, tread carefully say you gauge costs and merits of present programs, as these programs have maintained a sufficient supply of wholesome products for your tables at the most reasonable of prices for many years," warned President McNamara in his closing remarks.

He also suggested other areas in our economy may merit auditing much more than the already efficient dairy farmer and that more consumer-farmer dialogue is a must in understanding each other better.

Barn ventilation topic for Garden Spot Adult Farmers

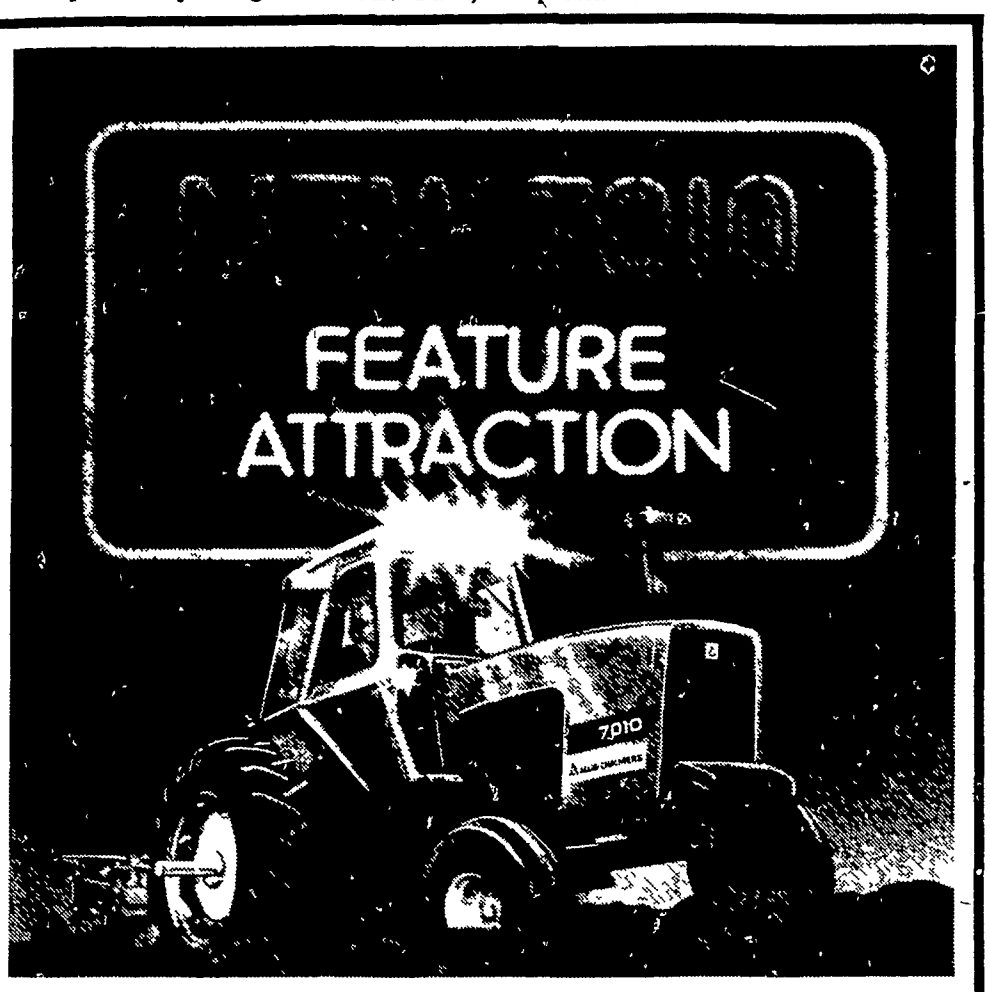
NEW HOLLAND — The Garden Spot Adult Farmer Program is sponsoring a meeting on duct ventilation of barns on Tuesday, January 29, 1980, at 7:30 P.M. at the Union Grove School.

Speaker for the meeting will be Mr. Terry Weaver from Agri, Inc. in Farmersville.

One of the most limiting factors in livestock production in Lancaster County is the ventilation of barns and housing facilities. The use and remodeling of bank barns, old chicken houses, etc. has not taken into consideration the ventilation requirements of the livestock housed in them.

Opening windows and doors often creates more problems than it solves. One successful solution to getting adequate air volume into the building is by using ductwork, either plywood or plastic tubes. There are many factors to consider in such ductwork such as source of air, correct inlet and outlet openings, and placement and size of fans if used.

The program will be aimed at presenting the principles of ventilation and how to use ductwork correctly. Refreshments will be served. For additional information, call Mr. Donald Robinson, Adult Farmer Instructor at 445-5041.



Starring more big performance features than any tractor in its class.

You don t want promises you want performances And that s where the new 106 PTO horsepower* tractor from Allis-Chalmers really shines

An engine that eats up the competition
106 PTO Horsepower* • Turbo-charged 6-cylinder diesel

Choice of 3 transmissions just your speed
16 or 20-speed *Power-Director* transmission with shift-on-the-go • Or 12-speed Power Shift • More speeds where you do most of your work—below 6 5 mph

Big tractor power train
The rear main that rewrote the book on rugged • multi-disc oil-cooled master clutch • planetary final drives • big rear axles • multi-disc oil-cooled self-adjusting brakes

Biggest hydraulic system in its class
Closed-center load-sensitive 45 gpm system • won t waste fuel or horsepower • two remote outlets • break-away couplers

Plus a cast of a thousand more extras
3-point hitch (Category II or III) • *Acousta* cab proven reputation for quiet • Independent PTO • Adjustable front and rear wheels • Easy maintenance features and much much more

Designers of Quality Systems for Poultry, Swine and Grain Handling.

Not all pullet feeds are alike.

Master Mix "AA" Pullet Feeds give a great start for fast growth.

Feed is the greatest single cost of growing replacement pullets. That's why Master Mix has a leg up on the rest of the industry. Our Master Mix "AA" Pullet Feeds have been proven both practical and profitable to all size operations. There is none better and none like them. So come in today or give us a call. We'll be proud to tell you about the Master Mix "AA" Pullet Feeds.

★Three caloric densities available.

★Research proven for over 4 years on three million layers and pullets. Records for this trial are available.

Are you paying too much for layer feeds? Write c/o Lancaster Farming, Box 366-P, Lititz, Pa 17543 **for outstanding feeds at honest prices.**

Black steers dominate Denver show

ST. JOSEPH, Mo. — Angus and Angus-crossbred steers swept the interbreed competition at the 1980 National Western Stock Show as they took grand and reserve grand championships in the steer, feeder cattle and fed beef steer contests.

In the open steer show, all eight final contenders for the grand and reserve grand champion honors were black.

A 1,231-pound Angus crossbred steer exhibited by 13-year-old Joel Kampen of Humboldt, Iowa, was slapped grand champion.

The steer brought a top bid of $11 per pound from Nicky's Restaurant, Estes Park, Colorado, bringing its young owner 13,541.

Fred Orr, Golden, Colorado, led his 1,117-pound steer to the reserve grand champion spot.

L.C. Fulenwider Jr., representing Box Elder Farms Co. of Denver paid a near-record $7 per pound for the steer, bringing the total purchase price to $7,819.

Judges of the steer show were George Strathearn, Mariposa, California, and Frank Sewald, Longmont, Colorado.

Feeder Steer Winners

Both grand and reserve grand champion feeder steers were pens of Angus crossbreds entered by Box Bar Ranch, Eddyville, Nebraska.

The feeder steers are shown as pens of five, and six head can be sold at auction.

The top pen averaged 651 pounds, and five head sold for an average of $2,780. The reserve pen, weighing an average of 565 pounds, brought a $1,730 average on five head.

Hyland Angus Ranch, Ree Heights, South Dakota, put together the champion pen of Angus feeder steers. The calves weighed 594 pounds, and six head sold for an average of $845.

Uhrig Ranch, Hemingford, Nebraska, exhibited the reserve champion pen of Angus feeders. The calves weighed 728 pounds and six head sold for an average of $1,375.

Judges of the feeder cattle pens were Dob Dorsey, Eaton, Colorado, Jerry Adamson, Cody, Nebraska, and Tom Reedy, Lovington, Illinois.

Fed Beef Contest

Orval R. Hartman, Pueblo, Colorado, entered the champion Angus and grand champion steer carcasses in the fed beef contest.

The carcasses averaged 688 pounds, with a 14.48 square inch ribeye area, .42 inches of fat at the 12th rib, and a yield grade of 1.85.

The reserve grand champion and reserve champion Angus steer carcasses were entered by Harry Bostrom, Sterling, Colorado.

The carcasses weighed 728 pounds, and averaged 13.86 square inches of ribeye area, .40 inches of fat and a 2.33 yield grade.

In the Angus heifer division, Farr Feeders, Greeley, Colorado, took the top spot, and Reynolds Cattle Company, Longmont, Colorado, exhibited the reserve champion Angus heifers.

The reserve grand champion heifer carcasses were Angus crosses entered by Larry Lind of Ford Collins, Colorado.

Twin Valley FFA notes

Five Twin Valley FFA members showed animals at the Farm Show in Harrisburg this year.

Donnie Stoltzfus, son of Mr. and Mrs. Harvey W. Stoltzfus, Morgantown, showed dairy cows.

In the open contest, which is for anyone, not just FFA or 4-H, Donnie's cow, Pennwood Stroke Honey, took second place, and Pennwood Joe Kokoa placed eighth, out of about 200 cows.

In the Junior Division, Pennwood Stroke Honey was the first place cow, also the champion. Pennwood Joe Kokoa placed third in the Junior Division, out of about 100 cows.

Nelson Beam, son of Mr. and Mrs. Omar Beam, Elverson, showed pigs. One of his pigs placed sixth in the heavyweight class and the other placed twelfth in the light heavyweight class.

Scott Stoltzfus, son of Mr. and Mrs. J. Wilmer Stoltzfus, Elverson, showed pigs. Scott's one pig placed seventh in the lightweight class, and the other placed tenth in the middleweight class.

Diane Stoltzfus, daughter of Mr. and Mrs. Frank Houck, Elverson, also showed pigs. Diane's one pig placed sixth in the middleweight class and the other placed seventh in the light heavyweight class.

Tom Hornberger, son of Mrs. Sandy Hornberger, Morgantown, showed sheep. One of Tom's sheep placed seventh in the middleweight group two class, and the other placed eighth in the heavyweight group one class.

USDA wants to change Canadian cattle import rules

WASHINGTON, D.C. — The U.S. Department of Agricultural is proposing to ease the brucellosis regulations on cattle entering this country from five Canadian provinces.

According to the Canadian Government's Health of New Brunswick, Nova Scotia, Prince Edward Island, Newfoundland (including Labrador), and British Columbia for over two years.

Under the proposed changes, cattle from these five provinces could enter the United States under certain conditions. They would ahve to be accompanied by a certificate issued or endorsed by a salaried veterinarian of the Canadian Government. The certificate would have to state that the cattle are from a certificate-free province and have been tested for brucellosis, withing 30 days prior to their date of entry into the U.S.

Finally, the cattle would either have to be shipped directly from the farm to a specified U.S. port of entry, or shipped in a vehicle sealed with Canadian Government seals. The seals would only be broken at the U.S. port of entry by the U.S. port veterinarian.

To maintain status as a brucellosis certified-free area, milk from dairy herds in each province is subjected to three milk ring tests for brucellosis each year. Non-dairy herds must have had a rate of five percent market cattle tests conducted each year or a complete herd test at the end of each 3-year period. Cattle for breeding purposes originating from these aras must comply with the Canadian requirements for movement into the brucellosis certified-free provinces.

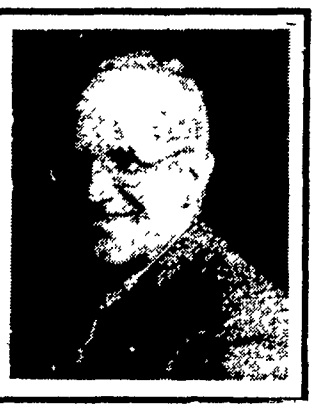
The Milk Check



TOM JURCHAK
County Agent

All's Well That-

The Minnesota-Wisconsin price ended the year with a record high $11.85 for average test milk.

When converted to 3.5 test it also gave you a record high Basic Formula Price of $11.34 beating September by a scant two cents. But that wasn't the end.

It also gives you a record high Class II price of $11.40 for December and a record high butterfat differential of 15 cents. The only record you didn't break this month was the Class I price. For that you'll have to wait until February when it goes to $13.59 in Order 2. That's because the Class I price is calculated two months ahead from the Basic Formula Price.

This was $11.34 for December so, adding your $2.25 Class I differential, you get $13.59 the Class I price for February which will be the first record broken in 1980 and perhaps the last one before next Spring when the support price is adjusted on April 1.

Getting back to December, you can thank two more records made this month for these price increases.

A butter price of $1.3016 and a powder price of .8387 cents just barely edged up into the "record" category by fractions of a cent but enough to do the job.

All of these prices were just pennies over previous records but I thought it would be a nice way to cheer you up with the thought for 1979 that all's well that ends well.

However, you still have a blend price to get on your December's milk but it won't be a record. That one you made back in October with $12.64 that was helped by a Louisville Plan payment of 44 cents.

Your class prices in December will be higher than October (16 cents on Class I and 9 cents on Class II) but without a Louisville Plan payment in December you won't make it.

However, it's good to know that the market ended the year on a fairly strong note in spite of the warning signs of trouble ahead for next year.

About Face

The administration's bill for a security fund for dairymen surprisingly resembles the one proposed by the milk marketing cooperatives and backed by the Pennsylvania Farmers Association.

Surprising, because it's nearly the same thing that "couldn't be done" before the PFA annual meeting.

Sure, it has some differences like a voluntary fund for co-ops if ten per cent of the members request a referendum and a majority of the members favor it or the delegates ask for it. Other changes are a 90 per cent paycheck instead of 100 per cent and a one cent per hundred payment. But it's still a plan wholly funded by dealers that they said would never pass in the legislature.

Yet to be heard from at this writing is the dairy committee of the State Grange. All they need is a "right, face" to fall in line because their plan is a fund financed equally by producers and handlers.

There is still a lot of "dressing up" to do in the ranks before going to battle when the Legislature returns on January 21, but it appears that this time, at last, the troops may get out of the trenches to see what the enemy looks like.

Strengthen supports during embargo, firm asks

DEKALB, IL. — The head of one of the nation's leading agricultural firms Thursday called on President Carter and Agriculture Secretary Bob Bergland to take immediate action to cushion the economic setback the Soviet grain embargo is causing American Farmers.

In a telegrammed message, T.H. Roberts Jr., chairman and chief executive officer of DeKalb AgResearch, Inc., requested Carter and Bergland to instruct the Commodity Credit Corporation to purchase corn and wheat on the open market at the average farm prices of January 4, 1980, the day the embargo was enacted.

On that date, corn was selling at $2.40 per bushel and wheat at $3.90 per bushel.

Roberts pointed out that a similar situation in 1971 showed that only relatively small amounts of grain would have to be purchased to achieve this price objective and prices would quickly return to their January 4 levels.

As an alternative to that proposal, Roberts suggested the 1979 crop loan levels be increased to $2.40 for corn and $3.90 for wheat.

"The price improvement resulting from this approach would benefit all farmers whether they participated in the program or not," he said.

Roberts further urged Carter and Bergland to announce immediately a 1980 paid diversion program for corn and wheat.

"Although this action is contrary to the near-term self interest of the seed business," he said, "it is in the best interest of farmers. Therefore we support it."

"The President's embargo was made in sincere conviction that it's in our national interest. We strongly believe, therefore, that its costs must be shared by the entire nation, not primarily by farmers, who so far have carried most of the load in the form of grain price decline," Roberts said in his statement.

Roberts sent the telegram to Washington in reaction to government programs announced through January 9, which he termed inadequate.

"Farmers face lower prices this year unless the federal government takes stronger steps than it has so far to correct the price decline caused by President Carter's decision," Roberts said, adding, "The Russians may respond to the embargo by cutting back their livestock herds as they did in 1976 after a bad crop in 1975. This will reduce grain demand for more than just this year, should Soviet-American relations return to normal."

Roberts said all of the actions he is suggesting the government take are within the present authority of the Secretary of Agriculture.

GSI GRAIN BINS

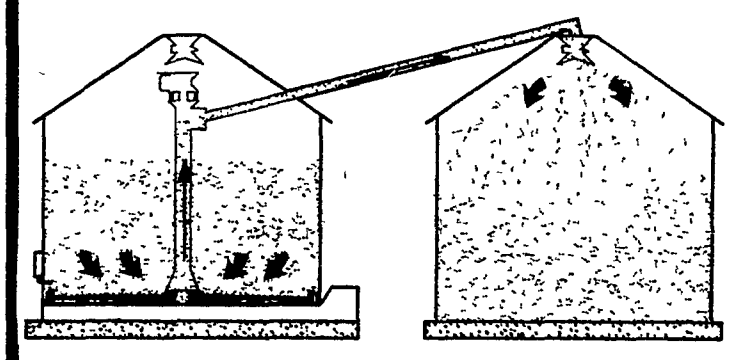
BEAT PRICE INCREASE EFFECTIVE FEB. 1

EXTRA 12% DISCOUNT IN JANUARY

MARTIN GRAIN DRYING SYSTEMS

Compare their unique features and advantages. Preserves grain quality, less shrinkage & stress cracks. Conserves energy, lower operating cost, from 3¢/bu. for 10 points. Both systems dry 35% moisture corn, requires no wet holding tank or babysitting. Both systems include a G.S.I. Drying Bin, in & out ladders, roof ladder, Cor-lok floor, steel floor supports, transition, fan & heater, ventilator cleaner, motorized spreader, unloading auger system with total enclosed motor, and freight to our warehouse.

MARTIN FLO-MOOR SYSTEM



2 STAGE CONT. or RECIRCULATING

$6931 Includes Martin Electronic Moisture Control With Motor Starters.

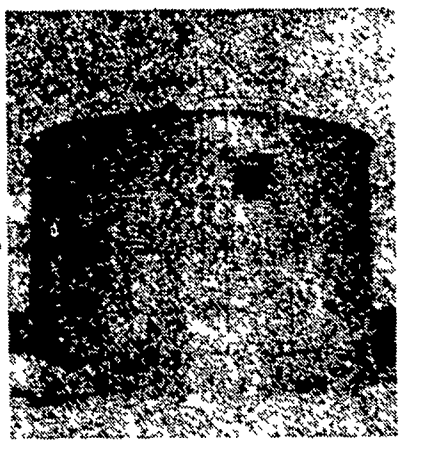
- Drying capacity up to 12,600 bu./day
- 15 to 36 ft. diameter bins.
- Operating temperature adjustable 90° to 160°
- Add wet grain as fast as you harvest. Large storage capacity for fast unloading.
- Twin tapered sweep augers unload faster
- Extra heavy gear box assures trouble free operation
- Automatic grain level shut-off
- Grain Cleaner removes trash for better drying

MARTIN LOW-TEMP SYSTEM

Batch With Low Temp. Control

$3825

Stirring Equip. Option



- Drying Cap. Up to 6400 Bu. Per Day.
- 15 to 48 ft. diameter bins
- The only system with gas heat (up to 30°) backup to prevent spoilage.
- The Martin Low-Temp Control monitors and automatically controls the temperature and the humidity. The thermometer, hygrometer and monometer display operating conditions, thus eliminates all guesswork in the easy operating management.
- Built-in safety controls assure trouble free operation.
- It operates automatically around the clock in sunshine or rain, heat or cold, without any babysitting or readjustments.

MUELLER
Bulk Milk Coolers

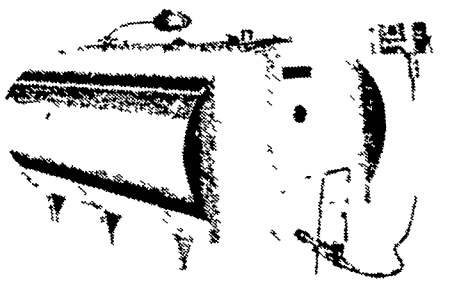
THE BULK MILK COOLER THAT HAS EVERYTHING

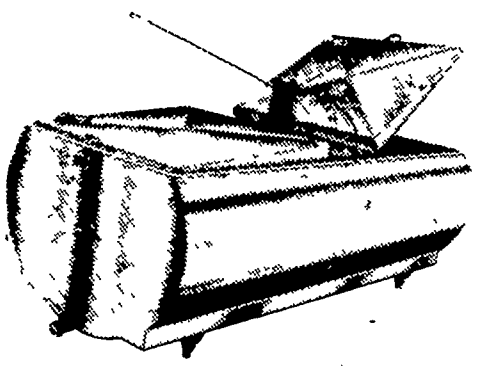
including AUTOMATIC WASHING SYSTEM!

MUELLER HiPerForm

MAKE ME A BULK MILK COOLER THAT HAS EVERYTHING!

The Mueller Model "OH" with HiPerForm cooling, Mueller-Matic Automatic Washing System, and built-in freezer protection control is the most advanced bulk milk cooler in the world. The nation's most progressive dairymen are using it. Shouldn't you be?





THE MUELLER MODELS OH, MHL, AND MW WITH HIPERFORM MAKE ALL OTHER BULK MILK COOLERS OBSOLETE
SEE THE MUELLER NEW MODELS
★ 500MW ★ 600 MW

The "MW" is one of the Lowest pouring Height Bulk tanks. Check with us all the new features on the "MW" bulk tank.

If you are in the market for a bulk milk cooler and you don't check all the advantages of the Mueller "OH" "MHL", and "MW" you may be buying an obsolete cooler.

CABLEVEY

SPECIALISTS IN FEED CONVEYING

Move feed up an incline or horizontally. Go around 90 degree corners. Set up an overhead feed conveying system in any configuration. Control amount of feed by volume or weight. You can do all this and more with a CABLEVEY system.
A galvanized steel tube carries a durable, flexible cable with plastic discs attached to the cable. Discs pull the feed through the tube to feed drops.

NEED A FARM - URBAN - COMMERCIAL BUILDING?

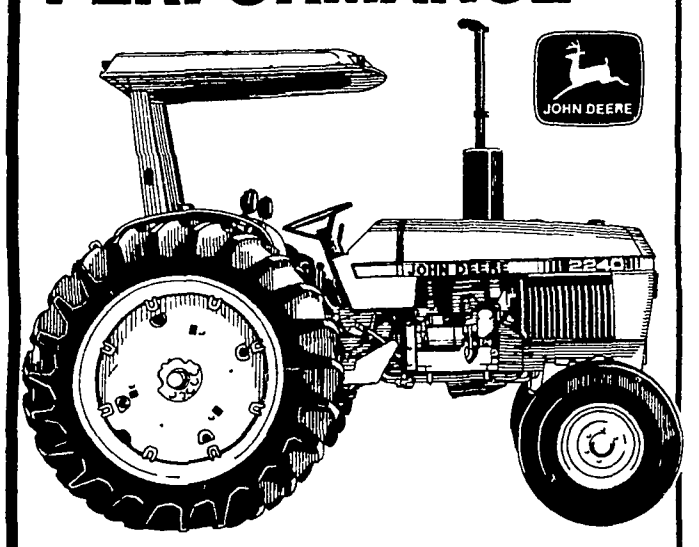
NEW PROFILES OF PERFORMANCE



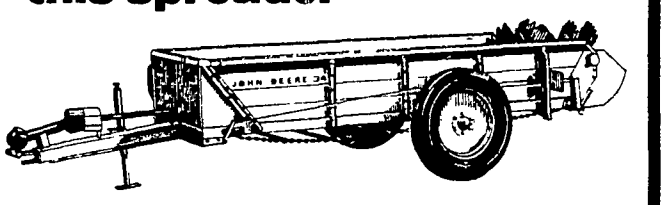
The 50-hp 2240's lugging power will amaze you . . . and new comfort and convenience features will boost your performance

Now the John Deere 2240 features new performance that you'll like in the field or in the feedlot The 3-cylinder, 50-hp diesel engine provides plenty of lugging power, and the 8-speed collar-shift transmission and the rest of the drive train are toughened up to match You'll also find a Load-and-Depth Control hitch along with closed-center hydraulics as standard equipment on the 2240 New features on the 2240 also take into consideration operator performance A new electronic instrument panel clusters lights and gauges for easy viewing A new seat is completely adjustable for riding and operating comfort The 2240 — it's worth checking out

A powerful loader designed for John Deere 40- to 80-hp Tractors

Lifting 2500 pounds to over 10 feet is an easy job for our 146 Loader mounted on a John Deere Tractor Tractor and Loader are made for each other So you get agile performance, easy on and off, and fast, accurate control of boom and bucket

'Easy' is the word for this spreader



Easy to load Easy to operate Easy to maneuver Any way you look at it the John Deere 34 Spreader takes much of the work out of loading, hauling and spreading manure Loading is easy because of a 40½-inch height from the ground to top of flares Single-pole hitch lets you get in and out of tight spots See us about the 150-bushel 34 Spreader soon

Grange reluctantly supports embargo

WASHINGTON, D.C. — While many farm organizations have responded negatively to the President's embargo on the shipment of food and feed grains to the Soviet Union, the country's oldest and second largest farm group, the Grange, has expressed "reluctant" support.

Edward Andersen, Master of the National Grange, said, "While the Grange does not agree with the President's decision, the decision was made and now is the time to expend our energies on ideas to protect the economic condition of U.S. farmers."

He said, "The Grange does not like using agricultural commodities as a foreign policy tool, but we dislike naked aggression even more."

Grange support is also based on the Administration's assurance that the U.S. government will purchase the remaining 17 million metric tons of grain originally intended to be sold to the Soviet Union.

In a letter to President Carter, Andersen stated that because the economic outlook for farmers in the foreseeable future has become questionable, the Grange feels there is a need for immediate administrative and legislative changes in both current and future farm programs.

In the area of target and loan rates, Andersen called for increasing target and loan rates for the 1979, 1980 and 1981 crops of wheat and feed grains and increasing the loan rate on soybeans for the same period. He recommended the government establish a diversion program of 10 to 15 percent for wheat and feed grains for 1980.

Under the current reserve program, Andersen suggested the release and call price on wheat and feed grains, establishing a mid-point price halfway between the release price and call price at which time interest would be charged on the loan, increase the amount of wheat and feed grains that can be placed in the reserve and establish a reserve program for soybeans.

Andersen also suggested that an International Grain Reserve be established by direct government purchases from the market and that shipments under P.L. 480 be increased.

Montour Co. elects District officers

DANVILLE — Election of officers and the addition of two projects highlighted a special meeting of the Montour County Conservation District.

Re-elected chairman for his fourth term was Walter B. Loncosky. For the first time in board history, two vice chairmen were elected. Earl Harris and Eugene Billhime will serve in these capacities.

The offices of secretary and treasurers were combined for 1980 with Paulette Rishel elected to the position. Meeting dates were tentatively set for the second Thursday of each month.

On the recommendation of Ed Kremer, county commissioner member of the district board, directors added two major projects to their program.

The board will explore the possibilities of an alternate solution for county solid waste disposal. Kremer pointed out transportation costs of a regional facility would push consumer prices to an unreasonable level and waster energy.

Also added as a objective was a water resources project addressing the quality of potable water for county residents.

Of particular concern was Danville's water supply, taken from the Susquehanna River downstream from both the nuclear generating facility under construction near Berwick and toxic chemicals entering the river from abandoned mine shafts in the Scranton area.

U. S. urges soybean boycott of U.S.S.R.

WASHINGTON, D.C. — On January 14, The United States today asked for cooperation from Argentina and Brazil in not shipping soybeans and soybean products to the Soviet Union to offset exports suspended by the United States, according to Thomas R. Saylor, associate administrator of the U.S. Department of Agriculture's Foregin Agricultural Service.

The request was made at a meeting of U.S. officials and representatives of the other two countries, who will convey the message to their respective governments, Saylor said.

He said the U.S. asked that the other two countries limit their exports to the Soviet Union to normal trade levels and suggested that the three countries exchange information on exports and trade flows.

Brazil's exports of soybeans to the Soviet Union have reached as high as 1 million tons in years past. Exports from Argentina, where soybeans have been a minor crop until very recently, have been negligible.

U.S. export sales to the Soviet Union before the suspension were 1.4 million tons of soybeans, 400,000 tons of meal and 70,000 tons of oil. The suspension will result in a reduction in these exports from the U.S. of 740,000 tons of soybeans, all of the meal, and 30,000 tons of oil.

***

The U.S. provides 57 percent of world grain exports, according to the United Nations.

Exclusive interview

Grange Master discusses embargo, farm leadership

CARLISLE — It's a good thing Edward Andersen decided to have his farm sale on January 3.

Andersen, elected Master of the National Grange at its meeting in Lancaster this past November, was selling off equipment and livestock preparing for his move to Washington, D.C..

He returned to his farm about 15 miles outside of Omaha, closed out his responsibilities as Nebraska State Master, and headed back to Washington.

"I was really fortunate I had my sale on the day before Carter made the announcement on the grain embargo because it really had an effect as far as farm sales are concerned," he said.

"I wasn't sure how serious it would be," he admitted.

But a week after his sale there was a sale about two miles from his farm. Only about a third as many people showed up for the sale after the embargo.

The neighbor had three tractors and none were sold.

"I had a terrific sale. But a week later it was a buyers' sale.

"It really was too bad because it was strictly a psychological thing. People just didn't know what to do."

The Grange has come out as reluctantly in support of the President's embargo.

Andersen said he saw little indication of any livestock feeders profiting at the expense of the grain growers.

"The cash grain market has been coming up. In some areas it is almost up to where it was before Carter made the announcement.

"They are going to have to do something. They are going to have to remove this corn from the market," he said.

"By raising the loan level they are trying to find out how much grain the producers will put into reserve.

"I think that is limited because the storage is limited, their storage is filled. And they have to look forward to harvesting wheat this June and July."

Andersen said there is a good chance China will join Mexico in buying more grain

Another thing that will help us is most European countries have a shortfall and will not be moving grain into Russia, he said.

"Another thing I think is a good sign because of the embargo is the administration is going full steam ahead with a gasohol program from grain or other products.

"They have made that decision, they are behind it," he said

He admitted the 500 million gallon production goal is at least two years away

Another thing that is going to help the embargo is pushing for a paid diversion program for this coming year," he said

"We want the acres diverted so we do not produce an excess again We've lost that market and it will be a period of time before we get the market back again."

Despite the current Washington climate, Andersen said he sees no possibility the Grange will begin to endorse particular candidates who are more understanding of agriculture and farming.

"I don't think our stand will ever change," he said. "I think this is one of the strong points of the Grange.

"We are political organization, but we are bipartisan. Our constitution does not allow us to get involved with politice.

"We get involved with issues, we get involved with the people. But we can't endorse a candidate or a partisan issue.

"As far as the grain embargo is concerned we see that as President Carter acting in the best interest of national security.

"I believe the average farmer in this country is ahead of President Carter as far as taking a hard line with Russia," he noted.

The president also committed himself to seeing the farmer did not bear the full impact of the embargo.

"Our obligation is to see that is carried out, that the farmer does not suffer the full impact," Andersen said.

While the Grange is steeped in farm affairs, Grange membership is growing older and includes many members one generation off the farm.

Andersen said he did not see this as a problem for the organization.

He said the including all of rural America makes the Grange more responsive to the whole community

"In congress we testify and people know we are representative of everyone in that community, not just the farmer. We represent the broad spectrum of farmers and are not pitting one special interest against the other," he said.

"They recognize our policy has been developed by people in all walks of life which makes ours a stronger policy," he said.

He agreed USDA was moving away from the hard-core farming aspect it had in years past and is spending more time with the consumer-related factions.

But Andersen pointed out it is in the farmer's best interest to have a strong community to live in. And it's in the community's best interest to have the farmer do well, too.

"The area we are concerned with most in the past three or four years of the Carter administration is the consumerism of USDA. That we think is a problem.

"They need a degree of concern but I think they have over-emphasized it," he added.

He said the Grange was not too worried about where the leadership of tomorrow will come from

He noted the majority of Grange leaders continue to be farmers, even in highly developed parts of the country

He said he was surprised by the number of non-farmers who are trying to convince the farmer of the value of land preservation.

He said it is those people who are trying to convince the farmer to save his own land.

"The need for leadership is a constant, ongoing thing in any organization," he said.

"I'm not concerned that farmers could be outvoted in some of our Granges," he added. "Many of our most devoted members are ag business or one generation off the farm."

He said energy is certainly a problem, although not the most serious problem we have.

He said it was important the food processors, as well as the farmers, get the fuel they need to move and distribute farm goods.

"The Energy Department needs to recognize that processors and transportation people need the energy just as bad as the farmer," Andersen said.

"Inflation hurts farmers more than other industry," he said.

He said this is because, as a percentage of net income, the farmer has more invested in imputs than other major industries.

The farmer's marketing ability is limited, so he can't pass it on, he said.

"He can't demand a price for his product. He doesn't have that much influence in the market at this time on agricultural products," he said.

"Milk is probably the best example of what can be done if farmers organize and use their cooperative efforts," he concluded. — CH

Edward Andersen, Master of the National Grange, said Saturday he reluctantly supports the embargo of grain to Russia. But he noted he was glad he held this farm sale the day before the President imposed the embargo.

Estate planning subject of Eastern Lancaster Co. Adult Farmers

EAST EARL — The Eastern Lancaster County Adult Farmer Program will sponsor a meeting on Wednesday evening, January 30 to discuss the effect that increasing land values, salaries and other assets have on estates.

Larger estate values increase inheritance, gift, and income tax obligations of the family.

A properly planned estate can assure the correct transfer of assets, provide financial security to family members and save thousands of dollars in taxes and other cost Young and old both need a sound estate plan to protect their families.

Speaker for the evening is Mr. Kenneth Howard, attorney with Hassel, Yost, and Sorrentino of Lancaster and New Holland.

Mr. Howard has done extensive work in estate planning and will have many enlightening ideas on estate planning.

Anyone interested in more information on estate planning is invited to attend the meeting to be held at 7.30 p m. in the Union Grove School. The school is located 2 miles north of Route 23 on Route 625

Further information can be obtained by contacting Bob Anderson, at 215 - 445-5041

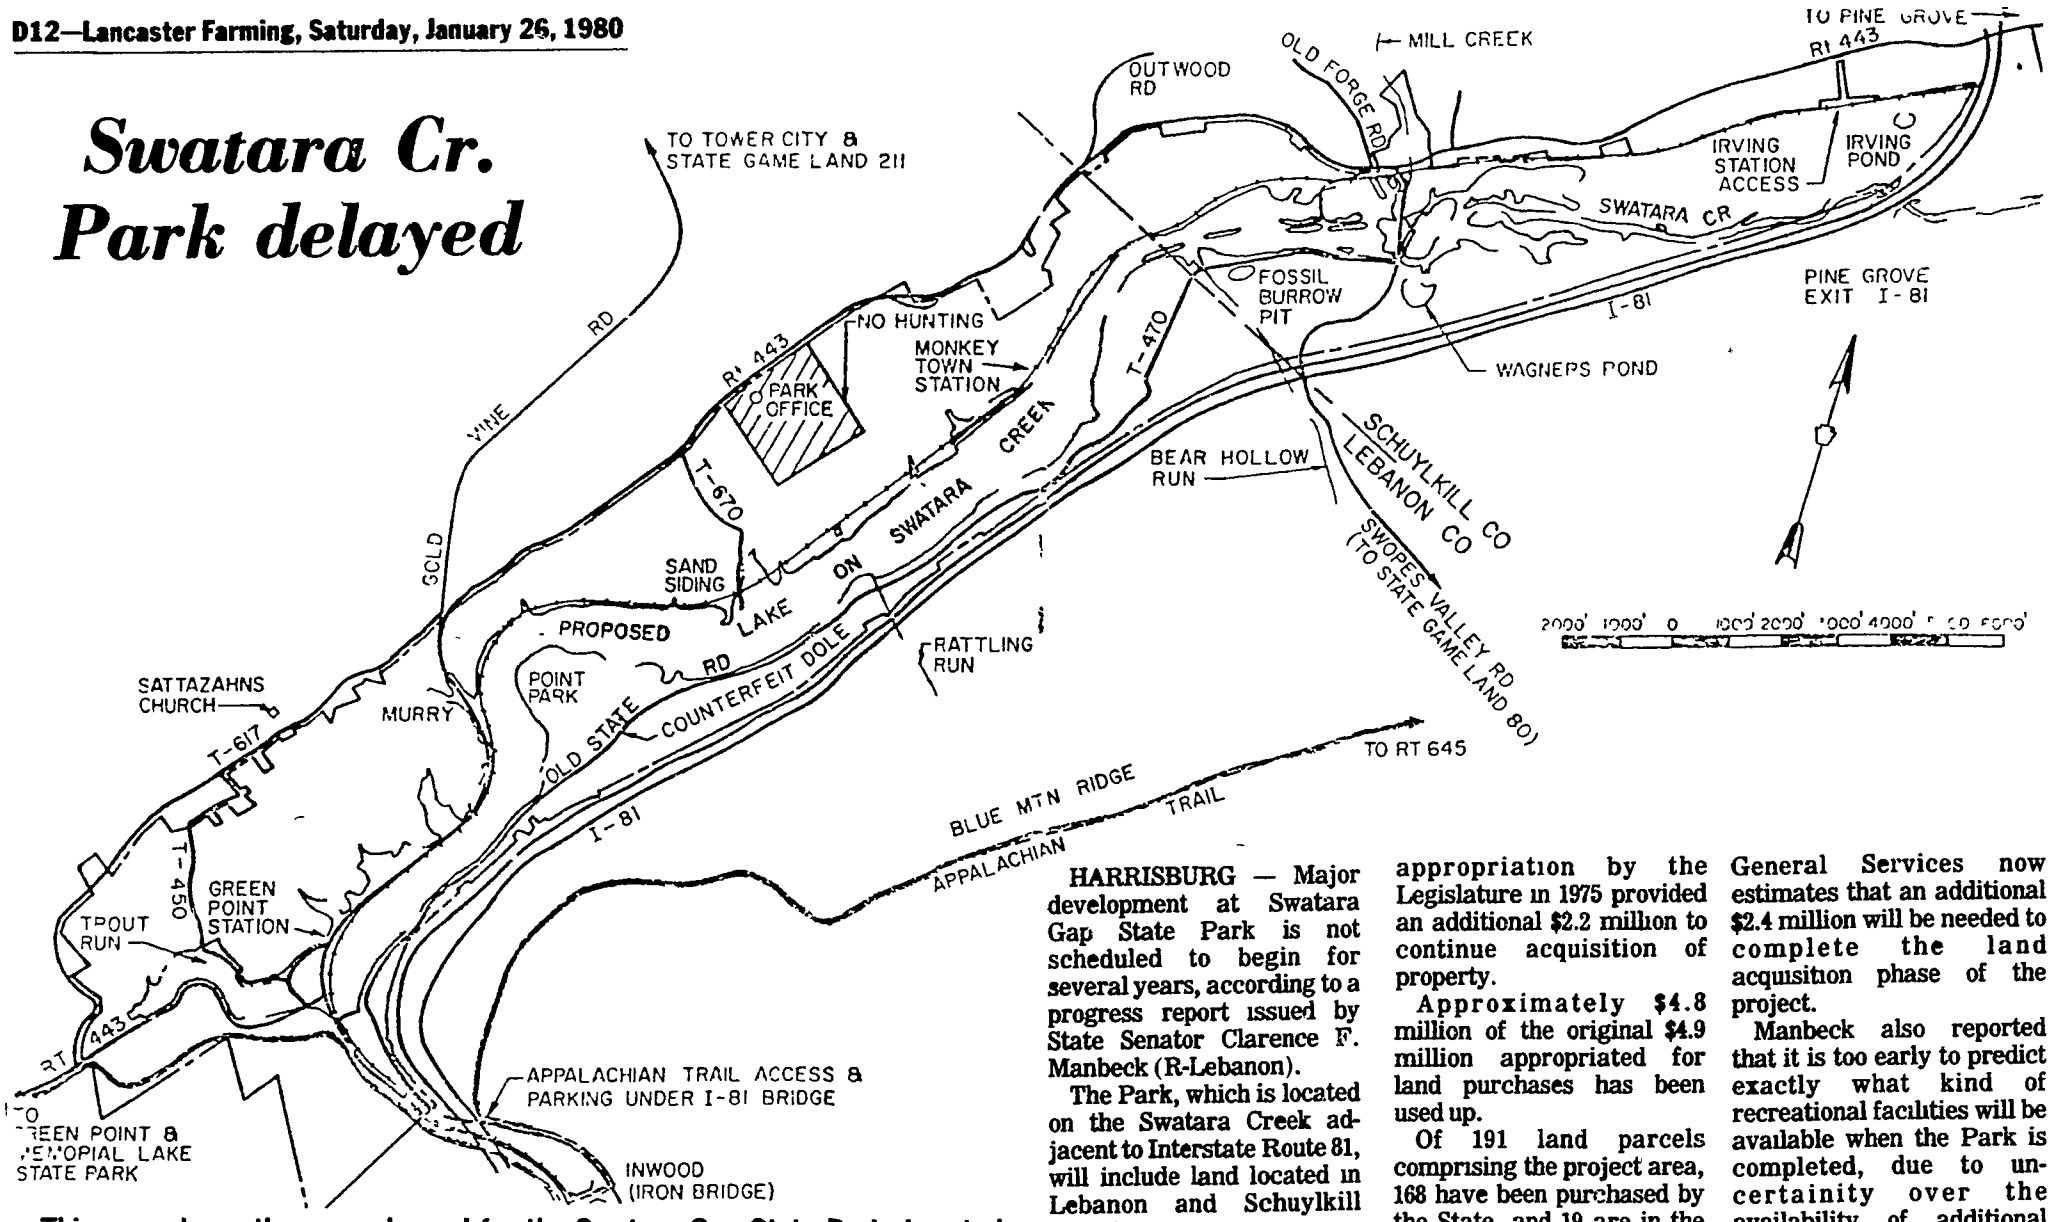
Swatara Cr. Park delayed



This map shows the area planned for the Swatara Gap State Park. Located along I-81 at the Lebanon-Schuylkill County line, the land acquisition, which began in 1971, is at a stand still until additional funds are appropriated. An estimated $2.4 million will be needed to complete the remaining phase of the land acquisition.

HARRISBURG — Major development at Swatara Gap State Park is not scheduled to begin for several years, according to a progress report issued by State Senator Clarence F. Manbeck (R-Lebanon).

The Park, which is located on the Swatara Creek adjacent to Interstate Route 81, will include land located in Lebanon and Schuylkill Counties.

Land acquisition for the project began in January, 1971, when the General Assembly appropriated $2.7 million. A supplementary appropriation by the Legislature in 1975 provided an additional $2.2 million to continue acquisition of property.

Approximately $4.8 million of the original $4.9 million appropriated for land purchases has been used up.

Of 191 land parcels comprising the project area, 168 have been purchased by the State, and 19 are in the process of condemnation. Four property owners have not yet been contacted by State officials.

The Department of General Services now estimates that an additional $2.4 million will be needed to complete the land acquisition phase of the project.

Manbeck also reported that it is too early to predict exactly what kind of recreational facilities will be available when the Park is completed, due to uncertainity over the availability of additional funds. The Department of Environmental Resources has suggested that some funds may be available to

Lee to retire from Md. agriculture

ANNAPOLIS, Md. — Dr. Robert J. Lee, Chief of the Maryland Department of Agriculture's Meat & Poultry Inspection Section, has announced plans to retire from state service effective February 1.

In accepting Dr. Lee's decision, MDA Secretary Wayne A. Cawley, Jr. said, "Lee's retirement is a great loss not only to the Department and the State, but also to the consumers whom he has served so well. He has been most dedicated to performance of his duties, and he will be notably missed."

"We in the Department wish him success in whatever pursuit he chooses in the years ahead.

"While it will be difficult to find a replacement of Dr. Lee's caliber, MDA will continue to maintain the reputation of our state Meat & Poultry Inspection service and work to strengthen it even further to make it the best in the nation."

Dr. Lee began his state career in 1968 when he was selected to organize a Meat & Poultry Inspection Section in what was then the State Board of Agriculture. Four months after that program became operational in 1969, Dr. Lee had established Maryland as the first state to be declared equal to Federal Inspection standards.

When Maryland's General Assembly created the Maryland Department of Agriculture in 1972, Lee retained his position and continued to build an impressive record of service to the meat and poultry industry and the public.

He has received U.S.D.A.'s Superior Service Award twice for outstanding leadership in his field, and the National Association of State Departments of Agriculture bestowed its Honor Award for Administration on him in 1976.

Lee also has received several commendations from State and University of Maryland officials for his "outstanding work in consumer protection programs". His latest recognition came in 1979 when U.S.D.A. commended him for setting up an undercover investigation which led to the successful prosecution of a Pennsylvania man who was transporting adulterated meat into Maryland to sell for human consumption.

ROBERT J. LEE

A Past-president of the National Association of State Meat and Food Inspection Directors and currently the Executive Vice-president of the American Association of Food Hygiene Veterinarians, Dr. Lee plans to open his own consulting business to specialize in problems of the small meat packing and processing plants.

Swatara Creek

(Continued from Page D12)

begin construction of picnicking and hiking facilities as early as 1982.

Original plans for the Park included construction of a dam and creation of a water supply and recreational lake on Swatara Creek. In addition to picnicking and hiking, the plan called for development of swimming, hunting, fishing, canoeing, boating and camping facilities.

At current price levels, DER projects that major development, including dam construction, road relocation, and building of recreation facilities, should cost in the area of $18 million.

Manbeck said that when completed, the Park will provide an easily accessible recreation facility for Dauphin, Lebanon, and Schuylkill County residents, and a first rate tourist attraction for visitors from all areas of the Commonwealth.

In addition to the benefits of the recreational facilities, Manbeck also noted that the Swatara Lake project is vitally necessary as a water supply source for the area. "If Central Pennsylvania is to continue to grow," Manbeck said, "we will need to be able to increase our water supply. The Swatara Lake Park project is designed to help us do this."

Storm water award winners announced

BY SHEILA MILLER

LANCASTER — Two Lancaster County developments will be receiving the Outstanding Storm Water Management award, announced Bob Mowrer, director of the Lancaster County Conservation District.

This year will mark the first year that two awards will be given, but it is the fourth year of the program's existence. Tom Johnston, district administrator, said one award will be going to a public group and the other to a private firm, showing the best architectural and engineeringly best storm water planning.

This year's panel of judges looked at a number of development areas. They finally decided to give Willow Woods Section 1 the honor and recognition for a private firm's investment. The development, located west of Willow Valley restaurant, consists of apartments and townhouses.

Johnston explained the architectural firm for the development eliminated curbs along their streets, and used grassed swales and drop-inlet catch basins to intercept and control the water runoff. The extra water from the development is carried through a series of pipes to two detention basins where it is temporarily stored and discharged safely after the storm.

The district administrator said the development blended the storm water controls into the rest of the landscape. He noted it has been well maintained.

Under the rules of the awards program, only projects that have been completed and functioning for one year are reviewed. The panel of judges look for signs of erosion control and for signs that no adverse flooding has occurred. They check to see that all control practices are being maintained, for both safety and appearance, and that the methods are doing the job of controlling storm water.

This year's panel of judges consisted of Tom Johnston; Bob Mowrer; Tim Breniesen, forestor with the Conservation District; Ray Boltz, Lancaster County Planning Commission; and Ray Herr, commissioner director.

The other recipient of the storm water award was the Cocalico High School, Denver. The school has been completed for about six years, according to Johnston, and has utilized a portion of the grounds for a detention basin. It, too, used grassed swales to carry excess runoff.

The plans for both of the award winners were developed by McCloud, Scatchard, Derck, and Edson of Lititz.

"An award will be given to the developer, the municipality, and the architect or engineer on March 20," said Johnston. "The contest recognizes development sites that have implemented sound storm water management practices and it shows other architects and engineers that controls can be blended into the overall landscape."

Game Commission to begin new wildlife program

HARRISBURG — The Pennsylvania Game Commission has inaugurated a new program to raise funds to broaden and expand the agency's wildlife management activities.

The new program is called Working Together for Wildlife, and its thrust will be the enhancement of conditions for the many species of wild creatures which are not hunted.

Actually, out of the many hundreds of species of wildlife that are found in Pennsylvania, only about a half dozen groups of birds and less than a dozen mammals are generally hunted.

Most Game Commission funds come from the sale of hunting licenses and hunters rightfully feel that most of their fees should be used for the management of game species. It should be noted, however, that nearly all wildlife species prosper under the many Game Commission programs developed for the benefit of game.

Many non-hunters have been reluctant to buy hunting licenses and have not had a readily-available vehicle through which they can contribute to wildlife management.

The Game Commission is launching the Working Together for Wildlife program so everyone can show active support for all of Pennsylvania's wild creatures.

For example, wildlife populations are keyed to habitats, and money to acquire and improve habitats must come from somewhere.

As another example, endangered species are never hunted, but the Game Commission provides protection to endangered species, and funds for enforcing endangered species laws must come from somewhere, too.

Contributions to the Working Together for Wildlife program could be used for activities such as the aforementioned two examples, in addition to being channeled into many other phases of the Game Commission's programs to manage wildlife species that are not hunted. The contributions are tax-deductible.

Under the new program, the general public can gain satisfaction from knowing that all contributors are helping our wildlife.

This year, for those who make a donation of $5.00 to the Working Together for Wildlife program, the Game Commission will provide a packet containing an attractive fabric patch and a double-faced decal highlighted by a flying squirrel and the theme "We Need Wildlife."

Game Commission Executive Director Glenn L. Bowers recently presented the first packet to Governor Dick Thornburgh.

Farm Show

Exhibitors make do with less space

HARRISBURG — Commercial exhibitors at the 1980 Farm Show made do with 10 percent less space than they had in previous years.

Most of the exhibitors said they were able to adjust their displays accordingly.

But several of the major equipment manufacturers were upset at the exhibit space given one particular farm equipment dealer.

Farm Show Director Hugh Coffman last year decided to cut all space alottments by 10 percent in order to allow as many commercial exhibitors as possible to display merchandise at the Show.

Most firms echoed the comments by New Idea Equipment executives who said they were not ones to complain. They simply cut the number of machines on display.

International Harvester showed the same number of machines but crammed them into a smaller area.

In general they agreed with John Deere exhibitors who said they got along. Most said there was no problem as long as all exhibitors were treated equally.

But there lies the rub.

Many exhibitors said they felt Sperry-New Holland Equipment Company unfairly took the aisle as part of their exhibit.

Gene Walker, Lancaster, President of the Pennsylvania Farm Equipment Manufacturers Association, said the other commercial exhibitors feel the aisles are sacred and should be left open for visitors.

It used to be exhibitors were not allowed even to hang signs over the aisles, he said.

But as years passed, New Holland hung signs across the aisle, carpeted across the aisle to join the two sections of its exhibit, and this year had machinery blocking the aisle.

Many exhibitors have asked the Farm Show to review its policy.

But New Holland Advertising Services Manager Al Porsche said his company had the Show's permission to carpet the aisle and use what was formerly an aisle to display equipment.

"We followed the blue tape lines laid down exactly," he said, referring to the lines put on the floor to show the extent of any one exhibit.

"IH raised an execption," he said. But IH was just one of many protesting this year's move by New Holland.

Porsche, who is in charge of New Holland's Farm Show exhibit, said his company paid for every inch of space they used.

He said Farm Show gave them the aisle space to make up for a 20 by 65 foot area they lost.

"We didn't pave the aisle — they gave it to us," he said.

He pointed out that VanDale Equipment and Girton also got part of the aisle.

"If there is any fault they should go after the Farm Show Commission, not us," Porsche said.

The State Farm Equipment Manufacturers said they felt the commission should not alter aisleways without changing the whole floorplan.

Saying they disagree with the Commission's judgement, FEMA members called the move a dangerous precident.

Show Director Coffman has indicated he would be willing to consider other ideas, Walker said after the Show.

Walker said the exhibitors would prefer square exhibit areas rather than horizonal as they were this year.

Walker, a Deere representative, said his company would not be opposed to redoing the whole floorplan.

A company like White, with the big combine they had on display, lost a lot of space since the machine had to be displayed at an angle.

A square space, rather than a long thin one, might have eliminated the problem.

Several dealers pointed out that the main aisles run the length of the floor. So they are parallel to, but not leading to, the fire corridors.

When the Pennsylvania Farm Equipment Manufacturers meet with the Farm Show Commission in early March, they are probably going to recommend the main aisles run crosswise.

They also will ask the main aisles be slightly wider to allow movement of bigger machinery.

"Maybe by the 1982 Show, if they have completed the big new building, the problems will be eliminated," Walker said.

Among other changes the FEMA group would like to see is the elimination of one aisle, with the extra space going back to exhibitors.

All of those improvements would make life easier for the exhibitors, and for visitors, too.

"No one likes to raise a ruckus," one exhibitor said. "But right is right and we can't see one firm gaining an advantage when everyone else is sacrificing for the common good."

Whether adjustments will be made or the whole situation will be laid to rest until the new livestock building is erected will be determined at the March Farm Show Commission meetng. — CH

Lancaster Co. SCS has busy year

LANCASTER — The Soil Conservation Service field office in Lancaster County spent a busy 1979, as their annual report reflects.

The staff provided assistance to 641 Lancaster County landowners. Out of those people assisted, 434 people carried out a conservation practice.

One of the main functions of SCS in the county and throughout the state is to help landowners develop a plan of action for conserving their natural resources, soil and water. Last year, the Lancaster unit helped prepare a plan of conservation for 9508 acres.

As if this didn't keep the staff hopping, they also provided landowners with the needed engineering assistance to install over 56,000 feet of subsurface drainage, more than 20 miles of cropland terraces, over 1200 acres of contour stripcropping systems, 12 miles of grass waterways, and more than 20,000 feet of diversions. They also have 10 agricultural waste management systems to add to their long list of accomplishments.

According to District Conservationist Warren Archibald, much of the emphasis of the year was placed on serving the small farmer. However, with the increased urban pressures in Lancaster County, the SCS staff has been involved in floodplain management and recommendations on proper use, water quality and storm water management.

Reviewing erosion and sedimentation control plans for the Lancaster County Conservation District has been an activity that kept the staff busy all year long. The SCS'ers also helped civic groups and schools in their environmental education programs.

Two major areas of activity in the local SCS office involved the Chickies Creek Watershed project and the Land and Water Resources study for the county. The basic data for these projects has been gathered. Further developments on both of these areas are programmed for 1980.

Lancaster County's soils are being remapped by a team of soil scientists. They reported 137,788 acres were mapped last year, leaving less than one-third of the county to be mapped. SM.

Wenger applauds ag land board

HARRISBURG — Rep. Noah Wenger said he is pleased that a bill which would preserve prime agricultural land was recently signed into law by Governor Thornburgh.

The Lancaster County lawmaker noted that Senate Bill 276 creates the Agricultural Lands Condemnation Approval Board The board's purpose will be to review requests for condemnation of agricultural land and determine whether an alternative exits.

'I have long been a advocate of saving family farms and prime farmland," Wenger said. "This bill is a step towards preserving Pennsylvania's countryside and promoting the preservation of agricultural land."

Wenger said he worked for the passage of a similar bill in the House since his first term in office in 1977.

"I felt then as I do now that this is a very vital issue, one that needs immediate attention. This law is the beginning of many steps the General Assembly will take in this area," he said.

Wenger, Vice-chairman of the Agriculture Committee, said the board will also have authority over agricultural land which is being condemned for the construction of new highways or for landfills used in the disposal of solid or liquid waste material.

In addition, such land which is not improved, would be offered for sale only after the original owner refused to repurchase it at the acquisition price.

"I hope to see this as the beginning of a concerted effort to preserve agricultural lands," he said.

Last place shawl brings top dollar

BY SHEILA MILLER

HARRISBURG — The last shawl to be completed in the first Sheep to Shawl contest, held at this year's Farm Show, sold for the highest price.

The shawl was taken from the fleece off a sheep's back to the finished product by a six person team from Maryland, the Romney Rovers. It took them two hours and ten minutes to shear, spin and weave the shawl.

What made this shawl so special when the time came to auction it off was the fact that it was made from the fleece of a black wooled sheep.

The black and tan woven masterpiece sold for $245.

It took six people to make the shawl and six people to buy it. The six man team making the high bid consisted of John Foster, Jr., Petersburg; Ronald Miller, Bedford; Wilford Harris, Tyrone; John Zimmerman, Mifflinburg; Ron Mowry, Roaring Springs; and Brad Lear, Tyrone.

The first place shawl was made by the Pennsylvania Wool Workers in a record time of one hour and thirty minutes. This shawl came from the fleece of a Suffolk sheep, and had the traditional creamy white color.

The buyer of the Pennsylvania shawl was Richard Brandt of Reading. He purchased it for $150.

The second and third place shawls sold for $150 and $125, respectively.

Auctioneering the event was Harry Bachman, from Annville.

The Pennsylvania team finished in first place in the Farm Show's Sheep to Shawl contest. The shawl was later auctioned off, with the highest bidder being Richard Brandt, Reading. Pictured, left to right, Harry Bachman, auctioneer; Ginny Leber, Camp Hill; Shawn Worley, New Cumberland; Mrs. Richard Brandt, buyer; Cheryl Mampe, Bendersvile; Brenda Bothe, Bechtelsville; and kneeling, Scott Murdoch, Gettysburg.

World soybean demand meeting topic

OCEAN CITY, Md. — The future for overseas sales of U.S. soybeans will be a major topic when farmers gather for the Delmarva Soybean Meeting next month.

The conference takes place Thursday, February 14, from 8:30 a.m. to 3:15 p.m. at the Convention Hall in Ocean City, Md.

The morning session includes a talk by Dale Hathaway, Under Secretary of Interior, U.S. Department of Agriculture, on "The Future for the U.S. and World Soybean Trade."

In the afternoon, Ken L. Bader, Chief Executive Officer of the American Soybean Association will speak about "Foreign Markets Now and for the Future."

During the meeting there will also be a discussion of the Maryland soybean checkoff and how it will affect farmers. Other items on the program are a chemical update, and talks on chemical safety in soybean production and soybean row spacing.

The meeting is sponsored by soybean processors, allied agricultural industries and the extension services of Delaware, Maryland and Virginia.

Grain markets - catastrophe that didn't happen

BY DICK WANNER
Staff Correspondent

PARADISE — The grain catastrophe that didn't happen has left grain producers and dealers alike stunned and happy.

President Carter's January 4 embargo on shipments of feed grains to Russia stopped the sale of 13 million tons of corn and 4 million tons of wheat.

The Embargo stirred up a near panic in the grain trade. The slap on the collective Soviet wrist, many felt, would have no effect on their Afghanistan conquest or the Russian diet, but it would hurt U.S. farmers and could even put some country elevators out of business.

John J. Hess, II, president of a feed mill here that bears his name, said on Monday morning, Jan. 7, he figured he would lose some $20,000 on the grain he had in his inventories.

On the afternoon of Thursday the 17th, he was confident he hadn't yet lost anything as a result of the embargo.

"Carter was right," Hess said. "Nobody, me included, believed that the government could keep the price from sliding to the bottom. But they did it."

Feelings in the business community ran strongly against the embargo.

A report in BUSINESS WEEK crucified the administration for the move, pointing out that even if prices recovered quickly, it would take years to regain the trust of the Russian grain buyers.

On the other hand, the WALL STREET JOURNAL this week quoted a Chicago grain trader as saying, "Prices broke too badly on too much baloney about all the fears."

He was referring to the price break on the first two trading days after the embargo, and the fact that the market was making up this week for what it lost last week.

Joel Coleman, a Chester County farmer who harvested 260 acres of corn and 60 acres of wheat in the fall, said he was upset when he heard of the embargo. Much of his grain is still in storage, waiting to be sold.

"But it was probably the best thing we could have done," Coleman said.

"Another possibility would have been to sell them the grain, but at double the price, and use the extra money to start up alcohol plants.

"I do think that it's going to be a couple of years before everything is straightened out in the grain market. But right now, it hasn't hurt me."

In Milford, Del., Burt Westman, manager of the Milford Grain Co., said the embargo had so far had no impact on their business. The firm is a for-profit storage facility owned and controlled by a number of grain farmers in the Milford area.

"We've made some sales since the embargo was announced," Westman said, "but they were soybeans and the prices were actually a little better than they were before the embargo. Our farmers are sitting tight, waiting to see what the market will do. They're certainly in no panic to sell."

It all seemed too good to believe, except for Joe McDavid, a public relations spokesman for USDA in Washington.

Prices didn't drop because of the programs and the actions by the administration," McDavid said.

"When the sale to Russia was stopped, the government said they would not allow any of the corn back into the domestic market at less than $2.40 a bushel, which is what the price was on the Friday of the announcement. And we've set up storage and loan programs to protect farmers against losses," he said.

"It just took the trade a few days to realize exactly what we'd done, but I think the markets are now getting back to where they should be," the USDA man concluded.

Franklin extension to elect new directors

CHAMBERSBURG — The Annual Meeting of the Franklin County Agricultural Extension Association has been set for Friday, February 1, at the Kauffman's Community Center, near Kauffman's Station, according to James L. Wilson, President of the Association.

All citizens of Franklin County are automatically members and are invited to participate at the meeting in the election of new directors from five townships....Letterkenny, Lurgan, Metal, Montgomery, and Peters.

Tickets for the event are available thru January 25 from all Association directors and at the Franklin County Extension Office, 191 Franklin Farms Lane, Chambersburg.

The event will get underway with a Social Hour at 6:15 p.m. with dinner being served at 7. Marion Deppen, Assistant Director of Extension, at Penn State, will address the topic, "Land and Energy: Issues and Prospects".

County Extension Director, John Z. Shearer, will present a slide-illustrated talk on his recent award trip to Holland and Switzerland. Various awards and presentations will also be made.

Present directors of the Association include: Richard W. Harshman, Chambersburg; Mrs. Edith Doyle, Dry Run; Stanley J. Burkholder, Chambersburg; Mrs. Joyce Armstrong, Chambersburg; Robert Stouffer, Chambersburg; Gerald Hammond, Chambersburg.

Also P. Joe Musser, Newburg; Robert A. Woods, Fannettsburg; Marvin E. Hissong, Lemasters; John R. Stoner, Mercersburg; Harold C. Gayman, Waynesboro; Mrs. Betty Wingert, St. Thomas; Harold L. Wenger, Shippensburg; Donald Keefer, Mercersburg; Andrew S. Fitz, Waynesboro; Mrs. Jane Goshorn, Dry Run; Mrs. Doris Meyers, Chambersburg.

And, John R. Rotz, St. Thomas; Stanley J. Helman, Chambersburg; Mrs. Lillian Gayman, Orrstown; Mrs. Wilma Mickey, Chambersburg; Harold Hoffeditz, Mercersburg; James Wilson, Lemasters; Kenneth Myers, St. Thomas; Mrs. Janet Deardorff, Fayetteville; Mrs. Jean Wengert, Chambersburg; and Mrs. Ethel Barnes, Mercersburg.

YOU'VE HEARD THE TALK.

There's a better way to dry grain. It's called CHILLCURING™ because it means CURING without heat. Here's what the talk is all about.

THE GRAIN

Every kernel of grain is alive when it comes out of the field. It is a seed, able to grow because it has the ability to take on moisture. Likewise, it can be kept in a state of preservation by removing the moisture already in it.

But by heating the grain to dry it, the seed life is destroyed

By *removing* heat and moisture from the grain, it becomes dormant, and stays alive. Then it can ripen to full weight, losing only water while keeping valuable protein, starches and sugar.

THE SYSTEM

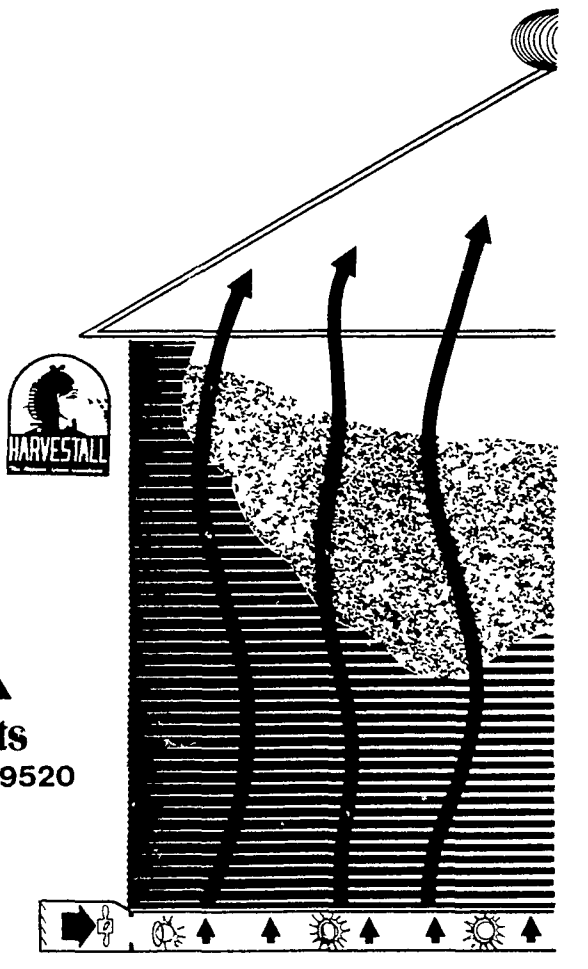
It's simple. Grain goes from the field right to the bin. With the unique AIRFRAME™ and AIRFLOOR™ the grain rests on a solid bed that allows maximum ventilation.

Clean dry air is the best curing medium for the grain. GRAINLAMPS™ provide electric sunshine, cleaning and drying the air beneath the floor, before it passes through the grain

Fans force air under the floor Rising through the grain, this dry outside air carries away moisture and heat.

At the peak of the bin a jumbo 40" turbine, the WHIRLCOOLER™, puts nature to work for you. Wind and rising air keeps it turning, venting the system naturally.

A special HARVESTAT™ Control System monitors the curing process. A simple setting controls the GRAINLAMPS™ to make use of free, natural air.



Advanced Ag Products
RD 2 Box 174 Elverson, Pa. 19520
215-286-9118

THE FACTS

1. You can't beat Nature. HARVESTALL GRAIN CHILLCURING™ uses the same elements that ripen and preserve grain if left to itself: free flowing air and infra red rays (sunshine)

2. CHILLCURING™ has been tried and proven in 17 states on over 3000 farms. The research is in. CHILLCURING™ WORKS!

3. The CHILLCURING™ system uses only the electricity to power fans and lights, using about 1½ KW hrs. per bushel. Compare that cost to other systems that use increasingly expensive fuels to get disappointing results.

4. The grain goes from the field to the bin and stays there till you need it. Save time and money at harvest with the one step HARVESTALL CHILLCURING™ and storage system.

5. If you're in the market for grain storage, you owe it to yourself to look further into HARVESTALL GRAIN CHILLCURING™.

"The true genius is a mind of large general powers, accidentally determined to some particular direction."
Samuel Johnson

PSU's McClellan urges no-till farming

UNIVERSITY PARK — No-tillage farming can be successful on any northeastern dairy farm where the chief crops are corn, oats, and alfalfa, declared Dr. Willis L. McClellan of the Pennsyvlania State University January 3.

He addressed nearly 1,000 farmers attending the Sixth Annual Mid-Atlantic No-Till Conference held at Hunt Valley, Md.

The Penn State agronomist urged farmers to "take advantage of what is already known about a complete no-tillage system." No-till farming replaces plowing with planters having soil-cutting disks or coulters which prepare a narrow strip for placing the seed.

Dr. McClellan reported the chief advantages of no-till farming are control of erosion, the ability to plant instead of using time for tillage, and minimum labor and fuel. Eastern farmers have proved, he said, that they can grow no-tillage corn, soybeans, forage crops, and small grains.

Timeliness of no-tillage planting can be of utmost benefit to farmers, he pointed out. No-till planting prevents delays in seeding fields.

In conventional planting, however, delays due to weather and soil conditions can disrupt the entire planting operation.

Moreover, soil conditions in no-till fields often allow harveting when conventionally tilled fields will not support heavy harvesting equipment, Dr. McClellan noted.

In no-till farming, only herbicides are needed for weed control, Dr. McClellan stated. A corn crop can be followed with no-tillage oats the succeeding year. Herbicides with short-term residues must be used on the corn field to prevent injury to oats.

After removing oats for grain and harvesting the straw, the farmer can put in a no-till alfalfa seeding in the oats stubble. Yields from a corn-oats-alfalfa rotation in a no-till system are equal to yields with conventional tillage, it was pointed out.

John H. Koons of R.D. 2, Waynesboro, Pa., described his experiences with no-tillage on a dairy farm.

He said the time and labor saved in growing no-tillage corn has made it possible for him to increase his acreage considerably and has provided much added income without creating any more work.

"All corn on our farm is planted no-till and we have been planting no-till for eight years," he claimed. "The biggest advantage no-tillage has given us is the ability to add 300 acres of rented ground for producing corn and 400 acres of custom planting.

"This provides added income without greatly increasing our time and labor beyond that needed eight years ago to plant 100 acres in the conventional way," Mr. Koons affirmed.

He said 90 per cent of his manure is handled as liquid. He said he believes that liquid manure and no-tillage corn "go hand in hand." The 100-acre home farm is grown to silage corn and these fields get the manure.

All of Koon's silage corn field are seeded to rye cover crops after the corn is harvested and removed The rye is killed in the spring with herbicides and then corn is planted.

"It is important that corn planter soil-cutting disks or coulters cut through the manure crust to allow air and sunlight to penetrate down to the soil where the corn is germinating. If this is done properly, germination and a good stand of seedlings are assured," he stated.

He also adds a ton or more of lime per acre to all corn ground each year, as long as time and weather conditions permit. This prevents the soil from becoming acid and allows herbicides to control weeds effectively.

Limit extended for comment on milk reconstitution

WASHINGTON, D.C. — Dairy farmers, milk handlers and consumers will have an additional 45 days to file comments and proposals on the issue of reconstituted milk, U.S. Department of Agriculture officials announced today. The original comment period which would have expired Jan. 15 has been extended to Feb. 29.

P. R. Smith, assistant secretary of agriculture for marketing and transportation services, said requests for the extension were granted because the proposals submitted by the Community Nutrition Institute are national in scope and require extensive study by those affected.

The CNI proposals would remove reconstituted milk from the Class I pricing provisions of federal milk orders. Reconstituted milk is made by combining whole milk powder or nonfat dry milk with water and butterfat. Currently, all milk products used for fluid consumption are priced at the Class 1 level, the highest-priced class under the federal milk orders.

Smith said requests for extension of the comment period on the proposed hearing were received from several interested parties including members of Congress, the National Milk Producers Federation, the Milk Industry Foundation, and the State of New York. NMPF asked for an additional 180 days and the others for unspecified amounts of time to complete studies on the CNI proposals.

The assistant secretary pointed out that the extension is consistent with the administration's policy, emphasizing that the public should be given adequate time to study and become familiar with issues that have national ramifications and are being considered by the government.

Notice of the granting of the extension was published in the January 18 Federal Register. Comments and proposals, with three copies, should be sent to the deputy administrator, Marketing Program Operations, Agricultural Marketing Service, USDA, Washington, D.C. 20250.

PIONEER . . .
the name to remember for alfalfa seed!

531...
the number to remember for high yields.
• 531 is a rapid recovery alfalfa
• Offers excellent tolerance to Anthracnose plus very good tolerance to bacterial wilt.
• Well suited to 2, 3 or more years of production. Alfalfa supply limited.

NOTICE OF INTENT TO SELL REAL ESTATE

The Administratrix of the Estate of George A. Tushim, Jr., wishes to receive offers to purchase the farm of the above-named decedent located in Bald Eagle Township, Clinton County, Pennsylvania.

The farm consists of 76 acres, more or less, and has erected thereon a 2-story, 4-bedroom frame house with a new woodburning stone fireplace in living room, along with new carpeting throughout, new asphalt roof, new furnace, new 200-amp electrical service, bank barn and other miscellaneous outbuildings; it is the same property purchased by George A. Tushim, Jr., from Edward H. Gotschall, et ux, by deed dated September 11, 1973, as recorded in Clinton County Deed Book 242, page 842, and has been designated as Bald Eagle Township Tax Parcel No. 6-1-57. More information about the property being offered for sale can be obtained from Mr. Russell Roan, Mackeyville, Pa. 17750, who can be contacted by phone between 5:00 - 7:00 p.m. at (717) 726-6351 or (717) 726-3706.

An offer must be made on a form which is available at the State College and Lock Haven offices of McQuaide, Blasko, Schwartz, Fleming & Faulkner, Inc., legal counsel for the Estate. The amount of an offer must be equal to or in excess of $119,000.00 and must be received in either of the aforementioned law offices on the approved form no later than February 21, 1980, at 5:00 P.M. Settlement will occur within thirty (30) days of the acceptance of an offer by the Administratrix, who, however, reserves the right, in her discretion, to reject any and all offers received.

PUBLIC SALE
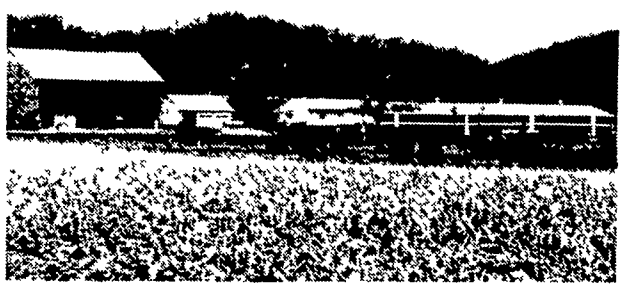
of 55 ACRE FARM
SATURDAY, FEBRUARY 2
Sale Time: 2:00 P.M.

LOCATION: Travel north on Route 272 to Swartzville, turn left on Route 897 toward Reinholds, turn right on Holtzman Road, about ½ mile on the right.



PARCEL 1 - Approximately 39 acres of good land with frontage on Holtzman and Vera Cruz Roads. Buildings include a 3-car garage, frame bank barn, 2-story chicken house, and a brick rancher. The chicken house is Snavely-built, measures 40' x 250', about 5 years old, has Choretime control-type automatic feeders, 2 feed bins hold about 13 tons each, and a 2300 bushel grain tank and drier. The dwelling is 28' x 42', heated by electric and a wood stove. On first floor is a carpeted living room, carpeted dining area, kitchen with linoleum floor, 1½ baths, 3 carpeted bedrooms. In the basement are 2 more bedrooms which are carpeted and paneled, a full bath, laundry, and a carpeted family room.

PARCEL 2 - Approximately 15 acres of land with about 1820' frontage on Holtzman Road and about 820' frontage on Buzzard Road.

NOTICE: PARCEL 1 and PARCEL 2 will be offered for sale both separately and combined.

This farm is in top notch condition. A large diesel generator, large enough to run everything on the farm and starts automatically if ever the electric current should fail, will be a part of the sale. The chicken house is presently being used for pullets.

Don't miss this opportunity for an excellent piece of real estate.

SHADY LANE DAIRY SALES

QUARRYVILLE, PA

2 COMPLETE WESTERN MARYLAND HERD DISPERSALS

Held at Shady Lane Dairy Sales, ¼ mile west of Quarryville PA, off 372 on Oak Bottom Rd.

TUESDAY, JANUARY 29, 1980

11:30 A.M.

BLIZZARD DATE, FEBRUARY 1, 1980

11:30 A.M.

115 REGISTERED & HIGH GRADE HOLSTEINS

This Sale consists of 1 herd of 68 good young cows, 18 recently fresh, 20 close or dry, balance in all stages of lactation. A real good working herd that will go home and do good. A lot of summer cows selling due only to loss of barn. A quick sale.

One herd consisting of 22 head, 5 registered cows, real sharp, 6 springing, some fresh, balance all stages of lactation. Are milking up to 22 lbs. day. This herd selling due to ill health.

A good group of Registered young cows and heifers from a local herd with average 19,000 lb., 20 fresh cows right from the farm & ready to go.

Farmers-- if you need cows, make plans to see these sell. A good opportunity to buy.

30 day TB & Blood tested, pregnancy examined.

High Energy, high quality dairy rations must be made with high quality, high energy feed ingredients. Remember, when someone wants to sell you a feed that "costs less" - only he knows the quality of ingredients used to manufacture that feed.
